the culture prevailing in the various fields of woodcraft As a result both the technical and the symbolic and aesthetic properties of wood and woodworking become apparent as seen from the point of view of Japanese craftsmen who owe their skill and expertise to traditions passed from one generation to the next As such this study contributes towards opening a new field of research for art historians ethnobotanists archaeologists and japanologists by supplying them with new means and tools to supplement their own Apart from that the present study focusing on wood in all its aspects as it does ties in with an academic trend that has been developing in Japan over the past few decades
