Gender and Culture at the Limit of Rights Dorothy L. Hodgson,2011-05-17 An interdisciplinary collection Gender and Culture at the Limit of Rights examines the potential and limitations of the women s rights as human rights framework as a strategy for seeking gender justice Drawing on detailed case studies from the United States Africa Latin America Asia and

elsewhere contributors to the volume explore the specific social histories political struggles cultural assumptions and gender ideologies that have produced certain rights or reframed long standing debates in the language of rights The essays address the gender specific ways in which rights based protocols have been analyzed deployed and legislated in the past and the present and the implications for women and men adults and children in various social and geographical locations Questions addressed include What are the gendered assumptions and effects of the dominance of rights based discourses for claims to social justice What kinds of opportunities and limitations does such a culture of rights provide to seekers of justice whether individuals or collectives and how are these gendered How and why do female bodies often become the site of contention in contexts pitting cultural against juridical perspectives The contributors speak to central issues in current scholarly and policy debates about gender culture and human rights from comparative disciplinary historical and geographical perspectives By taking gender rather than just women seriously as a category of analysis the chapters suggest that the very sources of the power of human rights discourses specifically women s rights as human rights discourses to produce social change are also the sources of its limitations

Women and Dictionary-Making Lindsay Rose Russell,2018-04-30 Dictionaries are a powerful genre perceived as authoritative and objective records of the language impervious to personal bias But who makes dictionaries shapes both how they are constructed and how they are used Tracing the craft of dictionary making from the fifteenth century to the present day this book explores the vital but little known significance of women and gender in the creation of English language dictionaries Women worked as dictionary patrons collaborators readers compilers and critics while gender ideologies served at turns to prevent secure and veil women s involvements and innovations in dictionary making Combining historical rhetorical and feminist methods this is a monumental recovery of six centuries of women s participation in dictionary making and a robust investigation of how the social life of the genre is influenced by the social expectations of gender Mixed Media Simone Murray,2004-02-20 The feminist press movement transformed the publishing industry literary culture and educational curricula during the last quarter of the 20th century This book is both a survey of the movement internationally and a detailed critique of its long term impact Feminist presses are described as mixed media always attempting to balance politics with profit making Using a series of detailed case studies Simone Murray highlights the specific debates through which this dilemma plays out the nature of independence the politics of race feminist publishing and the academy radical writing and publishing practice and feminism s interface with mainstream publishing Transforming the future Miller, Riel,2018-07-09 People are using the future to search for better ways to achieve sustainability inclusiveness prosperity well being and peace In addition the way the future is understood and used is changing in almost all domains from social science to daily life This book presents the results of significant research undertaken by UNESCO with a number of partners to detect and define the theory and practice of anticipation around the world today It uses the concept of Futures Literacy as a

tool to define the understanding of anticipatory systems and processes also known as the Discipline of Anticipation This innovative title explores new topics such as Futures Literacy and the Discipline of Anticipation the evidence collected from over 30 Futures Literacy Laboratories and presented in 14 full case studies the need and opportunity for significant innovation in human decision making systems This book will be of great interest to scholars researchers policy makers and students as well as activists working on sustainability issues and innovation future studies and anticipation studies

Research Within the Disciplines Peggy Keeran, 2007 Research lies at the heart of all academic disciplines Research Within the Disciplines Foundations for Reference and Library Instruction is an expansion of that concept The book provides an overview of research practices and literacy standards in the various disciplines humanities music social sciences business government publications engineering and sciences to help shape library instruction and reference assistance Conceived and developed by the reference librarians at the University of Denver the book grew out of team discussions about teaching research and writing within the disciplines The book's main objective is to provide a degree of orientation toward conducting research within specific disciplines and across others The volume includes separate chapters on the broad disciplines covered in undergraduate education as well as concluding chapters addressing interdisciplinary research and the role of instruction as a means of developing effective researchers The continued necessity of understanding the foundations of research whether within the physical library or via the electronic environment remains an underlying concern and the advice put forth by this team of practicing academic librarians is an important step to achieving this goal

Mental Health and Human Rights Michael Dudley, Derrick Silove, Fran Gale, 2012-06-21 Mental disorders are ubiquitous profoundly disabling and people suffering from them frequently endure the worst conditions of life In recent decades both mental health and human rights have emerged as areas of practice inquiry national policy making and shared international concern Human rights monitoring and reporting are core features of public administration in most countries and human rights law has burgeoned Mental health also enjoys a new dignity in scholarship international discussions and programs mass media coverage and political debate Today's experts insist that it impacts on every aspect of health and human well being and so becomes essential to achieving human rights It is remarkable however that the struggle for human rights over the past two centuries largely bypassed the plight of those with mental disabilities Mental health is frequently absent from routine health and social policy making and research and from many global health initiatives for example the Millennium Development Goals Yet the impact of mental disorder is profound not least when combined with poverty mass trauma and social disruption as in many poorer countries Stigma is widespread and mental disorders frequently go unnoticed and untreated Even in settings where mental health has attracted attention and services have undergone reform resources are typically scarce inequitably distributed and inefficiently deployed Social inclusion of those with psychosocial disabilities languishes as a distant ideal In practice therefore the international community still tends to prioritise human rights while largely ignoring mental health

which remains in the shadow of physical health programs Yet not only do persons with mental disorders suffer deprivations of human rights but violations of human rights are now recognized as a major cause of mental disorder a pattern that indicates how inextricably linked are the two domains This volume offers the first attempt at a comprehensive survey of the key aspects of this interrelationship It examines the crucial relationships and histories of mental health and human rights and their interconnections with law culture ethnicity class economics neuro biology and stigma It investigates the responsibilities of states in securing the rights of those with mental disabilities the predicaments of vulnerable groups and the challenge of promoting and protecting mental health In this wide ranging analysis many themes recur for example the enormous mental health burdens caused by war and social conflicts the need to include mental health interventions in humanitarian programs in a manner that does not undermine traditional healing and recovery processes of indigenous peoples and the imperative to reduce gender based violence and inequities It particularly focuses on the first person narratives of mental health consumers their families and carers the collective voices that invite a major shift in vision and praxis The book will be valuable for mental health and helping professionals lawyers philosophers human rights workers and their organisations the UN and other international agencies social scientists representatives of government teachers religious professionals researchers and policy makers
