46 Miles Jarra Brown, 2015-06-24 When Jarra Brown hears church bells he cannot fail to be reminded of the hundreds 345 to be precise of service personnel who passed through the beautiful rural Wiltshire countryside into Oxfordshire These men and women were not hiking across its green pastures or sitting on top of the number 55 bus instead they were lifeless resting inside a coffin draped with the Union flag By the end of August 2011 the bells of St Bartholomew s Church in Wootton Bassett had tolled more times than the residents of this once peaceful town cared to think about for each chime represented the moment the police convoy accompanying the hearse from RAF Lyneham entered the High Street A moment frozen in time a moment when the residents of this town came to show their respects a

moment that couldn't have been more fitting even if it had been choreographed There was no call to arms by the Town Crier just a spontaneous modest and unprompted response to those who had paid the ultimate price in the name of duty 46 Miles is not a book about the politics of war the whys and wherefores of the Iraq and Afghanistan conflicts or indeed the hidden agendas and government strategies It is about a town which captured the hearts of our nation and whose emotions rippled the entire 46 mile journey of honour dignity and respect into Oxford It is dedicated to those 345 people who having signed up to serve their Queen and country paid with their lives Wootton Bassett who nurtured the grieving on every occasion wanted to let the nation know that these heroes will never be forgotten British Military Aviation in the 1970s Malcolm

Fife, 2016-02-15 Malcolm Fife explores the fascinating world of British Military Aviation in the 1970s **The World's Most Powerful Military Aircraft** Thomas Newdick, 2016-12-15 Ever since man first took to the air combat aircraft have been at the cutting edge of aviation technology resulting in some of the greatest and most complex designs ever built The World's Greatest Military Aircraft features 52 of the most important military aircraft of the last hundred years including everything from biplane fighters and carrier aircraft to tactical bombers transport aircraft multirole fighters strategic strike aircraft and stealth bombers Each entry includes a brief description of the model's development and history a profile view key features and specifications Packed with more than 200 artworks and photographs this is a colorful guide for the military aviation enthusiast **Military Low Flying in the UK** Michael Leek, 2012-03-19 The UK has some of the most dramatic landscapes for NATO pilots to exercise the increasingly important military art of high speed low flying It also offers splendid opportunities for photography of close up dramatic shots taken from the hillsides and mountains of Wales Scotland and other steep terrain within the UK Pilots training for operations in Afghanistan Iraq and other potential war zones learn their skills flying through the valleys of the UK at near subsonic speed For the legions of enthusiastic aviation photographers thousands of whom can be seen at air shows it provides ideal viewpoints This book contains firsthand accounts from the pilots and expert advice for the photographer together with stunning close up color photos of the aircraft flying at eye level and sometimes below the camera It has the full support of the Royal Air Force and articles by the leading photographers in this field *Operation Black Buck 1982* Andrew Bird, 2023-08-17 The definitive account of the Vulcan raids taught me something new on every page Rowland White author of the bestselling Vulcan 607 A newly researched fully illustrated account of how RAF Vulcan bombers flew a series of the world's longest air raids in 1982 against Port Stanley airfield in a daring hastily improvised strike against the Argentinian invaders The RAF's opening shots of the Falklands War were among the most remarkable airstrikes in history The idea was simple to destroy the runway at Port Stanley and prevent Argentinian fast jets using it against the Royal Navy task force But the nearest British owned airfield was Ascension Island 3 900 miles away from the Falklands Researcher and historian Andrew D Bird has uncovered new detail of what really made these extraordinary raids possible including never before published information and photos demonstrating the discreet support provided by the

United States Packed with spectacular original artwork and rare photos this book explains how these hugely complex yet completely improvised raids were launched This is also the story of how the last of the Vulcans only a few months away from the scrapyard had to be hastily re equipped to carry conventional bombs with bombsights electronics and navigation systems borrowed from other aircraft Yet they managed to fly what were the longest range air attacks in history and struck a severe blow to the occupying Argentinians

The RAF's Armourers Tony Lamsdale, Phil Appleby, 2023-11-23 It is said that one of the earliest trades in the world is that of the armorer Historically it is a profession dated slightly after prostitution but well before banking Since the birth of the Royal Flying Corps in 1912 through to the modern Royal Air Force the role of the armorer has been pivotal Not for nothing did the founder of the RAF Lord Trenchard once declare The armorer without him there is no need for an air force In the years since the need for RAF armorers was first recognized it has been a role that has evolved with the times What has remained constant however is the fact that it is still a fascinating and potentially dangerous trade with many different branches and specialisms In this book the authors one of whom Tony Lamsdale is himself a former RAF armorer reveal the previously untold story of how the trade has adapted to the most modern of military machines the aircraft The authors look at the shared history of the armorer and the RAF through the eyes of those who served These veterans stories span decades and their first hand accounts and insights into conflict and peace time operations demonstrate the qualities and characteristics that make armorers unique The book starts with a brief history of the armorer then before capturing the adventures and exploits of RAF armorers from the Second World War and on into the Cold War The dangerous duties of the armorers on deployment in such places as the Falklands Iran Iraq or Afghanistan are all explored There is also the question of having to learn of bomb dumps the use of small arms and the unique world of the armorer with its own peculiar language and the camaraderie of the crew room With each chapter brought to life through personal anecdotes and shared experiences this book provides an insight into an utterly essential role which has remained largely hidden until now

War Dog Al J. Venter,1904-07-20 Mercenaries have been with us since the dawn of civilization yet in the modern world they are little understood While many of today's freelance fighters provide support for larger military establishments others wage war where the great powers refuse to tread In *War Dog* Al Venter examines the latter world of mercenary fighters effecting decisions by themselves In the process he unveils a remarkable array of close quarters combat action Having personally visited every locale he describes throughout Africa and the Middle East Venter is the rare correspondent who had to carry an AK 47 in his research along with his notebook and camera To him covering mercenary actions meant accompanying the men into the thick of combat During Sierra Leone's civil war he flew in the front bubble of the government's lone Hind gunship piloted by the heroic chopper ace Nellis as it flew daily missions to blast apart rebel positions In this book the author not only describes the battles of the legendary South African mercenary company Executive Outcomes he knew the founders personally and joined them on a number of actions After stemming the tide of Jonas Savimbi's UNITA army in Angola an outfit many of the SA operators had previously trained Executive Outcomes headed north to hold back vicious rebels in West Africa This book is not only about triumph against adversity but also losses as Venter relates the death and subsequent cannibalistic fate of his American friend Bob MacKenzie in Sierra Leone Here we see the plight of thousands of civilians fleeing from homicidal jungle warriors as well as the professionalism of the mercenaries who fought back with one hand and attempted to train government troops with the other in hopes that they would someday be able to stand on their own The American public as well as its military largely sidestepped the horrific conflicts that embroiled Africa during the past two decades But as Venter informs us there were indeed small numbers of professional fighters on the ground defending civilians and attempting to conjure order from chaos In the process their heroism went unrecorded and their combat skill became known only to each other In this book we gain an intimate glimpse of this modern breed of warrior in combat Not laden with medals ribbons civic parades or even guaranteed income they have nevertheless fought some of the toughest battles in the post Cold War era They simply are and perhaps always will be War Dogs AL J VENTER has been an

international war correspondent for nearly thirty years primarily for the Jane's Information Group He has also produced documentary television films on subjects from the wars in Africa and Afghanistan to sharkhunting off the Cape of Good Hope Among his previous works are The Iraqi War Debrief Why Saddam Hussein Was Toppled and Iran's Nuclear Option Tehran's Quest for the Atomic Bomb A native of South Africa he is currently resident in the United Kingdom
