South Yorkshire Mining Villages Melvyn Jones, 2017-07-30 Over a period of more than 150 years between the late eighteenth century and the 1930s the South Yorkshire rural landscape was transformed by coal mining and the movement of coal But it was not just the development of collieries canals and railways that caused this transformation The population of the coalfield grew at a phenomenal rate and the new mining population many of them migrants from other parts of the country had to be housed near to the collieries where they worked Small residential colonies were built near the new collieries existing rural villages expanded new satellite villages were established and completely new mining communities were created the later ones carefully planned and laid out in the form of geometrically designed estates This copiously illustrated book explores the history of the physical and social development of these very varied mining communities drawing on a wide variety of sources It is the first book to cover this subject and includes topics such as the settlement that was specifically built for blackleg miners the development in one village of a large Welsh speaking colony how Earl Fitzwilliam housed his colliers and their families and the views of well known writers like Fred Kitchen Roger Dattler and George Orwell on the colliery villages The book will be of great interest not only to readers living in South Yorkshire but also to the descendants of South Yorkshire miners now living in other parts of the country and elsewhere *Miscellanea Genealogica*

 Carolyn Baylies,2023-02-28 First published in 1993 The History of the Yorkshire Miners 1881 1918 is concerned with the
 workers in the Yorkshire coal industry their union and the broader mining communities in which they lived from the
 formation of the Yorkshire Miners Association in 1881 through to the end of the First World War The period covered is of
 considerable importance for the consolidation of the Yorkshire Miners Union and indeed for the building of a national miners
 federation and an international miners organisation in both of which the role of Yorkshire s leadership was central The
 decades straddling the turn of the century were characterised by volatility in the mining industry which was reflected in a
 number of strikes Carolyn Baylies traces these general processes and focuses in detail upon a number of episodes during
 which union struggles and community involvement coalesced She explores the dynamic between district and local levels of
 the union and the tensions that accompanied a progressive rationalization of bargaining machinery This book will be of
