Sea Power In Conflict

Dr Richard Harding, Richard Harding

Sea Power In Conflict:

The Leverage of Sea Power Colin S. Gray, 1992 Through colourful and lively historical illustrations as well as strategic theory Gray shows how sea power when integrated with land and air power increases the combatant's opportunities and choices With dozens of examples from the Greek and Persian wars of the fifth century B C through the recent war in the Gulf Gray systematically demonstrates the ways sea power has been used and how it might have been used to win battles and wars His thought provoking commentary is certain to become essential reading for the makers of defense policy today The Leverage of Sea Power is an important and original contribution to the science of warfare historically and in the nuclear age

Seapower Geoffrey Till, 2004 At the beginning of the 21st century much has remained the same in naval terms but much has changed Geoffrey Till's study is an exploration of how change will impact upon the world's navies *Post-war Japan as a Sea Power* Alessio Patalano, 2015-04-23 In *Post war Japan as a Sea Power* Alessio Patalano incorporates new exclusive source material to develop an innovative approach to the study of post war Japan as a military power This archival based history of Asia's most advanced navy the Japanese Maritime Self Defence Force JMSDF looks beyond the traditional perspective of viewing the modern Japanese military in light of the country's alliance with the US The book places the institution in a historical context analysing its imperial legacy and the role of Japan's shattering defeat in WWII in the post war emergence of Japan as East Asia's sea power *Air and Sea Power in World War I* Maryam Philpott, 2013-05-30 The Great War tore the fabric of Europe apart killing over 35 million men and challenging the notion of heroism in war *Air and Sea Power in World War I* focuses on the experience of World War I from the perspective of British pilots and sailors themselves to demonstrate that the army centric view of war studies has been too limited The Royal Flying Corps created in 1912 adapted quickly to the needs of modern warfare driven by the enthusiasm of its men In contrast the lack of modernisation in the Royal Navy despite the unveiling of HMS Dreadnought in 1906 undermined Britain's dominance of the seas By considering five key aspects of the war experience this book analyses how motivation was created and sustained What training did men receive and how effectively did this prepare them for roles that were predominantly non combative How was motivation affected by their individual relationship with weaponry development and how different was defensive service on the Home Front when in close proximity to ordinary civilian life Finally *Air and Sea Power in World War I* looks at the changing reputation of the services during and after the conflict and the extent to which these notions were created by the memoirs of pilots and sailors Featuring new primary source material including the journals of service men themselves this book will be essential reading for students and scholars of World War I and of Naval Aviation and Military History *Sea Power in Conflict* Paul Schubert, 1942 Study of navies in general and naval history of World War up to Pearl Harbor **The Navy in the Post-Cold War World** Colin S. Gray, 2010-11 The Navy in the Post Cold War World is the first book to invite the reader to think strategically explores the strategic relationship among sea land and air power with particular attention to the course of a

conflict viewed as a whole and ventures boldly into the region of the meaning of space strategy for maritime power and the relevance of that power in the still emerging post Cold War security environment The Navy in the Post Cold War World is unusual because it is written by an internationally recognized general strategic theorist and analyst rather than by a long standing naval writer Gray is thus better able to view naval issues in proper perspective Gray delves deeply into the role of sea power as an enabling agent and team player in the overall enterprise of national and international security He provides the most current assessment of what sea and space power mean for each other as well as envisioning the future of maritime oriented defense

Military Power, Conflict, and Trade Michael P. Gerace, 2004 This is a book about how military spending and international trade interact among great powers about their peacetime patterns of conflict and about the peacetime roles played by military power

Seapower and Naval Warfare, 1650-1830 Dr Richard Harding, Richard Harding, 2002-01-04 From the author of Amphibious Warfare in the Eighteenth Century and The Evolution of the Sailing Navy 1509 1815 this book serves as a single volume survey of war at sea and the expansion of naval power in the 18th century The book is intended for undergraduate courses on 18th century European history and for amateur and professional military historians and for navy colleges and navy and ex navy professionals

Twenty-First Century Seapower Peter Dutton, Robert Ross, Øystein Tunsjø, 2013-05-02 This book offers an assessment of the naval policies of emerging naval powers and the implications for maritime security relations and the global maritime order Since the end of the Cold War China Japan India and Russia have begun to challenge the status quo with the acquisition of advanced naval capabilities The emergence of rising naval powers is a cause for concern as the potential for great power instability is exacerbated by the multiple maritime territorial disputes among new and established naval powers This work explores the underlying sources of maritime ambition through an analysis of various historical cases of naval expansionism It analyses both the sources and dynamics of international naval competition and looks at the ways in which maritime stability and the widespread benefits of international commerce and maritime resource extraction can be sustained through the twenty first century This book will be of much interest to students of naval power Asian security and politics strategic studies security studies and IR in general

Sea Power and the War James Richard Thursfield, 1915

Sea Power in the Mediterranean Edward Luttwak, 1979

Seapower in the Nuclear Age Joel J. Sokolsky, 2021-01-26 This book first published in 1991 provides a major analysis of the prelude to the US s Cold War maritime strategy showing how NATO s maritime forces were organised in the period It examines how the United States Navy and allied navies particularly the Royal Navy were incorporated into the Alliance s nuclear and conventional deterrent forces It looks at the structure of the main naval commands the growth of Soviet maritime forces and the impact of the flexible response strategy on NATO s naval posture in the 1970s Drawing upon many declassified documents this account fills an important gap in postwar literature on American seapower and its relation to European security It also addresses

important aspects of NATO strategy and organisation **Review of Current Military Literature** ,1952-10 One Hundred Years of Sea Power George W. Baer,1994-08-01 A navy is a state s main instrument of maritime force What it should do what doctrine it holds what ships it deploys and how it fights are determined by practical political and military choices in relation to national needs Choices are made according to the state s goals perceived threat maritime opportunity technological capabilities practical experience and not the least the way the sea service defines itself and its way of war This book is a history of the modern U S Navy It explains how the Navy in the century after 1890 was formed and reformed in the interaction of purpose experience and doctrine **WAR, PEACE AND VICTORY: STRATEGY AND STATECRAFT FOR THE NEXT CENTURY** Colin S. Gray,1991-06-15 From Simon Schuster War Peace and Victory is Colin S Gray s exploration of strategy and statecraft for the next century In War Peace and Victory Colin S Gray shows how geography technology history and national culture shape government policy and explains how nations pursue their strategic interests in times of peace **The Times History of the War** ,1916 *Freedom of the Seas and US Foreign Policy* Connor Donahue,2024-04-05 This book critically analyzes US political military strategy by arguing that freedom of the seas discourse is fundamentally unfit for an era of maritime great power competition The work conducts a genealogical intellectual history of freedom of the seas discourse in US foreign policy to show how the concept has evolved over time to facilitate American control over the global ocean space It concludes that the contemporary discourse works to establish the high seas as an arena free from claims of sovereignty so that the United States as the presumed unrivaled naval power can intervene globally on behalf of its national interests However since sea control strategies depend on a preponderance of material force as the United States wanes in relative material capability it becomes less able to support political military strategies predicated on the assumption of global naval dominance The book provides a timely commentary on the current geopolitical competition between the United States and China and critiques the US approach toward China in the maritime domain in order to highlight potential avenues of foreign policy action that may enable the two countries to mitigate the risk of conflict This book will be of much interest to students of naval history maritime security US foreign policy and international relations
