Littell's Living Age Eliakim Littell, Robert S. Littell, 1884 *The Living Age*, 1884 **Edge-based Clausal Syntax** Paul Martin Postal, 2010 An argument that there are three kinds of English grammatical objects each with different syntactic properties In Edge Based Clausal Syntax Paul Postal rejects the notion that an English phrase of the form V DP invariably involves a grammatical relation properly characterized as a direct object He argues instead that at least three distinct relations occur in such a structure The different syntactic properties of these three kinds of objects are shown by how they behave in passives middles able forms tough movement wh movement Heavy NP Shift Ride Node Raising re prefixation and many other tests This proposal renders Postal's position sharply different from that of Chomsky who defined a direct object structurally as NP VP and with the traditional linguistics text's definition of the direct object as the DP sister of V According to Postal's framework sentence structures are complex graph structures built on nodes vertices and edges arcs The node that heads a particular edge represents a constituent that bears the grammatical relation named by the edge label to its tail node This approach allows two DPs that have very different grammatical properties to occupy what looks like identical structural positions The contrasting behaviors of direct objects which at first seem anomalous even grammatically chaotic emerge in Postal's account as nonanomalous as symptoms of hitherto ungrasped structural regularity **Littell's Living Age**, 1885

Banks,2002-11-21 Banks defines and applies the concept of communications in a far broader context than previous historical studies of communication encompassing a range of human activity from sailing routes to mapping to presses to building roads and bridges He employs a comparative analysis of early modern French imperialism integrating three types of overseas possessions usually considered separately the settlement colony New France the tropical monoculture colony the French Windward Islands and the early Enlightenment planned colony Louisiana offering a work of synthesis that unites the historiographies and insights from three formerly separate historical literatures Banks challenges the very notion that a concrete empire emerged by the first half of the eighteenth century in fact French colonies remained largely isolated arenas of action and development Only with the contraction and concentration of overseas possessions after 1763 on the Plantation Complex did a more cohesive if fleeting French empire first emerge
