Phonopoetics Jason Camlot,2019-06-11 Phonopoetics tells the neglected story of early talking records and their significance for literature from the 1877 invention of the phonograph to some of the first recorded performances of modernist works The book challenges assumptions of much contemporary criticism by taking the recorded oral performance as its primary object of analysis and by exploring the historically specific convergences between audio recording technologies media formats generic forms and the institutions and practices surrounding the literary Opening with an argument that the earliest spoken recordings were a mediated extension of Victorian reading and elocutionary culture Jason Camlot explains the literary significance of these pre tape era voice artifacts by analyzing early promotional fantasies about the phonograph as a new kind of speaker and detailing initiatives to deploy it as a pedagogical tool to heighten literary experience Through historically grounded interpretations of Dickens impersonators to recitations of Tennyson to T S Eliot s experimental readings of The Waste Land and of a great variety of voices and media in between this first critical history of the earliest literary sound recordings offers an unusual perspective on the transition from the Victorian to modern periods and sheds new light on our own digitally mediated relationship to the past

Bottomley,2020-06-01 In talking about contemporary media we often use a language of newness applying words like revolution and disruption Yet the emergence of new sound media technologies and content from the earliest internet radio broadcasts to the development of algorithmic music services and the origins of podcasting are not a disruption but a continuation of the century long history of radio Today s most innovative media makers are reintroducing forms of audio storytelling from radio s past Sound Streams is the first book to historicize radio internet convergence from the early 90s through the present demonstrating how so called new media represent an evolutionary shift that is nevertheless historically consistent with earlier modes of broadcasting Various iterations of internet radio from streaming audio to podcasting are all new radio practices rather than each being a separate new medium radio is any sound media that is purposefully crafted to be heard by an audience Rather than a particular set of technologies or textual conventions web based broadcasting combines unique practices and features and ideas from radio history In addition there exists a distinctive conversationality and reflexivity to radio talk including a propensity for personal stories and emotional disclosure that suits networked digital media culture What media convergence has done is extend and intensify radio s logics of connectivity and sharing sonically

mediated personal expression intended for public consideration abounds in online media networks Sound Streams marks a significant contribution to digital media and internet studies Its mix of cultural history industry research and genre and formal analysis especially of contemporary audio storytelling will appeal to media scholars radio and podcast practitioners audio journalism students and dedicated podcast fans Subject Collections Lee Ash,William Gerald Miller,1993
