This volume addresses communication and its roles in the problems and prospects of community and is intended for scholars in communication, cultural studies and social psychology. *Mechanisms of Democracy* Adrian Vermeule, 2007-07-24

What institutional arrangements should a well functioning constitutional democracy have? Most of the relevant literatures in law, political science, political theory and economics address this question by discussing institutional design writ large. In this book, Adrian Vermeule moves beyond these debates, changing the focus to institutional design writ small. In established constitutional polities, Vermeule argues that law can and should and to some extent already does provide mechanisms of democracy: a repertoire of small scale institutional devices and innovations that can have surprisingly large effects promoting democratic values of impartial, accountable and deliberative government. Examples include legal rules that promote impartiality by depriving officials of the information they need to act in self interested ways; voting rules that create the right kind and amount of accountability for political officials and judges; and legislative rules that structure deliberation in part by adjusting the conditions under which deliberation occurs transparently or instead secretly. Drawing upon a range of social science tools from economics, political science and other disciplines, Vermeule carefully describes the mechanisms of democracy and indicates the conditions under which they can succeed. **The Parliamentarian of Tomorrow** Gene Bierbaum, 2010-08-02

Parliamentarians are by definition experts in meeting procedures. They are knowledgeable in the application of Robert's Rules of Order as well as other lesser known authorities. They draft bylaws, assist with elections, help members write motions, draft scripts for running meetings and assist the president while the meeting is in progress. They are little known outside the profession because their work is done behind the scenes. The American Institute of Parliamentarians (AIP) and the National Association of Parliamentarians (NAP) have done much to bind the professional membership together. Each association has a quarterly publication featuring scholarly articles in the field, a testing and credentialing program, a continuing education program and a referral service for professionals. The two associations also offer a wide variety of workshops and seminars annually throughout the country. Correspondence courses are available for those who have difficulty

traveling Members of the parliamentary profession are not licensed and there is no degree requirement for entering the profession Members enter the profession from many different disciplines with sharply different backgrounds of educational achievement Yet they do share certain characteristics in common that bring them together as members of a profession The purpose of this book is to explore and describe the key attributes of today's parliamentary profession What are the building blocks that comprise its foundation How have these building blocks interacted to produce The Parliamentarian of Today and what trends do they reveal that will shape The Parliamentarian of Tomorrow Aspiring parliamentarians as well as seasoned professionals in the field will find this helpful in understanding their profession where it is headed and how they can adjust to accommodate the future demands of client organizations
