Bonnie J. Ross Leadbeater, 2014-03-05 The first edition of *Growing Up Fast* attempted to counter the stereotype of poor minority adolescent mothers and describe the diversity of their educational work parenting and relationship experiences The volume followed a strengths based approach to understanding why some mothers appeared resilient to the stresses of early parenting compared to their peers and what obstacles undermine resiliency for some of these young women We hear their stories in their own words We also see how many disadvantaged mothers go on to succeed in school work and parenting while avoiding many of the risk associated with teen parenting The research is based on a six year study of 120 young disadvantaged mothers and their children from New York City It uniquely combines the analysis of longitudinal questionnaire data with qualitative analysis of extensive interviews conducted with these women focusing on the first six years after their child was born A past winner of the Society for Research on Adolescence best book award *Growing Up Fast* is a fascinating study of human resilience that will continue to be recognized for its contribution to individuals involved in program development and policymaking with teenage parenting A new introductory chapter to the book suggests that we can look at the previous findings through a new lens that emphasizes not only the diversity of outcomes for young mothers and the sources of their strengths but also asks what we can learn from these women about supporting their educational and work goals as they transition to adulthood New attention to emerging adulthood shows that this is a critical stage of life when the foundations for health and healthy life styles are laid down Developmental tasks of this phase include building the capacity for financial and residential independence through post secondary education and job training and establishing stable sources of support from parents romantic partners and peers for all youth Leadbeater addresses the societal changes that make these tasks particularly salient for young women and focuses attention on how we can support youth who make this transition with children *Analysts in the Trenches* Bruce Sklarew, 2014-06-17 The horrific events of 9 11 and its sequelae have reinforced what thoughtful analysts have long known that they have a responsibility to respond to the complex social and emotional issues arising in their communities to function that is as community psychoanalysts *Analysts in the Trenches* vividly illustrates what socially engaged analysts can offer to violent and disturbed communities Contributors bring analytic expertise to bear on the emotional sequelae to violence including sexual and physical abuse to multiple and traumatic losses

Effective Programs for Latino Students Robert E. Slavin,Margarita Calderon,Margarita Calderon,2012-11-12 Latino or Hispanic children are one of the fastest growing groups in U S schools today On average these students perform worse than Anglo students on measures of academic achievement and other measures of academic success and their drop out rate

is high There are schools of excellence among those serving Latino children but the majority of these children are placed at risk by schools and community institutions unable to build on the cultural personal and linguistic strengths these children are likely to bring with them to school Schools serving Latino students need programs based on high quality research capable of being replicated and adapted to local circumstances and needs The purpose of this book is to present the current state of the art with respect to research on effective instructional programs for Latino students in elementary and secondary grades Surprisingly this has not been done before there are many books on the situation of Latino students in U S schools but none so far have reviewed research on the outcomes of programs designed to enhance the academic achievement of these students The chapters represent a broad range of methodologies from experimental to correlational to descriptive and the solutions they propose are extremely diverse Each examines in its own way programs and practices that are showing success Together they present a rich array of research based effective programs that are practical widely available and likely to make a profound difference What binds the chapters together is a shared belief that Latino students can succeed at the highest levels if they receive the quality of instruction they deserve and a shared belief that reform of schools serving many Latino students is both possible and essential This is a book filled with statistics description and reviews of research but even more it is filled with optimism about what schools for Latino students can be and what these students will achieve It is a highly relevant and useful resource for educators policymakers and researchers who want to use research to inform the decisions they make about how to help Latino students succeed in elementary and secondary schools and beyond
