Published on the occasion of the exhibition Robert Motherwell Black on May 4 June 15th 2018 The exhibition highlights the essential use of black in Motherwell's work both as an aesthetic development and as significant subject matter Essay contribution from Molly Moog **Robert Motherwell & Black** , 1981 *Robert Motherwell, Selected Prints, 1961-1974* Robert Motherwell, 1974 **The Story of Black** John Harvey, 2013-07-15 As a color black comes in no other shades it is a single hue with no variation one half of a dichotomy But what it symbolizes envelops the entire spectrum of meaning good and bad The Story of Black travels back to the biblical and classical eras to explore the ambiguous relationship the world's cultures have had with this sometimes accursed color examining how black has been used as a tool and a metaphor in a plethora of startling ways John Harvey delves into the color's problematic association with race observing how white Europeans exploited the negative associations people had with the color to enslave millions of black Africans He then looks at the many figurative meanings of black for instance the Greek word melancholia or black bile which defines our dark moods and the ancient Egyptians use of black as the color of death which led to it becoming the standard hue for funereal garb and the clothing of priests churches and cults Considering the innate austerity and gravity of black Harvey reveals how it also became the color of choice for the robes of merchants lawyers and monarchs before gaining popularity with eighteenth and nineteenth century dandies and with Goths and other subcultures today Finally he looks at how artists and designers have applied the color to their work from the earliest cave paintings to Caravaggio Rembrandt and Rothko Asking how a single color can at once embody death evil and glamour The Story of Black unearths the secret behind black's continuing power to compel and divide us **Robert Motherwell Et Black** , 1980 **Aberrant Nuptials** Paulo de Assis, Paolo Giudici , 2019-12-11 Unique focus on the relation between artistic research and the philosophy of Gilles Deleuze Aberrant Nuptials explores the diversity and richness of the interactions between artistic research and Deleuze studies Aberrant nuptials is the expression Gilles Deleuze uses to refer to productive encounters between systems characterised by fundamental difference More than imitation representation or reproduction these encounters foster creative flows of energy generating new material configurations and intensive experiences Within different understandings of artistic research the contributors to this book architects composers film makers painters performers philosophers sculptors and writers map current practices at the intersection between music art and philosophy contributing to an expansion of horizons and methodologies Written by established Deleuze scholars who have been working on interferences between art and philosophy and by musicians and artists who have been reflecting Deleuzian and Post Deleuzian discourses in their artworks this volume reflects the current

relevance of artistic research and Deleuze studies for the arts *Starry Speculative Corpse* Eugene Thacker,2015-04-24

Could it be that the more we know about the world the less we understand it Could it be that while everything has been explained nothing has meaning Extending the ideas presented in his book *In The Dust of This Planet* Eugene Thacker explores these and other issues in *Starry Speculative Corpse* But instead of using philosophy to define or to explain the horror genre Thacker reads works of philosophy as if they were horror stories themselves revealing a rift between human beings and the unhuman world of which they are part Along the way we see philosophers grappling with demons struggling with doubt and wrestling with an indifferent cosmos At the center of it all is the philosophical drama of the human being confronting its own limits Not a philosophy of horror but a horror of philosophy Thought that stumbles over itself as if at the edge of an abyss *Starry Speculative Corpse* is the second volume of the *Horror of Philosophy* trilogy together with the first volume *In The Dust of This Planet* and the third volume *Tentacles Longer Than Night* *The Black Cultural Front* Brian Dolinar,2012-04-27 This book examines the formation of a black cultural front by looking at the works of poet Langston Hughes novelist Chester Himes and cartoonist Ollie Harrington While none of these writers were card carrying members of the Communist Party they all participated in the Left during their careers Interestingly they all turned to creating popular culture in order to reach the black masses who were captivated by movies radio newspapers and detective novels There are chapters on Hughes s Simple stories Himes s detective fiction and Harrington s Bootsie cartoons Collectively the experience of these three figures contributes to the story of a long movement for African American freedom that flourished during the 1930s 1940s and 1950s Yet this book also stresses the impact that McCarthyism had on dismantling the Black Left and how it affected each individual involved Each was radicalized at a different moment and for different reasons **New York Modern** William B. Scott,Peter M. Rutkoff,1999 Handsomely illustrated and engagingly written New York Modern documents the impressive collective legacy of New York s artists in capturing the energy and emotions of the urban experience *The World According to Colour* James Fox,2021-10-07 Extraordinary An intellectual feast as well as a visual one Edmund de Waal author of *The Hare with Amber Eyes* The world comes to us in colour But colour lives as much in our imaginations as it does in our surroundings as this scintillating book reveals Each chapter immerses the reader in a single colour drawing together stories from the histories of art and humanity to illuminate the meanings it has been given over the eras and around the globe Showing how artists scientists writers philosophers explorers and inventors have both shaped and been shaped by these wonderfully myriad meanings James Fox reveals how through colour we can better understand their cultures as well as our own Each colour offers a fresh perspective on a different epoch and together they form a vivid exhilarating history of the world We have projected our hopes anxieties and obsessions onto colour for thousands of years Fox writes The history of colour therefore is also a history of humanity [Smith Collects Contemporary](#) ,1991 [The New York Times Presents Smarter by Sunday](#) The New York Times,2010-10-26 A handy smaller and more focused version of our

Symbolism, Its Origins and Its Consequences Rosina Neginsky, 2010-08-11 The notion of the symbol is at the root of the Symbolist movement but this symbol is different from the way it was used and understood in the Middle Ages and Renaissance In the Symbolist movement a symbol is not an allegory The Belgian writer Maurice Maeterlinck defined its essence in an article that appeared on April 24 1887 in *L'Art moderne* He wrote that the notion of a symbol in the Symbolist movement is the opposite of the notion of the symbol in classical usage instead of going from the abstract to the concrete Venus incarnated in the statue represents love it goes from the concrete to the abstract from what is seen heard felt tasted and sensed to the evocation of the idea This volume attempts to give a glimpse into the power of the Symbolist movement and the nature of its fundamental and interdisciplinary role in the evolution of art and literature of the twentieth century It records the studies of a group of scholars who met and discussed these topics together for the first time in 2009 While illuminating the specificity of Symbolism in art architecture and literature in different European countries these articles also demonstrate the crucial role of French Symbolism in the development of the international Symbolist movement The authors hope that an expanding group a society of Art Literature and Music in Symbolism and Decadence ALMSD born out of the first meeting will continue to further this discussion at future conferences and in the printed conference proceedings

Diasporic Women's Writing of the Black Atlantic Emilia María Durán-Almaraz, Esther Álvarez López, 2013-10-30 This book brings together a complete set of approaches to works by female authors that articulate the black Atlantic in relation to the interplay of race class and gender The chapters provide the grounds to engender a more complex understanding of the scattered geographies of the African diaspora in the Atlantic basin The variety of approaches displayed bears witness to the vitality of a field that over the years has become a diasporic formation itself as it incorporates critical insights and theoretical frameworks from multiple disciplines in the social sciences and the humanities thus exposing the manifold character of black diasporic interconnections within and beyond the Atlantic Focusing on a wide array of contemporary literary and performance texts by women writers

and performers from diverse locations including the Caribbean Canada Africa the US and the UK chapters visit genres such as performance art the novel science fiction short stories and music For these purposes the volume is organized around two significant dimensions of diasporas on the one hand the material corporeal and spatial locations where those displacements associated with travel and exile occur and on the other the fluid environments and networks that connect distant places cultures and times This collection explores the ways in which women of African descent shape the cultures and histories in the modern colonial and postcolonial Atlantic worlds *The Grove Encyclopedia of American Art* Joan M. Marter, 2011

Arranged in alphabetical order these 5 volumes encompass the history of the cultural development of America with over 2300 entries
