Dokis, 2015-07-01 Oil and gas companies now recognize that industrial projects in the Canadian North can only succeed if Aboriginal communities are involved in decision making processes Are Aboriginal concerns appropriately addressed through current consultation and participatory processes *Where the Rivers Meet* is an ethnographic account of Sahtu Dene involvement in the environmental assessment of the Mackenzie Gas Project a massive pipeline that if completed would have unprecedented effects on Aboriginal communities in the North Carly A Dokis reveals that while there has been some progress in establishing avenues for Dene participation in decision making the structure of participatory and consultation processes fails to meet the expectations of local people by requiring them to participate in ways that are incommensurable with their experiential knowledge and understandings of the environment Ultimately Dokis finds that the evaluation of such projects remains rooted in non local beliefs about the nature of the environment the commodification of land and the inevitability of a hydrocarbon based economy **Men and Bears** AA.VV., 2020-01-23

The time of Carnival represents a wild time at the end of winter and pointing to the beginning of a new season It is characterized by the irruption of border figures animal masks characters which recall the world of the dead and which bring within themselves the germ of a vital force of the energy that produces the reawakening of nature and announces the growth and fertility of the new crops This wild domain shows itself under the shapes of a contiguity between human and animal the costumes the masks refer to a world in which the characteristics of the human and those of the animal are fused and intertwined Among these figures in particular emerge those of the Wild Man the human being who takes on animal like attributes and aspects and of the Bear the animal that more

than all the others gets as close as possible to the human and seems to reflect a deformed image of it. Such symbolic images come from far off times and places to tell a story that belongs to our common origins. The bear assumes attributes and functions alike in very different cultural contexts such as the Sami of Finland or North American hunter gatherers and represents a boundary between the world of nature and the human world between the domain of animals and the difficult construction of humanity a process continued for centuries perhaps millennia and which cannot still be said complete. *The World's Religions* Peter B. Clarke, Peter Beyer, 2009-05-07 This comprehensive volume focuses on the world's religions and the changes they have undergone as they become more global and diverse in form. It explores the religions of the world not only in the regions with which they have been historically associated but also looks at the new cultural and religious contexts in which they are developing. It considers the role of migration in the spread of religions by examining the issues raised for modern societies by the increasing interaction of different religions. The volume also addresses such central questions as the dynamics of religious innovation which is evidenced in the rise and impact of new religious and new spirituality movements in every continent.

The Norse Shaman Evelyn C. Rysdyk, 2016-08-15 An experiential guide to the wisdom preserved in Europe's far north. Includes shamanic journeys to connect with deities and your ancestral shamans. Provides step by step instructions to prepare for and conduct a sei r ceremony. Draws on archaeological evidence and surviving written records from Iceland. Reveals the long tradition of female shamans in northern European shamanism. Shamanism is humanity's oldest spiritual tradition. In much of the Western world the indigenous pre-Christian spiritual practices have been lost. Yet at the northern fringes of Europe Christianity did not displace the original shamanic practices until the end of the Viking age. Remnants of Norse shamanic spirituality have survived in myths, folk traditions and written records from Iceland providing many clues about the ancient European shaman's world especially when examined in conjunction with other shamanic cultures in northern Eurasia such as the Sami and the tribes of Siberia. Reconstructing the shamanic practices of the hunter gatherers of Scandinavia Evelyn Rysdyk explores the evolution of Norse shamanism from its earliest female roots to the pre-Christian Viking Age. She explains how to enter Yggdrasil the World Tree to travel to other realms and provides shamanic journeys to connect with the ancestral shamans of your family tree including the Norse goddess Freyja the very first shaman. She offers exercises to connect with the ancient goddesses of fate the Norns and introduces the overnight wilderness quest of tisetá for reconnecting with the powers of nature. She explains the key concepts of *rl g* and *Wyrd* the two most powerful forces that shape human lives and provides exercises for letting go of harmful behavior patterns and transforming simple knowledge into profound wisdom by connecting with *inn*. Thoroughly examining the shamanic rituals of sei r the oracular magic of the Nordic cultures the author provides step by step instructions to prepare for and conduct a sei r ceremony including creating your own sei r staff and hood and explores the ancestral use of shamanic songs or *var lokur* to accompany the ceremony. Woven throughout these exercises Rysdyk provides archaeological evidence from Neolithic sites supporting the

long tradition of venerating wise women grandmothers and mothers in ancient cultures and the important role of female shamans at the heart of northern European shamanism Providing an accessible guide for anyone trying to fulfill their shamanic callings these powerful rituals can provide personal healing and a clear path for finding our way into a harmonious relationship with the natural world *Human Adaptability* Emilio F. Long, 2025-06-03 In the mid 2000s the Russian government began to merge Siberia's smallest Indigenous territories into larger administrative regions Among Buryat Mongols living to the west of Lake Baikal the state promoted a policy of National Cultural Autonomy which sought to separate culture from territory amid this consolidation of land and people Although public performances of Buryat culture were mobilized to show support for the policy Joseph Long's compelling ethnography provides alternative ways to understand the meanings attached to these displays At the same time the book documents how resurgent local rituals demonstrated enduring ties to the land Drawing on classic theories of ritual and performance *Facing the Fire Taking the Stage* explores how Buryat shamanism and state sanctioned performing arts have allowed Buryats to negotiate and express different kinds of belonging to people and land Based on several years of anthropological fieldwork in Western Buryat communities this book provides new insights into the ways that these forms have influenced one another over time While Buryat experience has been fundamentally shaped by Soviet communism and its aftermath *Facing the Fire Taking the Stage* shows how this history parallels the experience of Indigenous peoples worldwide **A Companion to Rock Art** Jo McDonald, Peter Veth, 2012-06-22 This unique guide provides an artistic and archaeological journey deep into human history exploring the petroglyphic and pictographic forms of rock art produced by the earliest humans to contemporary peoples around the world
