shepherd labrador retriever mix named Jasper Kim Trevathan began a series of solitary upstream kayaking quests in search of what he calls liminal zones transitional areas where dammed reservoirs give way to the current of the rivers that feed them For four years he scoured the rivers and lakes of America where environmentally damaging and now decaying man made structures have transformed the waterways In this thoughtful work he details his upriver adventures describing the

ecological and aesthetic differences between a dammed river and a free flowing river and exploring the implications of what liminal zones represent a reassertion of pure unadulterated nature over engineered bodies of water Trevathan began by exploring the rivers and creeks of his childhood the Blood River and Clarks River in western Kentucky He soon ventured out to the Wolf River the Big South Fork of the Cumberland and other waterways in Tennessee In 2008 he looped around the country with trips to Indiana s Tippecanoe River Montana s Clearwater River Oregon s Deschutes and Rogue Rivers and Colorado s Dolores River as well as adventures on such southeastern rivers as the Edisto the Tellico and the Nantahala To Trevathan paddling upstream became a sort of religion with a vaporous deity that kept him searching Each excursion yielded something unexpected from a near drowning in the Rogue River to a mysterious fog bank that arose across the Nantahala at midday Throughout Liminal Zones Trevathan considers what makes certain places special why some are set aside and protected why others are not and how free flowing streams remain valuable to our culture our history and our physical and spiritual health This contemplative chronicle of his journeys by water reveals discoveries as varied and complex as the rivers themselves
