Speak Silence Mark L. Greenberg, 1996 Published in 1783 *Poetical Sketches* was William Blake's first volume of poetry and his only published work to appear in letterpress This little book has been relegated by some critics to the periphery of the Blake canon Yet the book's uniqueness and authorship have drawn scholars to it resulting in often illuminating criticism *Speak Silence* continues in this line and represents the first and only collection of essays devoted solely to exploring *Poetical Sketches* Mark Greenberg's critical introduction traces the historical tendency both to denigrate and to praise the *Sketches* The other chapters in this collection written by distinguished scholars Susan J Wolfson Stuart Peterfreund Thomas A Vogler Vincent DeLuca Nelson Hilton and Robert F Gleckner analyze traditional elements of poetry as they appear in the *Sketches* This analysis reveals how fully Blake as a young poet absorbed these elements and how deftly he manipulated and transvalued them in his early ambitious and revolutionary experiments with language voice and rhetorical form This volume also focuses on the *Sketches* politics originality and complex connections with Blake's poetic precursors and with other cultural institutions What is most compelling about *Speak Silence* is the way in which the chapters are in dialogue with one another The collection resembles a conversation between its notable contributors inviting readers to witness the developmental process of particular ideas about Blake's early art and its relation to his later work as they solidify are transformed or dissolve

Folk-taxonomies in Early

English Earl R. Anderson, 2003 A folk taxonomy is a semantic field that represents the particular way in which a language imposes structure and order upon the myriad impressions of human experience and perception Thus for example the experience of color in modern English is structured around an inventory of twelve basic color terms but languages vary in the number of basic color terms used from thirteen or fourteen terms to as few as two or three Anthropological linguists have been interested in the comparative study of folk taxonomies across contemporary languages and in their studies they have sometimes proposed evolutionary models for the development and elaboration of these taxonomies The evolutionary models have implications for historical linguistics but there have been very few studies of the historical development of a folk taxonomy within a language or within a language family Folk Taxonomies in Early English undertakes this task for English and to some extent for the Germanic and Indo European language families The semantic fields studied are basic color terms seasons of the year geometric shapes the five senses the folk psychology of mind and soul and basic plant and animal life forms Anderson's emphasis is on folk taxonomies in Old and Middle English and also on the implications of semantic analysis for our reading of early English literary texts
