Sea Change Pacific Asia As The New World Industrial Center:

Comprehensive Security in Asia ,2000-04-27 The term comprehensive security was first used by the late Japanese prime minister Ohira but the concept as such can be traced back to Japanese thinking on security during the fifties Its meaning goes far beyond requirements of military defence against a particular enemy and stresses the need to take into account other aspects vital to national stability food energy environment communication and social security While not denying the importance of military security it explicitly encompasses a wide range of other aspects the search for environmental security for instance which requires cooperation with other countries including hypothetical enemies The concept stresses the need for confidence building methods as a requirement for its attainment and pertains to issues such as preventive diplomacy energy security second order cybernetics greater transparency of international financial markets as means to enhance overall stability It is a notion that goes beyond simplifications such as us and them Since the word has been first coined in Japan it has caught on in other Asian countries as well It has become clear that the concept is particularly suited for a continent where large and powerful countries such as China Korea Japan and Indonesia are unlikely to enter into close cooperation along the model of the European Union In short in this volume a team of scholars from Asia Europe and the United States provide clear analyses of issues vital to Asian politics an important contribution to one of the key issues of contemporary Asian politics

Contemporary Issues Shaping China's Civil Aviation Policy Alan Williams,2016-05-13 The emergence of China as a future major participant in international aviation raises some interesting questions especially from a strategic policy perspective The progressive shift from a command to a mixed market economy under the central leadership of the Beijing administration now finds itself faced with the needs to balance a strategic duality in the context of the role of China s civil aviation industry In a very real sense this situation requires the design and accommodation of a growing role for China s mainstream carriers within the operational context of the need to meet the complex challenges from increasing international market competition In parallel with such major external pressures central government must also accommodate domestic priorities with regard to internal economic development The fruits of economic progress as a function of market reform are commonly understood to have positively reshaped the live of only a proportion of the national population to date The need to create greater access to economic growth for the more remote western and northern provinces has required that the rapid development of airports become a factor in the planning and allocation of developmental priorities To complicate matters further prevailing requirements of airspace defence remain a major parameter within the larger context of national aviation policy This book explores the political economic and strategic issues raised by the inevitable tension between the domestic and international aspects of Beijing s current civil aviation strategy It also seeks to identify some of the problems that face the industry as a key sector in the larger context of macroeconomic reform and the further pressures now being exerted by China s membership of the WTO

Globalization Jan Aart Scholte, 2017-03-16 This highly acclaimed bestselling textbook quickly established itself as one of the leading texts on the subject worldwide in its 1st edition. Now substantially revised and updated, Scholte provides students with a comprehensive introduction to globalization and questions why this phenomenon has occurred, to what extent it changes the world, and whether it is a force for good or ill. Accessibly written by a leading authority both as an academic researcher and a policy consultant, this second edition draws on the author's research in more than 20 countries over 5 continents. Split into 3 parts, the text first outlines a critical framework for understanding globalization, before exploring its impact on society and the key debates surrounding its normative impact. Exploring questions such as what globalization is, how it has emerged, and what effect it has had on society, this text is essential reading for undergraduate and postgraduate students seeking a thorough study of globalization. New to this Edition: A broader perspective on all the dimensions of globalization. Makes use of the extensive new data and research findings since the first edition was released. Draws more widely from other fields such as Business Studies, Law, and Economics.

Kimono in the Boardroom Jean R. Renshaw, 1999-09-23 Japanese women, who comprise more than 40% of their country's workforce, are essential to the Japanese economy. Yet they are not typically thought of as managers at home or abroad. Jean Renshaw challenges that perception in this pathbreaking book, showing readers where and how an invisible evolution is occurring in Japanese business. Traditional norms of lifetime employment, the seniority system, and the bureaucratic, tightly knit nature of Japanese industry all restrict women's entry into management. Despite these enormous barriers, the number of Japanese women managers has almost doubled in the last ten years. In an effort to discover the secrets of their success, Renshaw interviewed over 150 successful Japanese women managers. She explored family backgrounds, personal characteristics, socialization, professional experiences, and corporate cultures. This book presents her sometimes surprising discoveries. Renshaw completes the picture by surveying the history of Japanese women in management and discussing the even newer phenomenon of Japanese women who own their own businesses. An eye-opening work for managers of international firms and scholars of business and women's studies, *Kimono in the Boardroom* reveals the potential of the rising female managerial class to profoundly change the male-dominated culture of modern Japan.

Informality and Monetary Policy in Japan Adrian van Rixtel, 2002-10-31 The success and misfortunes of the post-war Japanese economy have been one of the most debated points in modern economics. Many explanations focus on cultural and institutional factors, and in particular, the role of informality networks organizing business activity and government policy. Adrian van Rixtel, an economist at the European Central Bank, provides a quantitative and qualitative assessment of informality in the formation of Japanese monetary policy. Having been based in Japan for three years, two of which were spent at the Institute for Monetary and Economic Studies at the Bank of Japan, and the

Japanese Ministry of Finance he is able to bring a unique insider outsider perspective to the subject **Technology, Learning, and Innovation** Linsu Kim, Richard R. Nelson, 2000-07-24 In this volume published in 2000 leading scholars analyze in a series of essays and commentaries how newly industrializing countries NICs particularly those in East Asia have transformed themselves from technologically backward and poor to relatively modern and affluent economies over the past thirty years The contributors provide interesting theoretical perspectives and offer insights into the process of technological progress at both the macro and micro levels in these countries The essays review how firms particularly those in electronics and automobiles have dynamically accumulated technological capabilities at the micro level how public policies have shaped the process of technological progress at the national level and what problems some of these countries face today at both levels In addition the volume provides a comparison of East Asian NICs with their Latin American counterparts The discussion also offers useful lessons for policies in other developing countries **The Rise and Decline of the Asian Century** Christopher Lingle, 2019-03-25 First published in 1997 this volume reflects an attempt to put order in the place of what appears to be chaos amidst East Asia's rapid dash toward economic development With experiences of Turkey during and after martial law Italy during the Red Brigade England during the Winter of Discontent post Franco Spain's stumbling embrace of democracy Poland in the beginning of the solidarity movement South Africa in the crumbling of apartheid China during the early student protests and Europe when the Iron Curtain was lifted Christopher Lingle applies these ideas to modern developments in East Asia providing an intriguing counter intuitive refreshing take on its economies

21st-Century Japanese Management J. Abegglen, 2006-03-13 Japan's economy and businesses are entering this century with new management systems but their values unchanged Drawing on the author's analysis of the 1950s financial systems personnel management methods role of the corporation and R D capabilities are reassessed to provide a comprehensive analysis of Japan's financial and industrial changes **Strangers on Familiar Soil** Edward Dallam Melillo, 2015-10-20 This groundbreaking history explores the many unrecognized enduring linkages between the state of California and the country of Chile The book begins in 1786 when a French expedition brought the potato from Chile to California and it concludes with Chilean president Michelle Bachelet's diplomatic visit to the Golden State in 2008 During the intervening centuries new crops foods fertilizers mining technologies laborers and ideas from Chile radically altered California's development In turn Californian systems of servitude exotic species educational programs and capitalist development strategies dramatically shaped Chilean history Edward Dallam Melillo develops a new set of historical perspectives tracing eastward moving trends in U S history uncovering South American influences on North America's development and reframing the Western Hemisphere from a Pacific vantage point His innovative approach yields transnational insights and recovers long forgotten connections between the peoples and ecosystems of Chile and California **Knowledge and Nationhood** Denis Glesson, 1996-07-01 This text examines the implications of government policy for the curriculum the professionalism of

educational practitioners and the training and career options of young people It argues for a new educational agenda which recognizes the importance of intellectual investment and innovation in all areas of educational provision and which addresses the profound changes taking place in the relationship between national and global citizenship The text also includes a critique of New Right policies
