Congress. Interior and Insular Affairs, 1972 **Development of Hard Mineral Resources of the Deep Seabed** United States. Congress. Senate. Committee on Interior and Insular Affairs. Subcommittee on Minerals, Materials, and Fuels, 1972 **A Joint Venture Agreement for Seabed Mining** G. Jaenicke, 2013-11-11 The Third United Nations Conference on the Law of the Sea is preparing rules for the establishment of an international legal regime governing the exploration and exploitation of the resources of the international seabed The Draft Convention on the Law of the Sea Informal Text of 27 August 1980 which has so far been the result of the negotiations during the preceding sessions of the Conference provides for a so called parallel system under which an international Enterprise as well as national private or state owned companies will be granted access to the resources of the international seabed under the control of an International Seabed Authority The Draft Convention also envisages the conclusion of joint venture agreements between the international Enterprise and national companies or consortia and encourages such cooperation through granting various incentives Such joint ventures will probably play an important part in making the international Enterprise operative in the early years of its existence At the Conference concerns have been expressed whether and when the Enterprise as a newcomer would be in a position to start seabed mining and to compete effectively with the national companies The Draft Convention provides for a number of ways and means to enable the Enterprise to develop its technological and financial capabilities for deep sea mining as early as possible *The Global 2000 Report to the President* Gerald O. Barney, Council on Environmental Quality (U.S.), 1980 **International Law of the Sea and Marine Affairs** Nikos Papadakis, Martin Ira Glassner, 1984-04-06 *International Law of the Sea and Marine Affairs* **Energy Abstracts for Policy Analysis**, 1978 **Legal Aspects of the New International Economic Order** Kamal Hossain, 2013-11-07 *Legal Aspects of the New International Economic Order* draws together the results of discussions from the 58th Conference of the International Law Association held in Manila in September 1978 Many there including a number of contributors to this insightful book felt that proposals for the establishment of a new international economic order bristled with complex legal issues which merited the serious attention of lawyers Moved by the conviction that these proposals aimed at restructuring international economic relations and effecting a global redistribution of wealth and power presented a challenge to legal creativity the Conference adopted a resolution urging the International Law Association to undertake a study of the Legal Aspects of a New International Economic Order *Legal Aspects of the New International Economic Order* draws together the papers that came from that study to offer a fascinating and powerful examination of the legal challenges thrown up by the establishment of this new order **The Global 2000 Report to the President--entering the Twenty-first Century: The technical report** Global 2000 Study (U.S.), Gerald O. Donges,2012-12-06 Manganese nodules lying on the ocean floor beyond national jurisdiction and containing such strategic minerals as cobalt copper manganese and nickel are currently considered to constitute the highest valued deep ocean mineral resource and regarded by many as the common heritage of mankind Not surprisingly the exploitation of minerals from the sea bed was one of the most controversial issues discussed at the Third United Nations Conference on the Law of the Sea from 1973 to 1982 which led to the adoption of a new Convention on the Law of the Sea in Jamaica in December of 1982 However the still ongoing international debate on the Convention I s regime to govern deep sea mining reveals that the central economic problems involved are far from being definitely settled In view of the importance of this issue the Kiel Institute of World Economics launched in 1980 a major research project on allocational and distributional aspects of the use of ocean resources A comprehensive analysis and evaluation of the new Law of the Sea Convention has al ready been published see Wilfried Prewo et al Die Neuordnung der Meere Eine okonomische Kritik des neuen Seerechts Kieler Studien No 173 Tlibingen J C B Mohr 1982 The Global 2000 Report to the President: The technical report ,1981 **The Global 2000 Report to the President--entering the Twenty-first Century** Council on Environmental Quality (U.S.),1980 *The Global 2000 Report to the President of the U.S.* Gerald O.

Barney,2013-09-24 The Global 2000 Report to the President of the U S presents an interagency report of the 70 year record of Government concern relating to issues in population resources and environment It discusses the interrelatedness of these three factors It addresses all three topics from a relatively long term global perspective and emphasizes interconnections and feedback Some of the topics covered in the book are the projections of the population climate technology and the food and agriculture The analysis of these projections is covered The tools used in the analysis are discussed The text defines the meaning of mesarovic pestel world model carrying capacity stability diversity and ecological buffering A comparison of the resulting projections is presented A chapter of the volume is devoted to the embassy reports on forestry and agricultural trends Another section of the book focuses on the Latin American world model The book will provide useful information to
