the mind and that of the machine In science and engineering this interaction is often explored by posing the question how can technology be best tailored to human cognition But as the history of technological developments has consistently shown cognition is also fashioned by technology Technologies as diverse as writing electricity generation and the silicon chip all illustrate the profound and dynamic impact of technology upon ourselves and our conceptions of the world *The Next Generation of Corporate Universities* Mark Allen,2007-04-10 The objective of this book is to provide innovative approaches for developing people and expanding organizational capabilities If you also have this objective this book is for you because each chapter is written by a qualified author to provide the information you need Donald L Kirkpatrick Ph D professor emeritus University of Wisconsin and author *Evaluating Training Programs The Four Levels* **Urban Education** Kathy L.
