Spaulding,1995 Spaulding provides a full biography and a critical analysis of the work of the man who introduced the general public to photography as art **Rhetorical Landscapes in America** Gregory Clark,2021-11-24 A panoramic explanation of civic tourism and the shaping of a national identity At the same time a reading of Kenneth Burke and of tourist landscapes in America Gregory Clark s new study explores the rhetorical power connected with American tourism Looking specifically at a time when citizens of the United States first took to rail and then highway to become sightseers in their own country Clark traces the rhetorical function of a wide ranging set of tourist experiences He explores how the symbolic experiences Americans share as tourists have helped residents of a vast and diverse nation adopt a national identity In doing so he suggests that the rhetorical power of a national culture is wielded not only by public discourse but also by public experiences Clark examines places in the American landscape that have facilitated such experiences including New York City Shaker villages Yellowstone National Park the Lincoln Highway San Francisco s 1915 Panama Pacific International Exposition and the Grand Canyon He examines the rhetorical power of these sites to transform private individuals into public citizens and he evaluates a national culture that teaches Americans to experience certain places as potent symbols of national community Invoking Burke s concept of identification to explain such rhetorical encounters Clark considers Burke s lifelong study of symbols linguistic and otherwise and their place in the construction and transformation of individual identity Clark turns to Burke s work to expand our awareness of the rhetorical resources that lead individuals within a community to adopt a collective identity and he considers the implications of nineteenth and twentieth century tourism for both visual rhetoric and the rhetoric of display Lost Highways, Embodied Travels: The Road Movie in American Experimental Film and Video Kornelia Boczkowska,2023-02-06 Often identified as one of the most genuine and enduring American film genres the road movie has never been explored in the context of experimental filmmaking To fill this gap Lost Highways Embodied Travels provides the first book length study of over eighty unique and often obscure films and videos and situates them within the corporeal turn in American avant garde cinema so far mostly associated with body genres and sexually explicit films Drawing on unpublished archival materials the book offers a fresh take on both past and current practices of the experimental film community for scholars students makers and film buffs **Remembering Roadside America** John A. Jakle,Keith A. Sculle,2011-09-30 The use of cars and trucks over the past century has remade American geography pushing big cities ever outward toward suburbanization spurring the growth of some small towns while hastening the decline of others and spawning a new kind of commercial landscape marked by gas stations drive in restaurants motels tourist attractions and countless other retail entities that express our national love affair with the open road By its very nature this landscape is ever changing indeed ephemeral What is new quickly becomes old and is soon forgotten In this absorbing book John Jakle and Keith Sculle ponder how Roadside America might be remembered especially since so little physical evidence of its earliest years survives In straightforward and lively prose supplemented by copious illustrations historic and modern photographs

advertising postcards cartoons roadmaps they survey the ways in which automobility has transformed life in the United States Asking how we might best commemorate and preserve this part of our past which has been so vital economically and politically so significant to the cultural aspirations of ordinary Americans yet so often ignored by scholars who dismiss it as kitsch they propose the development of an actual outdoor museum that would treat seriously the themes of our roadside history Certainly museums have been created for frontier pioneering the rise of commercial agriculture and the coming of water and steam powered industrialization and transportation especially the railroad Is now not the time the authors ask for a museum forcefully exploring the automobile s emergence and the changes it has brought to place and landscape Such a museum need not deny the nostalgic appeal of roadsides past but if done properly it could also tell us much about what the authors describe as the most important kind of place yet devised in the American experience John A Jakle is Emeritus Professor of Geography at the University of Illinois Urbana Champaign Keith A Sculle is the former head of research and education at the Illinois Historic Preservation Agency They have coauthored such books as *America s Main Street Hotels Transiency and Community in the Early Automobile Age* *Motoring The Highway Experience in America* *Fast Food Roadside Restaurants in the Automobile Age* and *The Gas Station in America* *The Making of the American Landscape* Michael P. Driving While Black: African American Travel and the Road to Civil Rights Gretchen Sorin, 2020-02-11 Bloomberg Best Nonfiction Books of 2020 A tour de force. The basis of a major PBS documentary by Ric Burns, this excellent history *The New Yorker* reveals how the automobile fundamentally changed African American life. *Driving While Black* demonstrates that the car, the ultimate symbol of independence and possibility, has always held particular importance for African Americans, allowing black families to evade the dangers presented by an entrenched racist society and to enjoy in some measure the freedom of the open road. Melding new archival research with her family's story, Gretchen Sorin recovers a lost history, demonstrating how, when combined with black travel guides including the famous *Green Book*, the automobile encouraged a new way of resisting oppression.

Native American Landscapes Cheryl Claassen, 2024-01-12 This collection of essays focuses on what Cheryl Claassen terms the multi-vocal landscape: the idea that different groups and genders look upon the same natural features but perceive different meanings and potential in what they are seeing. Through ten chapters, various contributors showcase the ways in which native peoples see and interact with the natural world. At the heart of this book is the idea that Europeans associated nature with the feminine and saw the natural world as a passive frontier to be dominated. Native Americans, however, looked at landscape differently. They saw nature as a place in which to engage in complex negotiations between spirits and humans. This approach to nature cemented a relationship to the land based more on a partnership rather than subjugation. These essays deepen our understanding of the interaction between native people and the land. While other books focus on the gendered gaze of European men upon the landscape, this collection emphasizes that native men and native women looked upon natural formations and constructed landscapes differently from one another, a difference in perception that is important for archaeologists and anthropologists to understand. While there have been advances toward admitting this more complex view in the rest of the world, *Native American Landscapes* is the first to focus on how native men and women viewed the world around them. *Native American Landscapes* is organized by region, taking readers across the country from the rock shelters of the Cumberland Plateau in the east to the Mojave Desert and the Mexican Gulf Coast, then north to what is now British Columbia and farther west to Hawaii. Readers of this collection, through a study of creation myths, vision quests, fertility shrines, and other ritualized uses of landscape, will learn more about the land and about humans' perception of our
