Dunne, 2012 In his new book John S Dunne asks So what is eternal consciousness It is I take it consciousness of the eternal in us If time is a changing image of eternity as Plato says the changing image of the human being is like The Voyage of Life four paintings by Thomas Cole showing childhood youth adulthood and age The eternal in us is the person going through these phases It is the vertical dimension of the life as in the title scene of War and Peace where Prince Andre lay on the battlefield looking up into the peaceful sky perceiving peace in the midst of war If the horizontal

dimension is time and the vertical dimension is eternity then eternal consciousness is awareness of the vertical dimension. What is more the vertical dimension carries through the horizontal as the person walks through life upright instead of being dragged through in quiet desperation. Willingness and hope accordingly is willingness to walk through upright with hope in the face of death and darkness from the book *What can I know What should I do What may I hope* Dunne explores these questions in his characteristic hermeneutic method finding the answer in the words of eternal life John 6:68. It is the life of the spirit that is the eternal in us the inner life of knowing and loving the life of hope and peace and friendship and intelligence. If there were no eternal consciousness in a man Kierkegaard says what then would life be but despair. John Dunne adds if there is eternal consciousness in us on the other hand there is hope. To readers of John Dunne's books *Eternal Consciousness* will be the latest installment chronicling his spiritual journey to readers new to Dunne's oeuvre it will be a lively introduction to the distinctive voice and thought of an inspiring author. As action grows more frantic and voices more shrill in this age of terror John Dunne's wisdom born of *Eternal Consciousness* shows us and leads us into our true selves never unloved never abandoned willing to walk on with God through life into the very gateway of death itself. **Echoes from Eternity** Arvin S. Gibson, 1993 *Echoes from Eternity* extends the research work commenced with the best selling book *Glimpses of Eternity* into new areas. More than twenty new firsthand accounts of persons who died entered the Spirit World and returned are reported. Scientists call such events near death experiences (NDEs). Sixty-eight case studies are documented and analyzed for unusual patterns and parallels with LDS scriptures the author's continuing research confirms previous findings and also reveals new and unexpected insights. Several of those who experienced NDEs tell of having seen themselves in a pre-mortal environment making choices about their future life on earth. Some children's experiences are recorded and their innocence and candor sheds additional light on the subject of death and the hereafter. Some of the interviewed individuals went through extensive NDEs and their vivid recollections are described in detail. The first part of the book documents recorded interviews of the persons who traveled beyond the veil of this life and returned. Their accounts are recorded in full without editorial comment. In the second part of the book those experiences are analyzed by the author based on his extensive previous research in this area and in the context of LDS scriptures and teachings. These two approaches combine to make a powerful witness that life after death is not to be feared. One lady whose account is typical of many of the responses said "I don't think people should be afraid of dying. I've lost all fear of death since my experience." This book makes a major contribution to the field of near death research and it answers many questions about this life and the life to come. Questions about pre-mortal choices the role of pain in mortal experience the effect improper choices made in this life have on one's post-mortal existence the healing power of the Savior's love and the continuation of family life in the hereafter are thoughtfully examined. What emerges with clarity is a strong message of love hope and eternal growth.

and dying Not all these readings are about near death experiences NDEs but all should be read in the Light of NDEs For although I have not had an NDE the Light experienced by those who have including my father now illuminates my life as well as my thoughts At 75 I now see my life as a wandering search for wholeness in the compelling worlds envisioned by secular scientists and spiritual teachers The boy who excelled in science and thought he would be a physicist instead failed as a Christian preacher and became a critical teacher Only now at the end of my life have I discovered what NDEs reveal about both science and spirituality In these readings physicians and other scientists consider how some survivors of cardiac arrest or accidents that have stopped the heart and thus blood flow to the brain nonetheless report vivid memories of Light and Love This evidence falsifies the scientific assumption that consciousness is simply a product of brain activity and verifies that the loss of ordinary consciousness at least for some enables an experience of transcending meaning Cardiologist and NDE researcher Pim van Lommel reports that the enhanced consciousness during an NDE includes nonlocal aspects of interconnectedness such as memories from earliest childhood up until the crisis that caused the NDE and sometimes even visions of the future It offers the chance of communication with the thoughts and feelings of people who were involved in past events or with the consciousness of deceased friends and relatives To explain NDEs van Lommel turns to quantum theory and endorses the not yet commonly accepted interpretation that consciousness determines if and how we experience reality In this view consciousness is nonlocal and the origin or foundation of everything all matter or physical reality is shaped by nonlocal consciousness If this is the case Our endless consciousness predates our birth and our body and will survive death independently of our body in a nonlocal space where time and distance play no role Founders of quantum physics looked to the Eastern spiritual traditions as psychiatrist Diane Hennacy Powell explains Eastern philosophies teach that we live in a sea of unified consciousness that our personal consciousness exists both in and outside our bodies and that our consciousness can travel away from the body during dreams out of body experiences and at death Several of the scientists I quote in this book find in quantum theory a way of explaining how matter and mind unfold from a creative process that is the source of both Social scientist Lawrence LeShan argues Field theory leads as inexorably to a concept of surviving biological death as classical physics does to a concept of total annihilation at bodily death In the sense that all things that were are or will be exist forever in the continuum the individual continues to be Psychiatrist Jim B Tucker writes If the physical universe grows out of consciousness there is no reason to think that a person's individual consciousness ends when the physical brain dies Some NDE survivors report meeting Jesus on the Other Side but most return to the visible world more spiritually awake than actively religious For others whose scientific vocation reinforced a secular view of reality NDEs have given new meaning to God Spiritually transformed by his NDE neurosurgeon Eben Alexander affirms God is present in us at all times Omniscient omnipotent personal and loving us without conditions We are connected as One through our divine link
