Robert H Goddard Pioneer Of Space Research:

Robert H. Goddard Milton Lehman,1988-08-21 Dr. Robert H. Goddard Doug West,2017-06-03 Dr Robert Goddard was the first scientist who not only realized the potential for rockets for space flight but also contributed directly in making them a reality His rare talent in both creative science and practical engineering placed Goddard well above the European rocket pioneers The dedicated research and experimentation into the development of rockets by the modest man went largely unrecognized in the United States until the dawn of the space age Richly deserved honor now comes to the name of Robert H Goddard and his amazing story **Dr. Robert H. Goddard** Doug West,2017 Dr Robert Goddard was the first scientist who not only realized the potential for rockets for space flight but also contributed directly in making them a reality His rare talent in both creative science and practical engineering placed Goddard well above the European rocket pioneers The dedicated research and experimentation into the development of rockets by the modest man went largely unrecognized in the United States until the dawn of the space age Richly deserved honor now comes to the name of Robert H Goddard and his amazing story **Rocket Man** David A. Clary,2004-08-11 Now in paperback the life and legacy of the much overlooked yet highly influential Robert Goddard the brilliant eccentric and controversial pioneer of the space age More famous in his day than Einstein or Edison the troubled solitary genius Robert H Goddard was the American father of rocketry and space flight launching the world s first liquid fuel rockets and the first powered vehicles to break the sound barrier Supported by Charles Lindbergh and Harry Guggenheim he devised the methods that carried men to the moon Today no rocket or jet plane can fly without his inventions Yet Goddard is the forgotten man of the Space Age After the Germans launched the V 2 missiles of World War II the American government usurped his 214 patents and suppressed his contributions in the name of national security until it was forced to pay one million dollars for patent infringement Goddard became famous again monuments and medals raining upon his memory But his renewed fame soon faded and Goddard s pivotal role in launching the Space Age has been largely forgotten until now **Robert H. Goddard** ,1989 **The Development of Propulsion Technology for U.S. Space-Launch Vehicles, 1926-1991** J. D. Hunley,2013-03-15 In this definitive study J D Hunley traces the program s development from Goddard s early rockets and the German V 2 missile through the Titan IVA and the Space Shuttle with a focus on space launch vehicles Since these rockets often evolved from early missiles he pays considerable attention to missile technology not as an end in itself but as a contributor to launch vehicle technology Focusing especially on the engineering culture of the program Hunley communicates this very human side of technological development by means of anecdotes character sketches and case studies of problems faced by rocket engineers He shows how such a highly adaptive approach enabled the evolution of a hugely complicated technology that was impressive but decidedly not rocket science Unique in its single volume coverage of the evolution of launch vehicle technology from 1926 to 1991 this meticulously researched work will inform scholars and engineers interested in the history of technology and innovation as well as those specializing in the
