Ruatv Heidegger And The Televisual:

RUA/TV? Tony Fry, 1993 Heidegger and the Televisual Explores an ontological theory of television as it authors culture and expands beyond the limit of the technology and its social and economical institutions As well it employs ideas delivered by Martin Heidegger as a way of understanding and investigating the Being of what the book names as the televisual the thinking of television beyond that which is normally characterised as television **A New Design Philosophy** Tony Fry, 1999 Introduces the idea of defuturing which is first employed here as a deconstructive method to expose foundational flaws in those worlds so familiar to us It places the significance of understanding design before all concerned people while also confronting design students and professionals with a practical retooling exercise Amazon [Becoming Human by Design](#) Tony Fry, 2013-07-18 The last in Tony Fry s celebrated trilogy of books continues his radical rethinking of design Becoming Human by Design s provocative argument presents a revised reading of human evolution centred on ontological design Examining the relation of design to the nature of the human species where the species came from how it was created what it became and its likely future Fry asserts that current biological and social models of evolution are an insufficient explanation of how we humans became what we are Making a case for ontological design as an evolutionary agency the book posits the relation between the formation of the world of human fabrication and the making of mankind itself as indivisible It also functions as a provocation to rethink the fate of Homo sapiens recognising that all species are finite and that the fate of humankind turns on a fundamental Darwinian principle adapt or die Fry considers the nature of adaptation arguing that it will depend on an ability to think and design in new ways [Unstaging War, Confronting Conflict and Peace](#) Tony Fry, 2019-07-24 This book presents the concept of unstaging war as a strategic response to the failure of the discourse and institutions of peace This failure is explained by exploring the changing character of conflict in current and emergent global circumstances such as asymmetrical conflicts insurgencies and terrorism Fry argues that this pluralisation of war has broken the binary relation between war and peace conflict is no longer self evident and consequentially the changes in the conditions nature systems philosophies and technologies of war must be addressed Through a deep understanding of contemporary war Fry explains why peace fails as both idea and process before presenting Unstaging War as a concept and nascent practice that acknowledges conflict as structurally present and so is not able to be dealt with by attempts to create peace Against a backdrop of increasingly tense relations between global power blocs the beginnings of a new nuclear arms race and the ever increasing human and environmental impacts of climate change a more viable alternative to war is urgently needed Unstaging War is not claimed as a solution but rather as an exploration of critical problems and an opening into the means of engaging with them [The Word is Worth a Thousand Pictures](#) Gregory Edward Reynolds, 2001-04-20

Ethics and Professional Persuasion Ralph D. Barney, 2003-07-30 Examining the applied media ethics question of professional persuasion this special double issue resulted from a colloquium and conference on allowable ethical limits of

deception in professional persuasion Participants were invited to reason their way toward a threshold that would define acceptable deception for a professional persuader in pursuit of favorable market and public opinion conditions for a client As a whole this issue covers a broad range of views and expressions of opinion that often come close to defining the threshold between morally acceptable and morally outrageous persuasion

City Futures in the Age of a Changing Climate Tony

Fry,2014-08-27 This book goes beyond current ways that the impact of climate change upon the city are understood In doing so it addresses climate in a variety of its connotations It looks to the nomadic behaviour patterns of the past for lessons for today s population unsettlement and argues that as human survival will increasingly be linked directly to movement the city can no longer be defined as a constrained space The impacts of climate change must be understood as a combination of the actual and the expected and have to be addressed both practically and culturally City Futures in an Age of Changing Climate looks at how cities can adapt and respond to the unsustainable conditions they are now facing The book considers possible post urban futures exposing a range of very different urban forms and addresses the concept of fragmentation the breaking up of any coherent economic or cultural nucleic urban spaces Urban planners designers development practitioners and anyone seeking to understand what the future is likely to look like for our cities and how to prepare for it will find this an essential read

Design as Politics Tony

Fry,2010-11-01 Design as Politics confronts the inadequacy of contemporary politics to deal with unsustainability Current solutions to unsustainability are analysed as utterly insufficient for dealing with the problems but further than this the book questions the very ability of democracy to deliver a sustainable future Design as Politics argues that finding solutions to this problem of which climate change is only one part demands original and radical thinking Rather than reverting to failed political ideologies the book proposes a post democratic politics In this Design occupies a major role not as it is but as it could be if transformed into a powerful agent of change a force to create and extend freedom The book does no less than position Design as a vital form of political action

Defuturing Tony

Fry,2020-08-20 Once one understands the nature and magnitude of defuturing as the negation of world futures how one has to account for the history and making of the material world including design dramatically changes Defuturing as our condition forces the generation of a new philosophy of design With these thoughts this book presents a radically new understanding of the history context and futures of designing First published in 1999 now reissued with a new preface by the author Defuturing A New Design Philosophy is a prescient and powerful account of what it means to comprehend that we live in world that is taking away futures for ourselves and non human others Arguing that designing is doubly implicated in this process first in its roles in helping to create the unsustainable but second re thought through the lens of defuturing as a mode of acting in the world that can help contest the negation of the world Defuturing transforms our comprehension of designing and of how futures can be constituted Working not through abstract theorizing but through the analysis of concrete examples the book uses historical material on design to expose the archaeology of defuturing Shattering the illusion

that the future simply is Defuturing confronts designing with the challenge of remaking while offering the elements of a new practical reasoning of design acting

Beckett on Screen Jonathan Bignell, 2013-07-19 This ground breaking study analyses Beckett's television plays in relation to the history and theory of television It argues that they are in dialogue with innovative television traditions connected to Modernism in television film radio theatre literature and the visual arts Using original research from BBC archives and manuscript sources the book provides new perspectives on the relationships between Beckett's television dramas and the wider television culture of Britain and Europe It also compares and contrasts the plays for television with Beckett's Film and broadcasts of his theatre work including the recent Beckett on Film season Chapters deal with the production process of the plays the broadcasting contexts in which they were screened institutions and authorship the plays relationships with comparable programmes and films and reaction to Beckett's screen work by audiences and critics This book is a major contribution to Beckett scholarship and to studies of television drama It will be essential reading in literature and drama studies television historiography and for devotees of Beckett's work

Heidegger and the Media David J. Gunkel, Paul A. Taylor, 2014-07-17 The most significant philosopher of Being Martin Heidegger has nevertheless largely been ignored within communications studies This book sets the record straight by demonstrating the profound implications of his unique philosophical project for our understanding of today's mediascape The full range of Heidegger's writing from Being and Time to his later essays is drawn upon Topics covered include an analysis of Heidegger's theory of language and its relevance to communications studies a critical interpretation of mass media and digital culture that draws upon Heidegger's key concept of Dasein a discussion of mediated being and its objectifying tendencies an assessment of Heidegger's legacy for future developments in media theory Clear explanations and accessible commentary are used to guide the reader through the work of a thinker whose notorious reputation belies the highly topical nature of his key insights In a world full of digital networks and new social media but little critical insight Heidegger and the Mediashow how a true understanding of the media requires familiarity with Heidegger's unique brand of thinking

Television and the Meaning of 'Live' Paddy Scannell, 2014-01-27 This book is about the question of existence the meaning of life It is an enquiry into the contemporary human situation as disclosed by television The elementary components of any real world situation are place people and time These are first examined as basic existential phenomena

drawing on Heidegger's fundamental enquiry into the human situation in *Being and Time*. They are then explored through the technological and production care structures of broadcast television which routinely and exceptionally display the situated experience of being alive and living in the world today. It shows routinely in the live self-enactments of persons being themselves and the liveness of their ordinary talk on television. It shows exceptionally in television coverage of great occasions and catastrophes as they unfold live and in real time. Case studies reveal the existential role of television in salvaging the possibility of genuine experience and in revealing the world-historical character of life today. To explore these questions the agenda of sociology, its concern with economic, political and cultural life, is set aside. Being in the world is not in the first or last instance a social but an existential question as an existential enquiry into television today discovers. Passionate and sweeping in scale, this new book from a leading media scholar is a major contribution to our understanding of the media today.

Still Life in Real Time Richard Dienst, 1994. Television can be imagined in a number of ways: as a profuse flow of images; as a machine that produces new social relationships; as the last lingering gasp of Western metaphysical thinking; as a stuttering relay system of almost anonymous messages; as a fantastic construction of time. Richard Dienst engages each of these possibilities as he explores the challenge television has posed for contemporary theories of culture, technology and media. Five theoretical projects provide *Still Life in Real Time* with its framework: the cultural studies tradition of Raymond Williams; Marxist political economy; Heideggerian existentialism; Derridean deconstruction; and a Deleuzian anatomy of images. Drawing lessons from television programs like *Twin Peaks* and *Crime Story*, television events like the Gulf War, and television personalities like Madonna, Dienst produces a remarkable range of insights on the character of the medium and on the theories that have been affected by it. From the earliest theorists who viewed television as a new metaphor for a global whole, a liberal technology empty of ideological or any other content, through those who saw it as a tool for consumption, making time a commodity, to those who sense television's threat to being and its intimate relation to power, Dienst exposes the rich pattern of television's influence on philosophy and hence on the deepest levels of contemporary experience. A book of theory, *Still Life in Real Time* will compel the attention of all those with an interest in the nature of the ever-present, ever-shifting medium and its role in the thinking that marks our time.
