The British Journal of Experimental Pathology, 1928 *River Rough, River Smooth* Anthony Dalton, 2010-01-11 Manitoba's Hayes River runs over six hundred kilometers from near Norway House to Hudson Bay On its rush to the sea the Hayes races over forty five rapids and waterfalls as it drops down from the Precambrian Shield to the Hudson Bay Lowlands This great waterway the largest naturally flowing river in Manitoba served as the highway for settlers bound for the Red River colony ferrying their worldly goods in York boats and canoes struggling against the mighty currents Traditionally used for transport and hunting by the indigenous Cree the Hayes became a major fur trade route in the seventeenth to nineteenth centuries being explored by such luminaries Pierre Radisson 1682 Henry Kelsey 1690 David Thompson 1784 Sir John Franklin 1819 and J B Tyrrell 1892 This is the account of the author's invitational journey on the Hayes from Norway House to Oxford House by traditional York boat with a crew of First Nation Cree and later from Oxford House to York Factory by canoe in the company of other intrepid canoeists modern day voyageurs reliving the past

Developing Language Concepts Bridget Burrows, 2017-07-05 This book is a valuable resource for all speech language therapists teachers and support assistants working with children in schools and community clinics It provides practical step by step photocopiable programmes to help with specific language concepts such as amount colour size time and shape The programmes are intended for speech language therapists to copy and send to the school where staff can deliver the programmes although they can be used by the therapist themselves Clearly set out the exercises can be personalised for each child and are graded so that the therapist can select and copy the sheets relevant to the child's needs Each programme introduces the concept teaches it and then checks to see if the child understands it There is also practical advice on setting up therapy programmes in schools such as setting up appointments working in the school with children staff and parents covering letters to send with the programme how to write programmes and many other useful tips

The World of Touch David Katz, 2013-05-13 For the first time David Katz's classic monograph *The World of Touch* has been translated into English Regarded as one of the premiere experimental psychologists Katz vigorously opposed the atomism and tachistoscopic mentality typical of the sensory psychology of his day In *The World of Touch* Katz sought to dispel the invidious distinction between the supposedly higher e.g. vision audition and lower e.g. touch senses To help touch regain its original prominence in the field Katz demonstrated through very simple yet creative experiments how fascinating the abilities of touch are and how valuable the tactual stimulus can be in specifying objects surfaces substances and events In addition

Katz emphasized the importance of higher order invariants in the perception of objects and the holistic quality of perception in time as well as space **Journal of Agricultural Research** ,1932 *General Information Series* ,1884

Microscopic re examination of geomaterials consisting of aggregates can shed light on macroscopic behaviour including compressibility anisotropy yielding creep cyclic liquefaction and shear rupture As a result of this process of examination new methods of material characterization emerge leading to a greater degree of accuracy in the specification of new constitutive models with physically meaningful parameters The impetus behind this development is an increasing awareness on sustainability leading to the more efficient use of recycled materials for geotechnical applications The characteristics of recycled materials such as compressibility and self hardening may differ significantly from those of natural materials and it is crucial that evaluation is made from a specifically particulate perspective Ezra Pound and the Appropriation of Chinese Poetry Ming Xie,2021-12-12 First published in 1999 The subject of this book is the translation and appropriation of Chinese poetry by some English and American writers in the early decades of this century The author explores the be concerned as much with English translation of Chinese poetry per se as with the relationship between this body of translation from the Chinese and the developing poetics and practices of what is usually referred to as Imagism as much with the question of historical influence or ascription as with certain interpretive and critical aspects of this correlative relationship Focusing on the direct influence of Chinese poetry upon the theory and practice of Imagism attributing to Imagist poets in general and Ezra Pound in particular the perception in Chinese poetry of the essential qualities and principles for rejuvenating English poetry in the early decades of the century *Bulletin* ,1910 **The Strand Magazine** ,1922 **Human Hand Function**

Lynette A. Jones,Susan J. Lederman,2006-04-20 Human Hand Function is a multidisciplinary book that reviews the sensory and motor aspects of normal hand function from both neurophysiological and behavioral perspectives Lynette Jones and Susan Lederman present hand function as a continuum ranging from activities that are essentially sensory in nature to those that have a strong motor component They delineate four categories of function along this sensorimotor continuum tactile sensing active haptic sensing prehension and non prehensile skilled movements that they use as a framework for analyzing and synthesizing the results from a broad range of studies that have contributed to our understanding of how the normal human hand functions The book begins with a historical overview of research on the hand and a discussion of the hand s evolutionary development in terms of anatomical structure The subsequent chapters review the research in each of the four categories along the continuum covering topics such as the intensive spatial temporal and thermal sensitivity of the hand the role of hand movements in recognizing common objects the control of reaching and grasping movements and the organization of keyboard skills Jones and Lederman also examine how sensory and motor function develops in the hand from

birth to old age and how the nature of the end effector e.g. a single finger or the whole hand that is used to interact with the environment influences the types of information obtained and the tasks performed The book closes with an assessment of how basic research on the hand has contributed to an array of more applied domains including communication systems for the blind haptic interfaces used in teleoperation and virtual environment applications tests used to assess hand impairments and haptic exploration in art Human Hand Function will be a valuable resource for student and professional researchers in neuroscience cognitive psychology engineering human technology interaction and physiology *House Documents, Otherwise Publ. as Executive Documents* United States.
