Robert Ryman Robert Ryman,Peter Blum Gallery,2004 The works in this exhibition catalogue record the time when Robert Ryman then in his early twenties was formulating his disciplined approach to painting On off white and translucent materials including wallpaper a circular coffee filter newsprint and mylar Ryman drew tooled brushed and pressed his marks using a flat table to support the work His decision to use the square as a consistent format for non narrative work was set and while he sporadically used color in these earliest works he subsequently chose white almost exclusively in the process of eliminating all that was superfluous to a painting

**Fine Art and Perceptual Neuroscience** Paul

Hackett, 2014-01-10 Over the past decade the integration of psychology and fine art has sparked growing academic interest among researchers of these disciplines. The author both a psychologist and artist offers up a unique merger and perspective of these fields. Through the production of fine art which is directly informed by neuroscientific and optical processes this volume aims to fill a gap in the literature and understanding of the creation and perception of the grid image created as a work of art. The grid image is employed for reasons discussed in the text to illustrate more general processes associated with the integration of vision, visual distortion and painting. Existing at the intersection of perceptual neuroscience, psychology, fine art and art history this volume concerns the act of painting and the process of looking. More specifically the book examines vision and the effects of visual impairment and how these can be interpreted through painting within a theoretical framework of visual neuroscience.
