Agents and Peer-to-Peer Computing Gianluca Moro,Claudio Sartori,2004-12-03 Peer to peer P2P computing is currently attracting enormous public attention spurred by the popularity of file sharing systems such as Napster Gnutella Morpheus Kaza and several others In P2P systems a very large number of autonomous computing nodes the peers rely on each other for services P2P networks are emerging as a new distributed computing paradigm because of their potential to harness the computing power and the storage capacity of the hosts composing the network and because they realize a completely open decentralized environment where everybody can join in autonomously Although researchers working on distributed computing multiagent systems databases and networks have been using similar concepts for a long time it is only recently that papers motivated by the current P2P paradigm have started appearing in high quality conferences and workshops In particular research on agent systems appears to be most relevant because multiagent systems have always been thought of as networks of autonomous peers since their inception Agents which can be superimposed on the P2P architecture embody the description of task environments decision support capabilities social behaviors trust and reputation and interaction protocols among peers The emphasis on decentralization

autonomy ease and speed of growth that gives P2P its advantages also leads to significant potential problems Most prominent among these are coordination the ability of an agent to make decisions on its own actions in the context of activities of other agents and scalability the value of the P2P systems in how well they self organize so as to scale along several dimensions including complexity heterogeneity of peers robustness traffic redistribution etc This book brings together an introduction three invited articles and revised versions of the papers presented at the Second International Workshop on Agents and Peer to Peer Computing AP2PC 2003 held in Melbourne Australia July 2003 Boys' Life ,1949-05 Boys Life is the official youth magazine for the Boy Scouts of America Published since 1911 it contains a proven mix of news nature sports history fiction science comics and Scouting **Killing for You** Keith Elliot Greenberg,2024-05-01 The New York Times bestselling true crime author recounts the dramatic story of a struggling actor s double murder plot Twenty six year old actor Daniel Wozniak was unemployed facing eviction and deep in debt for his upcoming wedding So he devised a diabolical plan He asked his neighbor Sam Herr a young war veteran to help him move some things into the attic of an empty theater There Wozniak shot Herr twice in the head before taking his ATM card and cell phone Hours later Wozniak performed on stage with his fianc e in a local production of the musical Nine convinced that he had gotten away with murder Wozniak dismembered his victim s body and hid the pieces Then he lured Herr s college friend Juri Julie Kibuishi to Herr s apartment and shot her twice in the head The police immediately declared Herr a prime suspect just as Wozniak had planned But when Herr was declared missing and his ATM withdrawals led authorities to Wozniak at his bachelor party the actor was forced to play the role of a lifetime in a shocking murder investigation that would be his greatest and final performance
