International Human Rights Law provides a comprehensive and original overview of one of the fundamental topics within international law. It contains substantial new essays by more than forty leading experts in the field giving students, scholars and practitioners a complete overview of the issues that inform research as well as a map of the debates that animate the field. Each chapter features a critical and up to date analysis of the current state of debate and discussion assessing recent work and advancing the understanding of all aspects of this developing area of international law. The Handbook consists of 39 chapters divided into seven parts. Parts I and II explore the foundational theories and the historical antecedents of human rights law from a diverse set of disciplines including the philosophical, religious, biological and psychological origins of moral development and altruism and sociological findings about cooperation and conflict. Part III focuses on the law making process and categories of rights. Parts IV and V examine the normative and institutional evolution of human rights and discuss this impact on various doctrines of general international law. The final two parts are more speculative examining whether there is an advantage to considering major social problems from a human rights perspective and if so how that might be done. Part VI analyses current problems that are being addressed by governments both domestically and through international organizations and issues that have been placed on the human rights agenda of the United Nations such as state responsibility for human rights violations and economic sanctions to enforce human rights. Part VII then evaluates the impact of international human rights law over the past six decades from a variety of perspectives. The Handbook is an invaluable resource for scholars, students and practitioners of international human rights law. It provides the reader with new perspectives on international human rights law that are both multidisciplinary and geographically and culturally diverse.
