Rare Plants of Georgia Linda G. Chafin, 2007 Abundantly illustrated with more than 400 color photographs and 200 detailed

drawings this comprehensive guide to the state's rare and endangered plants provides photographs and botanical illustrations in a single volume formatted for field use. More than 200 species are covered including two dozen that are federally listed and 170 plus that are listed as Threatened, Endangered, Rare or of Special Concern by the Georgia Department of Natural Resources. The guide is designed for easy nontechnical identification of species in the field. Color photographs show the plants in their natural surroundings and drawings emphasize the most distinctive parts of the plants. Packed with information about the plants as well as their habitats and management, the guide facilitates the quick recognition of rare species, encourages awareness of their distribution and ecological significance, and provides guidelines for ensuring their survival. Additional features include directions for using the guide, a map of Georgia's counties, descriptions of the natural communities of Georgia, references for further reading, a glossary of frequently used terms, and indexes of scientific and common plant names. The guide also includes a chapter by Jennifer Ceska, a University of Georgia horticulture professor, James Affolter, a founding member of the Georgia Plant Conservation Alliance, on horticultural requirements of rare species, and the role of GPCA in their protection. This is a valuable resource for students, wildflower enthusiasts, botanists, land managers, and environmental decision makers. Each species account includes one or more full color photographs, Georgia distribution map, line drawing emphasizing such key field identification characters as leaf, stem, flower, and fruit, scientific and common names, legal and wetland status, brief nontechnical description emphasizing key field identification characters, flowering, fruiting, or sporulation period, description of species habitat, information on best survey season, range, wide distribution, Georgia conservation status, management guidelines, information on similar species, and related rare species list of references.
