Conrad Kain Zac Robinson, 2021-12-08 Examine the life of the pioneering guide in these 144 letters sharing his thoughts on immigrating to Canada his passion for nature his travels and more Conrad Kain is a titan amongst climbers in Canada and is well known in mountaineering circles all over the world His letters to Amelie Malek a life long friend offer a candid view into the deepest thoughts of the Austrian mountain guide and are a perfect complement to his autobiography Where the Clouds Can Go The 144 letters provide a unique and personal view of what it meant to immigrate to Canada in the early part of the twentieth century Kain's letters are ordered chronologically with annotations keeping the sections in English untouched while those in German have been carefully translated Historians and mountain culture enthusiasts worldwide will

appreciate Kain's genius for description his passion for nature his opinions and his musings about his life In a culture that enjoys as many romantic figures as there are mountain peaks on the horizon as viewed from a lofty summit Conrad Kain holds a special place in the historical landscape of western Canada's mountains Robinson makes no secret of his affection for Kain and that's a good thing because he handles the letters Kain wrote throughout his adult life while guiding in Canada and New Zealand to his dear friend in Austria Amelie Malek with the care and reverence they so richly deserve Lynn Martel Alpine Club of Canada Gazette From his letters it's obvious that Kain loved climbing mountains for the physical challenge to meet interesting people to make a living and for opportunities to travel around the world but most especially because of his all consuming love of the natural world Cyndi M Smith The Canadian Field Naturalist Vol 129 No 1 [Race for the South Pole](#) Roland Huntford,2010-12-02 **Four Points of the Compass** Jerry Brotton,2024-11-12 From the New York Times bestselling author of A History of the World in 12 Maps this is the revelatory history of the four cardinal directions that have oriented and defined our place on the globe for millennia North south east and west almost all societies use these four cardinal directions to orientate themselves and to understand who they are by projecting where they are For millennia these four directions have been foundational to our travel navigation and exploration and are central to the imaginative moral and political geography of virtually every culture in the world Yet they are far more subjective and sometimes contradictory than we might realize Four Points of the Compass leads us on a journey of directional discovery Societies have understood and defined directions in very different ways based on their locations in time and space Historian Jerry Brotton reveals why Hebrew culture privileges east why Renaissance Europeans began drawing north at the top of their maps why early Islam revered the south why the Aztecs used five color coded cardinal directions and why no societies primitive or modern have ever orientated themselves westwards In doing so politically loaded but widely used terms such as the Middle East the Global South the West Indies the Orient and even the western world take on new meanings Who decided on these terms and what do they mean for geopolitics How have directions like east and west taken on the status of cultural identities or more accurately stereotypes Yet today because of GPS capability cardinal points are less relevant Online we place ourselves at the center of the map as little blue dots moving across geospatial apps we have become the most important compass point though in the process we've disconnected ourselves from the natural world Imagining what future changes technology may impose Jerry Brotton skillfully reminds us how crucial the four cardinal directions have been to everyone who has ever walked our planet For anyone interested in history geography or surprising new ways to think about the world at large Four Points of the Compass will be a stimulating experience *Photography and Exploration* James R. Ryan,2013-07-15 When Ferdinand Magellan set out to circumnavigate the globe in 1519 he wasn't able to bring a digital camera or a smartphone with him Yet as the eagerly awaited images from the Mars rover prove modern exploration is inconceivable without photography Since its invention in 1839 photography has been integral to exploration used by explorers sponsors and

publishers alike and the early twentieth century advances in technology and photography's newfound cultural currency as a truthful witness to the world made the camera an indispensable tool. In *Photography and Exploration* James R. Ryan uses a variety of examples from polar journeys to space missions to show how exploration photographs have been created, circulated, and consumed as objects of both scientific research and art. Examining a wide range of photographs and expeditions, Ryan considers how nations have often employed images as a means to scientific advancement or territorial conquest. He argues that because exploration has long been bound up with the construction of national and imperial identity, expeditionary photographs have often been used to promote claims to power, especially by the West. These images also challenge the way audiences perceive the world and their place within it. Featuring one hundred images, *Photography and Exploration* shines new light on how photography has shaped the image of explorers, expeditions, and the worlds they discovered.
