Lyttelton**

Provintsialnyi Fashizm:

The Making of Fascism Dahlia S. Elazar, 2001-08-30 Elazar examines the social and political processes that determined the character of Fascist organization in Italy and its seizure of state power first in the provinces and then in the nation. She argues that the Fascists' modus operandi shaped the political struggles they engaged in and reflexively determined their own political significance. Employing both primary and secondary historical sources, Elazar reveals the crucial internal political struggles and inner contradictions through which Fascism was invented. The political strategy of paramilitary organization and assault on labor and the Socialists carried out by the Fascist Action Squads in collusion with men of property was crucial in determining their seizure of power. But this also determined the ideological and organizational contours of Fascism itself. The Fascist Squads' alliances with men of property made them a formidable faction within the Fascist organization that could and did challenge Mussolini's authority. The making of Fascism is thus marked by the irony of the relationship between Mussolini and his political power base, the Squads. The very element of paramilitary organization that was decisive in the Fascists' seizure of power in the provinces had to be submerged by Mussolini if he was to preserve his power. Historical and comparative sociologists, political sociologists, and students of Italian Fascism and Italian history will find this new explanation of the making of Fascism both provocative and fascinating.

The Seizure of Power Professor Adrian Lyttelton, Adrian Lyttelton, 2004-12-15 This volume is a study of Fascism in its country of origin, Italy. It describes the impact of a new type of political movement on Italian government and society. The Fascist seizure of power did not begin or end with Mussolini's famous March on Rome in 1922; it was achieved rather by gradual subversion of the liberal order which involved not only the destruction of all political opposition but also the creation of new institutions designed to control economic and cultural life. A classic work of wide-ranging scholarship, this book is here republished with a new preface by the author and will be essential reading for all students of Fascism and international history.

Through Fascism to World Power Ion Smeaton Munro, 1933 *The Fascist Experiment* Luigi Villari, 1926 **Agrarian Elites and Italian Fascism** Anthony L. Cardoza, 2014-07-14 Treating the tumultuous period from 1901 to the late 1920s, this book describes social and political conflict in the cradle of agrarian fascism. Originally published in 1983, The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. Making the Fascist State Herbert Wallace Schneider, 1928 *The Fascist Dictatorship in Italy* Gaetano Salvemini, 1927 **Rethinking the History of Italian Fascism** Giulia Albanese, 2022-03-10 In the last years, the discussion around what is fascism, if this concept can be applied to present forms of politics, and if its seeds are still present today, became central in the political

debate This discussion led to a vast reconsideration of the meaning and the experience of fascism in Europe and is changing the ways in which scholars of different generations look at this political ideology and come back to it and it is also changing the ways in which we consider the experience of Italian fascism in the European and global context The aim of the book is building a general history of Fascism and its historiography through the analysis of 13 different fundamental aspects which were at the core of Fascist project or of Fascist practices during the regime Each essay considers a specific and meaningful aspect of the history of Italian fascism reflecting on it from the vantage point of a case study The essays thus reinterrogates the history of Fascism to understand in which way Fascism was able to mould the historical context in which it was born how and if it transformed political cultural social elements that were already present in Italy The themes considered are violence empire war politics economy religion culture but also antifascism and the impact of Fascism abroad especially in the Twenties and at the beginnings of the Thirties The book could be both used for a general public interested in the history of Europe in the interwar period and for an academic and scholarly public since the essays aim to develop a provocative reflection on their own area of research
