Science, Technology and the Labour Process ,1983 *Science, Technology, and the Labour Process* Les Levidow,1981

Capital and Labour in the British Columbia Forest Industry, 1934-74 Gordon Hak,2011-11-01 The history of British Columbia's economy in the twentieth century is inextricably bound to the development of the forest industry In this comprehensive study Gordon Hak approaches the forest industry from the perspectives of workers and employers examining the two main sets of institutions that structured the relationship during the Fordist era the companies and the unions Drawing on theories of the labour process Fordism and discursive subjectivity Hak relates daily routines of production and profit making to broader forces of unionism business ideology ecological protest technological change and corporate concentration The struggle of the small business sector to survive in the face of corporate growth the history of the industry on the Coast and in the Interior the transformations in capital labour relations during the period government forest policy and the forest industry's encounter with the emerging environmental movement are all considered in this eloquent analysis With its critical historical perspective *Capital and Labour in the British Columbia Forest Industry* will be essential reading for anyone interested in the business natural resource political social and labour history of the province **The Routledge**

Handbook of the Political Economy of Science David Tyfield,Rebecca Lave,Samuel Randalls,Charles Thorpe,2017-04-28 The political economy of research and innovation R I is one of the central issues of the early twenty first century Science and innovation are increasingly tasked with driving and reshaping a troubled global economy while also tackling multiple overlapping global challenges such as climate change or food security global pandemics or energy security But responding to these demands is made more complicated because R I themselves are changing Today new global patterns of R I are transforming the very structures institutions and processes of science and innovation and with it their claims about desirable futures Our understanding of R I needs to change accordingly Responding to this new urgency and uncertainty this handbook presents a pioneering selection of the growing body of literature that has emerged in recent years at the intersection of science and technology studies and political economy The central task for this research has been to expose important but consequential misconceptions about the political economy of R I and to build more insightful approaches This volume therefore explores the complex interrelations between R I both in general and in specific fields and political economies across a number of key dimensions from health to environment and universities to the military The Routledge Handbook of the Political Economy of Science offers a unique collection of texts across a range of issues in this burgeoning and important field from a global selection of top scholars The handbook is essential reading for students interested in the political economy of science technology and innovation It also presents succinct and insightful summaries of the state of the art for more advanced scholars **The Anatomy of Neoliberalism and Education** Maria Nikolakaki,2022-01-01 This book is about the Anatomy of Neoliberalism and Education from a Marxist perspective It is the dialectical materialism of neoliberal ideas

examining the material conditions of how these ideas and practices emerged and under what conditions Each of these elements is related to the other and can only be properly understood as part and parcel of the whole system of capitalism which links them together This book investigates neoliberalism s political cultural and financial tools It goes deep in the forces who have supported neoliberalism and how it became common sense It explores the imperialist outcomes and the social devastation it created It then goes to see how these ideas and policies have been implemented in education In short it is the materialist conception of the history of the American empire It then uses the analytic tools developed through this investigation to re read the neoliberal educational reforms

Revolution in History Roy Porter, Mikuláš Teich, 1986-10-09

Fifteen contributors examine the interpretative value of ideas of revolution for explaining historical development within their own speciality They assess the existing historiography and offer their personal views

The Biologising of Childhood

John R. Morss, 2017-12-06 Originally published in 1990 this book looks at the history of developmental psychology in order to locate and evaluate the role played by biology in its most influential formulations First Charles Darwin s own writings on child development are examined It is shown that Darwin endorsed such ideas as the recapitulation of evolutionary ancestry in the developing child even though this is inconsistent with his natural selection theory The first great developmentalists Hall Baldwin Freud adopted and applied these non Darwinian evolutionist ideas The next generation Vygotsky Piaget Werner applied similar ideas in a variety of ways Alongside this evolutionism but interconnected with it sensationist empiricist forms of epistemology were directing developmentalists from Rousseau onwards to see the child as having to work himself out of sense bound experience to develop further and further from the here and now Contemporary developmental theory retains these influences biological approaches ethological psychobiological remain pre Darwinian in spirit lifespan theories remain attached to biology formal cognitive approaches remain attached to sensationism Social context approaches are rather half hearted and it is only the social constructionist orientation which seems to offer a real alternative to biology Major conclusions are stated in chapter ten which includes a re evaluation of Darwin s role

The SAGE Handbook of Marxism

Beverley Skeggs, Sara R. Farris, Alberto Toscano, Svenja Bromberg, 2021-11-17 The past decade has witnessed a resurgence of interest in Marxism both within and without the academy Marxian frameworks concepts and categories continue to be narratively relevant to the features and events of contemporary capitalism Most crucially an attention to shifting cultural conditions has lead contemporary researchers to re confront some classical and essential Marxist concepts as well as elaborating new critical frameworks for the analysis of capitalism today The SAGE Handbook of Marxism showcases this cutting edge of today s Marxism It advances the debate with essays that rigorously map and renew the concepts that have provided the groundwork and main currents for Marxist theory and showcases interventions that set the agenda for Marxist research in the 21st century A rigorous and challenging collection of scholarship this book contains a stunning range of contributions from contemporary academics writers and theorists from around the world and across disciplines invaluable to

scholars and graduate students alike Part 1 Reworking the critique of political economy Part 2 Forms of domination subjects of struggle Part 3 Political perspectives Part 4 Philosophical dimensions Part 5 Land and existence Part 6 Domains Part 7 Inquiries and debates *Sociological Perspectives on Modern Accountancy* Robin Roslender, 2002-11-01 First Published in 2004 The subject of this text is modern accountancy which is to be considered from a sociological perspective The logical starting point is to map out the chosen subject modern accountancy before saying something about the particular disciplinary perspective sociology from which it is to be viewed The volume is split into two parts the sociology of accountancy and Sociology for accounting Psychology Library Editions: Child Development Various, 2021-12-02 Psychology Library Editions Child Development 20 Volume set brings together a diverse number of titles across many areas of developmental psychology from children's play to language development The series of previously out of print titles originally published between 1930 and 1993 with the majority from the 70s and 80s includes contributions from many respected authors in the field and charts the progression of the field over this time **Cyberwar and Revolution** Nick Dyer-Witheford, Svitlana Matviyenko, 2019-03-12 Uncovering the class conflicts geopolitical dynamics and aggressive capitalism propelling the militarization of the internet Global surveillance computational propaganda online espionage virtual recruiting massive data breaches hacked nuclear centrifuges and power grids concerns about cyberwar have been mounting rising to a fever pitch after the alleged Russian hacking of the U S presidential election and the Cambridge Analytica scandal Although cyberwar is widely discussed few accounts undertake a deep critical view of its roots and consequences Analyzing the new militarization of the internet Cyberwar and Revolution argues that digital warfare is not a bug in the logic of global capitalism but rather a feature of its chaotic disorderly unconscious Urgently confronting the concept of cyberwar through the lens of both Marxist critical theory and psychoanalysis Nick Dyer Witheford and Svitlana Matviyenko provide a wide ranging examination of the class conflicts and geopolitical dynamics propelling war across digital networks Investigating the subjectivities that cyberwar mobilizes exploits and bewilders and revealing how it permeates the fabric of everyday life and implicates us all in its design this book also highlights the critical importance of the emergent resistance to this digital militarism hacktivism digital worker dissent and off the grid activism for effecting different better futures **Biotechnology** Nico Stehr, 2017-09-08 While other books have addressed isolated aspects of recent developments in the biomedical sciences Biotechnology Between Commerce and Civil Society is the first book to engage with the full range of biotechnology's implications for social science and for society at large Professor Volker Meja New scientific knowledge is no longer merely the key to unlocking the secrets of nature and society It now represents the becoming of a new world Scientific developments affect the ways in which we conduct our affairs as well as how we comprehend the changes underway as the result of novel technical artefacts and scientific knowledge The practical fruits of biotechnology are a case in point they have grasped our imaginations and generated worldwide debate and concern Debates on biotechnology shift between images of utopia and dystopia The social

sciences deserve a voice in the debate and can do so through sober examination of the economic social and cultural implications of biotechnology Some economists even predict that the importance of biotechnology as the technology of the future will far exceed that of the information technologies in particular the Internet The contributors to this volume are drawn from a broad spectrum of the social sciences and include Nico Stehr Gene Rosa Steve Fuller Steve Best and Douglas Kellner Nikolas Rose Fred Buttel Javier Lezaun Anne Kerr Susanna Hornig Priest and Toby Ten Eyck Martin Schulte Alexander Somek Steven P Vallas Daniel Lee Kleinman Abby Kinchy and Raul Necochea Herbert Gottweis J Rogers Hollingsworth Gysli Pblsson Elizabeth Ettore Richard Hindmarch and Reiner Grundmann The impact of science on society is destined to be a fundamental concern in the new century This volume illustrates the contributions anthropology law political science and sociology can make to the ongoing discussions about the role of biotechnology in modern societies Nico Stehr is senior research associate Institut for Technikfolgenabschotzung Forschungszentrum Karlsruhe and Institut for Kostenforschung GKSS Germany He also is a fellow in the Center for Advanced Cultural Studies in Essen Germany editor of the Canadian Journal of Sociology and a fellow of the Royal Society of Canada Among his recent books are Werner Sombart *Economic Life in the Modern Age* with Reiner Grundmann published by Transaction *The Fragility of Modern Societies* *Knowledge and Risk in the Information Age* *Knowledge and Economic Conduct* *The Social Foundations of the Modern Economy* and *Wissenspolitik Die berwachung des Wissens*

Decentering Biotechnology Michael S. Carolan, 2016-04-08 *Decentering Biotechnology* explores the nature of technology objects and patent law Investigating the patenting of organic life and the manner in which artifacts of biotechnology are given their object ive appearance Carolan details the enrollment mechanisms that give biotechnology its momentum Drawing on legal judgements and case studies this fascinating book examines the nature of object ification as a thought and a thing without which biotechnology as it is done today would not be possible Unable to reject biotechnology per se recognizing that such a rejection would essentialize the very object ive categories shown to be manufactured Carolan ultimately argues for doing biotechnology differently A theoretically sophisticated analysis of the nature of objects and the role of technology as a form of life which shapes the social landscape *Decentering Biotechnology* engages with questions of power globalization development resistance exclusion and participation that arise from treating biological objects differently from conventional property forms As such it will appeal to social theorists sociologists and philosophers as well as scholars of law and science and technology studies

The Political Economy of Information Vincent Mosco, Janet Wasko, 1988 The information society is real Information as a marketable commodity is quickly taking up the powerful role once held by heavy industry and manufactured products How this revolution is affecting society and how society and government are responding to it is the subject of this book Its lessons and conclusions are of critical importance as we enter the last decade of this century Every dimension of social life whether in the home or the workplace is affected by information and the technologies that give it market value Along with the positive

aspects of these broad changes there are inevitable problems the growing gap between the information rich and information poor the need for widespread access to communication and information technology the threat to individual privacy and the potential of the technology to create global instabilities The editors have enlisted specialists and scholars in business communications studies computing and information science economics law library science political science and sociology to examine these changes and problems by looking at information specifically as a commodity to be traded protected and desired

Primate Visions Donna J. Haraway, 2013-01-11 Haraway's discussions of how scientists have perceived the sexual nature of female primates opens a new chapter in feminist theory raising unsettling questions about models of the family and of heterosexuality in primate research

Anti-Capitalism Lécio Morais, 2002-12-20 This book is a collection of essays from some of the world's leading Marxist economists on the problems of globalisation and the evolution of modern capitalism With contributions from Suzanne de Brunhoff Ellen Meiksins Wood Ben Fine Simon Clarke John Holloway and John Weeks among others it provides a cohesive critique of the weaknesses of the existing system and puts forward a new agenda for anti capitalist thought and action Covering key issues such as globalisation the nation state money and finance conflict and war technological change the environment class struggle economic crisis capitalism in the Third World the collapse of the USSR and the transcendence of capitalism this is an ideal introduction to some of the most pressing problems of our time

Science, Technology, And Development Atul Wad, 2019-07-11 This book examines issues specific to the regions of Latin America and Africa and deals with an issue that Africa has shown the least progress in terms of science and technology and yet it is a region where the needs are urgent in human terms

The Oxford Handbook of Critical Management Studies Mats Alvesson, Todd Bridgman, Hugh Willmott, 2009-06-19 Critical Management Studies CMS has emerged as a movement that questions the authority and relevance of mainstream thinking and practice Critical of established social practices and institutional arrangements it challenges prevailing systems of domination and promotes the development of alternatives to them CMS draws upon diverse critical traditions Of particular importance for its initial articulation was the thinking of members of the Frankfurt School of Critical Theory From these foundations CMS has grown into a pluralistic and inclusive movement incorporating a diverse range of perspectives ranging from labour process theory to radical feminism In recent times a set of ideas broadly labelled poststructuralist have been developed to complement and challenge the insights of Critical Theory giving new impetus for scholars seeking to challenge the status quo and articulate a more inclusive and humane future for management practice The Oxford Handbook of Critical Management Studies provides an overview of theoretical approaches key topics issues and subject specialisms in management studies as well as a set of reflections on the progress and prospects of CMS Contributors are all specialists in the respective fields and share a concern to interrogate and challenge received wisdom about management theory and practice Given the rapid growth of the CMS movement its ever increasing theoretical and geographical diversity and its outreach into the public sphere The Oxford

Handbook of Critical Management Studies is a timely publication In addition to UK contributors where CMS has developed most rapidly there is strong representation from North American contributors as well as from areas where CMS has taken hold more recently such as Australasia Science, Technology, and the Labour Process Robert Maxwell Young,1981 The Virtual University? Kevin Robins,Frank Webster,2002-11-07 Higher education is changing in scope style technology and objectives This book looks at the impact of information technologies on higher education and the reorganization of universities in more managerial and business directions The book combines empirical and analytical chapters from scholars on both sides of the Atlantic
