Seaweed Memories In The Jaws Of The Sea:

Seaweed Memories Heinrich Becker,2000 This book is very important in conserving part of the heritage of coastal communities in Ireland Seaweeds Ole G. Mouritsen,2013-06-14 Until recently seaweed for most Americans was nothing but a nuisance clinging to us as we swim in the ocean and stinking up the beach as it rots in the sun With the ever growing popularity of sushi restaurants across the country however seaweed is becoming a substantial part of our total food intake And even as we dine with delight on maki miso soup and seaweed salads very few of us have any idea of the nutritional value of seaweed Here celebrated scientist Ole G Mouritsen drawing on his fascination with and enthusiasm for Japanese cuisine champions seaweed as a staple food while simultaneously explaining its biology ecology cultural history and gastronomy Mouritsen takes readers on a comprehensive tour of seaweed describing what seaweeds actually are algae not plants and how people of different cultures have utilized them since prehistoric times for a whole array of purposes as food and fodder for the production of salt in medicine and cosmetics as fertilizer in construction and for a number of industrial end uses to name just a few He reveals the vast abundance of minerals trace elements proteins vitamins dietary fiber and precious polyunsaturated fatty acids found in seaweeds and provides instructions and recipes on how to prepare a variety of dishes that incorporate raw and processed seaweeds Approaching the subject from not only a gastronomic but also a scientific point of view Mouritsen sets out to examine the past and present uses of this sustainable resource keeping in mind how it could be exploited for the future Because seaweeds can be cultivated in large quantities in the ocean in highly sustainable ways they are ideal for battling hunger and obesity alike With hundreds of delectable illustrations depicting the wealth of species colors and shapes of seaweed *Seaweeds Edible Available and Sustainable* makes a strong case for granting these vegetables from the sea a prominent place in our kitchens **Seaweed** Kaori O'Connor,2017-05-15 Some might be put off by its texture aroma or murky origins but the fact of the matter is seaweed is one of the oldest human foods on earth And prepared the right way it can be absolutely delicious Long a staple in Asian cuisines seaweed has emerged on the global market as one of our new superfoods a natural product that is highly sustainable and extraordinarily nutritious Illuminating seaweed s many benefits through a fascinating history of its culinary past Kaori O Connor tells a unique story that stretches along coastlines the world over O Connor introduces readers to some of the 10 000 kinds of seaweed that grow on our planet demonstrating how seaweed is both one of the world s last great renewable resources and a culinary treasure ready for discovery Many of us think of seaweed as a forage food for the poor but various kinds were often highly prized in ancient times as a delicacy reserved for kings and princes And they ought to be prized there are seaweeds that are twice as nutritious as kale and taste just like bacon superfood indeed Offering recipes that range from the traditional to the contemporary taking us from Asia to Europe to the Americas O Connor shows that sushi is just the beginning of the possibilities for this unique plant *On the Ocean* Sir Barry Cunliffe,2017-12-15 For humans the sea is and always has been an alien environment Ever moving and ever

changing in mood it is a place without time in contrast to the land which is fixed and scarred by human activity giving it a visible history While the land is familiar even reassuring the sea is unknown and threatening By taking to the sea humans put themselves at its mercy It has often been perceived to be an alien power teasing and cajoling The sea may give but it takes Why then did humans become seafarers Part of the answer is that we are conditioned by our genetics to be acquisitive animals we like to acquire rare materials and we are eager for esoteric knowledge and society rewards us well for both Looking out to sea most will be curious as to what is out there a mysterious island perhaps but what lies beyond Our innate inquisitiveness drives us to explore Barry Cunliffe looks at the development of seafaring on the Mediterranean and the Atlantic two contrasting seas the Mediterranean without a significant tide enclosed and soon to become familiar the Atlantic with its frightening tidal ranges an ocean without end We begin with the Middle Palaeolithic hunter gatherers in the eastern Mediterranean building simple vessels to make their remarkable crossing to Crete and we end in the early years of the sixteenth century with sailors from Spain Portugal and England establishing the limits of the ocean from Labrador to Patagonia The message is that the contest between humans and the sea has been a driving force perhaps the driving force in human history

On the Ocean Barry W. Cunliffe, 2017 The story of the contest between humans and the sea played out in the Mediterranean and the Atlantic from early prehistory until AD 1500 Transhumance and the Making of Ireland's Uplands, 1550-1900 Eugene Costello, 2020 First full survey of how transhumance operated in Ireland from the sixteenth century to the beginning of the twentieth
