## **Royal Navy And Maritime Power In The Twentieth Century:**

**The Royal Navy and Maritime Power in the Twentieth Century** Ian Speller, 2004-08-02 This book adopts an innovative new approach to examine the role of maritime power and the utility of navies. It uses a number of case studies based upon key Royal Navy operations in the twentieth century to draw out enduring principles about maritime power and to examine the strengths and limitations of maritime forces as instruments of national policy. Individual chapters focus on campaigns and operations from both World Wars and a series of post 1945 crises and conflicts from the Palestine Patrol in the 1940s to Royal Navy operations in support of British policy in the 1990s. Each case study demonstrates critical features of maritime power including operations during the transition to war, fleet operations in narrow seas, logistics, submarine operations, the impact of air power on maritime operations, blockade, maritime power projection, amphibious warfare, jurisdictional disputes and the law of the sea and peace support operations. The contributors to this book all have considerable experience lecturing on these issues at the United Kingdom Joint Services Command and Staff College where maritime campaign analysis is used to teach the principles of maritime power to officers of the Royal Navy. The book combines an authoritative examination of critical Royal Navy operations during the twentieth century with a sophisticated analysis of the nature of maritime power. As such, it is of both historical interest and contemporary relevance and will prove equally valuable to academic historians, military professionals and the general reader.

**Anti-Submarine Warfare in World War I** John Abbatiello, 2006-05-02 Investigating the employment of British aircraft against German submarines during the final years of the First World War this new book places anti submarine campaigns from the air in the wider history of the First World War The Royal Naval Air Service invested heavily in aircraft of all types aeroplanes seaplanes airships and kite balloons in order to counter the German U boats Under the Royal Air Force the air campaign against U boats continued uninterrupted Aircraft bombed German U boat bases in Flanders conducted area and hunting patrols around the coasts of Britain and escorted merchant convoys to safety Despite the fact that aircraft acting alone destroyed only one U boat during the war the overall contribution of naval aviation to foiling U boat attacks was significant Only five merchant vessels succumbed to submarine attack when convoyed by a combined air and surface escort during World War I This book examines aircraft and weapons technology aircrew training and the aircraft production issues that shaped this campaign Then a close examination of anti submarine operations bombing patrols and escort yields a significantly different judgment from existing interpretations of these operations This study is the first to take an objective look at the writing and publication of the naval and air official histories as they told the story of naval aviation during the Great War The author also examines the German view of aircraft effectiveness through German actions prisoner interrogations official histories and memoirs to provide a comparative judgment The conclusion closes with a brief narrative of post war air anti submarine developments and a summary of findings Overall the author concludes that despite the challenges of organization training and production the employment of aircraft against U boats was largely successful during the Great War This book will be of interest to historians of naval and air power history as well as students of World War I and military history in general

and its increasing importance in the world's political economic and strategic future. Most coverage focusses solely on the navies of the big four: the US, China, India and Japan; however, the region's other navies, though much smaller, are significant too. Given the current focus on the South China Sea and the Obama administration's pivot to Asia, naval development in South East Asia is of particular relevance. This book first identifies the issues involved in defence acquisition in this area. It then goes on to establish some templates of naval modernisation as a means of assessing the policies of individual countries in the region by looking at the naval policies of the big four. Finally, the general issue of naval modernisation in South East Asia is illustrated through a more detailed examination of some of the major issues common to all countries of the area. These include the defence industrial perspective, specific examinations of submarine and surface ship acquisition processes and a review of the balance to be struck between naval and coastguard forces in the area. This book will be of much interest to students of naval power, maritime security, South East Asian politics, strategic studies and IR in general.

**Imperial Defence** Greg Kennedy, 2007-11-21. This new collection of essays from leading British and Canadian scholars presents an excellent insight into the strategic thinking of the British Empire. It defines the main areas of the strategic decision-making process that was known as Imperial Defence. The theme is one of imperial defence and defence of empire, so chapters will be historiographical in nature, discussing the major features of each key component of imperial defence, areas of agreement and disagreement in the existing literature, on critical interpretations, introducing key individuals and positions, and commenting on the appropriateness of existing studies as well as identifying a raft of new directions for future research.

**Strangling the Axis** Richard Hammond, 2020-06-25. This is a major reassessment of the causes of Allied victory in the Second World War in the Mediterranean region. Drawing on a unique range of multinational source material, Richard Hammond demonstrates how the Allies' ability to gain control of the key routes across the sea and sink large quantities of enemy shipping denied the Axis forces in North Africa crucial supplies and proved vital to securing ultimate victory there. Furthermore, the sheer scale of attrition to Axis shipping outstripped their industrial capacity to compensate, leading to the collapse of the Axis position across key territories maintained by seaborne supply, such as Sardinia, Corsica and the Aegean islands. As such, Hammond demonstrates how the anti-shipping campaign in the Mediterranean was the fulcrum about which strategy in the theatre pivoted and the vital enabling factor ultimately leading to Allied victory in the region.

*The Royal Navy in the Cold War Years, 1966-1990* Edward Hampshire, 2024-07-30. During the period covered by this new book, the Royal Navy faced some of its greatest challenges, both at sea, confronting the increasingly capable and impressive Soviet Navy, and on shore, when it faced policy crises that threatened the survival of much of the fleet. During this remarkable period, the Navy had rarely been so focussed on a single theater of war, the Eastern Atlantic, but also rarely so politically vulnerable. The author sets out to analyze shadowing operations and confrontations at sea with Soviet ships and submarines, the Navy's role in the enormous NATO and Warsaw Pact naval exercises that acted out potential war scenarios, individual operations from the Falklands and

the 1990 91 Gulf War to the Beira and Armilla patrols the development of advanced naval technologies to counter Soviet capabilities policy making controversies as the three services fought for resources including the controversial 1981 Nott defense review and what life was like in the Cold War navy for ratings and officers The book the first to cover this subject in depth for more than thirty years will make use of the full range of archival sources that have been publicly available over the last two decades but of which little use has been made by historians This work is destined to become a definitive naval history of the period and also provide a fascinating and gripping narrative of a navy under threat from many directions but which survived and eventually prospered winning a remarkable victory in the far South Atlantic more than 7 000 miles from its expected battleground in the North Atlantic Elegantly written for a wide audience it will be a very significant volume for professional and enthusiast alike

Winner,Toshi Yoshihara,2009-04-02 This is the first academic study of India s emerging maritime strategy and offers a systematic analysis of the interplay between Western military thought and Indian maritime traditions By a quirk of historical fate Europe embarked on its Age of Discovery just as the main Asian powers were renouncing the sea ushering in centuries of Western dominance In the 21st century however Asian states are once again resuming a naval focus with both China and India dedicating some of their new found wealth to building powerful

navies and coast guards and drawing up maritime strategies to govern the use of these forces The United States like the British Empire before it is attempting to manage these rising sea powers while preserving its maritime primacy This book probes how India looks at the sea what kind of strategy and seagoing forces New Delhi may craft in the coming years and how Indian leaders may use these forces It examines the material dimension but its major premise is that navies represent a physical expression of a society's history philosophical traditions and culture This book then ventures a comprehensive appraisal of Indian maritime strategy This book will be of interest to students of sea power strategic studies Indian politics and Asian Studies in general James R Holmes is an Associate Professor of Strategy at the U S Naval War College and a former U S Navy surface warfare officer Toshi Yoshihara is an Associate Professor in the Strategy and Policy Department at the Naval War College Andrew C Winner is Professor in the Strategic Research Department at the U S Naval War College
