The Colour of Angels Constance Classen, 2002-01-04 The Colour of Angels uncovers the gender politics behind our attitude to the senses Using a wide variety of examples ranging from the sensuous religious visions of the middle ages through to nineteenth century art movements this book reveals a previously unexplored area of women's history *The New Art of Color* Robert Delaunay, Sonia Delaunay, 1978 The Delaunays efforts to ensure that their work would be perceived as they had conceived it prompted several essays and lectures numerous letters and volumes of notebooks most of which have never been translated into English The light they shed on the life and thought of this exciting period in the history of art will be invaluable to any student of modern art **Visions of the Human** Tom Slevin, 2015-05-28 In what ways do the artistic avant garde's representations of the human body reflect the catastrophe of World War I The European modernists were inspired by developments in the nineteenth century yielding new forms of knowledge about the nature of reality and repositioning the human body as the new object of knowledge New visions of the human subject were created within this transformation However modernity's reactionary political climate for which World War I provided a catalyst transformed a once liberal ideal between humanity environment and technology into a tool of disciplinary rationalisation Visions of the Human considers the consequences of this historical moment for the twentieth and twenty first centuries It explores the ways in which the technologies of the self that inspired the avant garde were increasingly instrumentalised by conservative politics urbanism consumer capitalism and the society of the spectacle This is an engaging and powerful study which challenges prior ideas and explores new ways of thinking about modern visual culture Theories of Modern Art Herschel Browning Chipp, Herschel B. Chipp, Peter Selz, 1968 **Catching the Light** Arthur Zajonc, 1995 Examination of the fundamental nature of light in mankind's history world and life Color Codes Charles A. Riley (II.), Charles A. Riley, 1995 A multidisciplinary look at the role of color in contemporary aesthetics The Color of Modernism Deborah Ascher Barnstone, 2021-12-30 One of the most enduring and pervasive myths about modernist architecture is that it was white pure white walls both inside and out Yet nothing could be further from the truth The Color of Modernism explodes this myth of whiteness by offering a riot of color in modern architectural treatises polemics and buildings Focusing on Germany in the early 20th century one of modernism's most foundational and influential periods it examines the different scientific and artistic color theories which were advanced by members of the German avant garde from Bruno Taut to Walter Gropius to Hans Scharoun German color theory went on to have a profound influence on the modern movement and Germany serves as

the key case study for an international phenomenon which encompassed modern architects worldwide from le Corbusier and Alvar Aalto to Berthold Lubetkin and Lina Bo Bardi Supported by accessible introductions to the development of color theory in philosophy science and the arts the book uses the German case to explore the new ways in which color was used in architecture and urban design turning attention to an important yet overlooked aspect of the period Much more than a mere correction to the historical record the book leads the reader on an adventure into the color filled worlds of psychology the paranormal theories of sensory perception and pleasure showing how each in turn influenced the modern movement The Color of Modernism will fundamentally change the way the early modernist period is seen and discussed Modernist

Physics Rachel Crossland,2018-03-09 Modernist Physics takes as its focus the ideas associated with three scientific papers published by Albert Einstein in 1905 considering the dissemination of those ideas both within and beyond the scientific field and exploring the manifestation of similar ideas in the literary works of Virginia Woolf and D H Lawrence Drawing on Gillian Beer s suggestion that literature and science share the moment s discourse Modernist Physics seeks both to combine and to distinguish between the two standard approaches within the field of literature and science direct influence and the zeitgeist The book is divided into three parts each of which focuses on the ideas associated with one of Einstein s papers Part I considers Woolf in relation to Einstein s paper on light quanta arguing that questions of duality and complementarity had a wider cultural significance in the early twentieth century than has yet been acknowledged and suggesting that Woolf can usefully be considered a complementary rather than a dualistic writer Part II looks at Lawrence s reading of at least one book on relativity in 1921 and his subsequent suggestion in Fantasia of the Unconscious that we are in sad need of a theory of human relativity a theory which is shown to be relevant to Lawrence s writing of relationships both before and after 1921 Part III considers Woolf and Lawrence together alongside late nineteenth and early twentieth century discussions of molecular physics and crowd psychology suggesting that Einstein s work on Brownian motion provides a useful model for thinking about individual literary characters **Art of the 20th Century** Karl Ruhrberg,Klaus Honnef,Manfred
