Star Sociologists Philipp Korom,2023-04-21 This book aims to overcome sociology's preoccupation with individual authors by exploring a larger social phenomenon that occurs in all academic disciplines but has been paid little attention the prestige elite Members of this elite attain the highest levels of peer recognition their books sometimes circulate by the hundreds of thousands and every student has read about them Based on large citation studies Star Sociologists provides a roster of eminent sociologists documents the changing elite's composition over time contrasts the elite's career pathways with those of the Nobel Laureates in economics gives insights into how scholars rise to or fall from eminence and empirically probes the gatekeeping power of one of its key proponents The book explores eminence by contextualising conditions that are outside of the elite and argues that in any discipline that is intellectually as disintegrated as sociology eminence is to be understood as a nested phenomenon scholars make it into the elite if their ideas are adopted in very different intellectual fields that share little common ground

State Formation After Civil War Derek M Powell,2016-08-05 State formation after civil war offers a new model for studying the formation of the state in a national peace transition as an integrated national phenomenon Current models of peacebuilding and state building limit that possibility reproducing a fragmented selective view of this complex reality Placing too much emphasis on state building as design they place too little on understanding state formation as unplanned historical process The dominant focus on national institutions also ignores the role that cities and civic polities have played in constituting the modern state Mining ideas from many disciplines and evidence from 19 peace processes including South Africa the book argues that the starting point for building a systematic theory is to explain a distinct pattern to state formation that can be observed in practice Despite their conflicts people in fragile societies bargain terms for peaceful coexistence they make attempts to constitute the right to rule as valid state authority in circumstances prone to conflict over which they have imperfect influence not control Though the kind of institutions created will differ with context how rules for state authority are institutionalized follows a consistent basic pattern That pattern defines state formation in peace transitions as both a unified if contingent field of normative practice and an object of comparative study Where the national centric models see local government as a matter belonging to policy on decentralization for later in the reconstruction phase the book uncovers a distinct local government dimension to peace transitions A civic dimension to national conflicts that must be explained incipient or proto local authorities that emerge even during civil war in peace making after state collapse the fact that it is common for peace agreements and constitutions to include rules for local authority for local elections to be held as part of broader democratization and for laws to be enacted to establish local government as part of peace compacts The book develops the concept of local peace transition to explain the distinctive constitutive role of this local dimension in peace making and state formation This path breaking book will be of compelling interest to practitioners scholars and students of comparative constitutional studies international law peace building and state building

How Does Social Science Work? Paul Diesing, 1992-03-15 The culmination of a lifetime spent in a variety of fields sociology anthropology economics psychology and philosophy of science How Does Social Science Work takes an innovative sometimes iconoclastic look at social scientists at work in many disciplines It describes how they investigate and the kinds of truth they produce illuminating the weaknesses and dangers inherent in their research At once an analysis a critique and a synthesis this major study begins by surveying philosophical approaches to hermeneutics to examine the question of how social science ought to work It illustrates many of its arguments with untraditional examples such as the reception of the work of the political biographer Robert Caro to show the hermeneutical problems of ethnographers The major part of the book surveys sociological political and psychological studies of social science to get a rounded picture of how social science works Paul Diesling warns that social science exists between two opposite kinds of degeneration a value free professionalism that lives only for publications that show off the latest techniques and a deep social concern that uses science for propaganda He argues for greater self awareness and humility among social scientists although he notes that some social scientists will angrily reject the thought that their personality affects their research in any way This profound and sometimes witty book will appeal to students and practitioners in the social sciences who are ready to take a fresh look at their field An extensive bibliography provides a wealth of references across an array of social science disciplines
