**Preventing Violence in Schools** Joan N. Burstyn, Geoff Bender, Ronnie Casella, Howard W. Gordon, Domingo P. Guerra, 2001-04-01 School violence is a burning issue these days This book provides an in depth analysis of violence prevention programs and an assessment of their effectiveness using data from observations individual interviews and focus groups as well as published data from the schools It is distinguished by its focus on the cultural and structural context of school violence and violence prevention efforts Where most other researchers use quantitative measures such as surveys to assess the effectiveness of violence prevention programs the authors of this book use qualitative research and ethnography to study the environment where such programs take place Thus this work one of only a few ethnographic studies of violence prevention programs in schools links previous quantitative research on the topic and critical ethnography Preventing Violence in Schools A Challenge to American Democracy includes voices of school students accused of practicing violence who have been participants in violence prevention programs analyzes a citywide peer mediation program who benefits and who does not who is mediated and who mediates and what the implications of these findings may be examines the kinds of violence recognized in schools and the ways schools themselves may perpetuate violence and describes a violence prevention program for students at an alternative school Preventing Violence in Schools A Challenge to American Democracy is highly relevant for students in courses on urban education foundations of education education and social policy youth and the law and qualitative research and for teachers administrators and other professionals such as school psychologists and guidance counselors at the middle and high school levels

Swearer, 2004-02-04 Much of our knowledge about bullying behaviors comes from research conducted over the past several decades in Europe Australia and Canada Until the past decade research in the United States has lagged behind our European Australian and Canadian counterparts This book seeks to fill this void by forwarding research on bullying across contexts conducted with American participants This book is an exciting compilation of research on bullying in school aged youth conducted across the United States by a representative group of researchers including developmental social counseling school and clinical psychologists As such it presents a picture of the complexity of bullying behaviors and offers suggestions for using data based decision making to intervene and reduce bullying behaviors in our nation s schools Given the complexity of bullying and victimization this book gives guidance for schools as they develop prevention and intervention programming for bullying Providing a source through which school

administrators can utilize the research findings the book is divided into five parts Part I illustrates the importance of individual characteristics across bully victim subtypes Part II addresses how peer groups relate to bullying across the school years Part III explores how teachers and classrooms influence bullying and aggression during the school years Part IV implicates ecological systems in fostering and maintaining bullying in schools It also highlights the potential for these systems to work in combating bullying Part V focuses on specific aspects of prevention and intervention planning

**Re-Envisioning Education and Democracy** Ruthanne Kurth-Schai, Charles R. Green, 2006-09-01 The fate of public education and therefore the future of our democracy is at risk Powerful forces are eroding commitment to public schools and weakening democratic resolve Yet even in deeply troubling times it is possible to broaden social imagination and empower efforts toward systemic progressive reform This book is an invitation for widespread participation in a complex process re envisioning education and democracy To reenvision to envision and then envision again is to join with others in imagining new possibilities and bringing these into existence Re envisioning is a radically social process Although distinct and varied individual contributions are required transformative visions cannot be advanced through the agency of one charismatic person or bound by one influential perspective The process of re envisioning like all forms of democratic living and learning draws energy and insight

when connection and communion are sustained across dimensions of difference Re envisioning is an intensely creative and exploratory process It is not accomplished through careful construction of best laid plans aimed at attaining certainty and control Re envisioning is instead experienced and evolved by preparing for and then acting on informed and strategic glimpses These brief and fleeting impressions multimodal and multi sensory incomplete and ambiguous always in motion offer potentials but no definitive answers Re envisioning is a profoundly ethical and aesthetic process centered in prospects for social justice compassion reform and renewal Social movements are rarely motivated by commitments to narrow objectives aimed at solving specific problems Across time and cultures we are drawn to persons and processes to ideas and images that call us back to remember our highest principles and move us forward to respond with acts of integrity and grace Recurrent themes of beauty and power here mirrored in chapter titles inspire guide and liberate collective vision and principled action Re envisioning although accessible to all remains largely undeveloped and underutilized Our collective ability to realize progressive aspirations for education and democracy can be significantly enhanced by integrating the process of re envisioning with other more familiar educational and political reform strategies
