Shamans Of Prehistory Trance And Magic In The Painted Caves:

The Shamans of Prehistory Jean Clottes, 1996 Shamans/neo-Shamans Robert J. Wallis, 2003 Robert J Wallis explores the interface between the new and prehistoric shamans of popular culture and anthropology drawing on interviews with a variety of practitioners particularly contemporary pagans in Britain and north America *Art and Philosophy*, 2025-05-05 Though a field often thought far from the center of contemporary philosophy philosophy of art perhaps more than any other field similarly situated nevertheless enjoys extensive overlap with and points of exchange at that center The last decade has seen a marked resurgence of interest in aesthetics and philosophy of art from those working outside these areas and a reciprocal resurgence of interest in other subfields from philosophers of art Art and Philosophy brings together twenty one original essays at the intersection of art and philosophy These essays are intersectional in two respects Firstly the authors draw meaningful connections between art and philosophy using artworks to motivate support and shape their views Secondly the authors draw connections between the theoretical discipline of aesthetics and philosophy of art on the one hand and the rest of philosophy on the other Some chapters explore philosophical matters by examining art and other aesthetic objects whilst others bring together contemporary thought and research in aesthetics and philosophy of art with important developments in other areas of philosophy The chapters are organized into ten sections These ten sections represent the current issues best exemplifying the productive and informative exchanges that exist at these intersections The topics range from metaphysics and philosophy of language to creativity and love By placing the connection to art at the forefront Art and Philosophy is a testament to the myriad ways art and the philosophy of art intersect and overlap with issues that lie at the core of contemporary philosophy *Evolution and the Emergent Self* Raymond L. Neubauer, 2012 This book examines how humans evolved from the cosmos and prebiotic earth and what types of biological chemical and physical sciences drove this complex process The author presents his view of nature which attributes the rising complexity of life to the continual increasing of information content first in genes and then in brains *Mystery of the White Lions* Linda Tucker, 2010-06-01 The inspiring firsthand account of one woman's journey into African shamanism and the mysteries of the most sacred animal on the continent the legendary White Lion In 1991 Linda Tucker was rescued from a pride of lions in the Timbavati game region by a medicine woman known as the Lion Queen So began Linda's lifelong journey into the wisdom and ceremonies of Old Africa in which humans and lions are able to cross the species barrier Such knowledge is in accordance with the most guarded secrets of Ancient Egypt and humankind's greatest riddle the Sphinx Scientists in our day have established that humankind's most significant evolutionary leap occurred as a result of our ancestors' interaction with great cats The White Lion is a genetic rarity within *Panthera leo* and occurred in just one region on Earth Timbavati Today White Lions form the center of the notorious canned trophy hunting industry hand reared captive lions shot in enclosures for gross sums of money By contrast shamans believe that killing a lion sun god is the ultimate sacrilege How the human species treats such precious

symbols of God in nature may determine how nature treats the human species Whether we view them as prophetic Lions of God or simply as rare genetic mutations the story of the White Lions is a true legend unfolding in our own extraordinary times Inspiring captivating and thoroughly researched **Mystery of the White Lions** is an unforgettable portrait of these magnificent beasts and of the overwhelming love that has driven Linda s every action to save them Through understanding the White Lion we will understand ourselves and our great role in the chain of being Deepak Chopra **Anthropology and Religion** Robert L. Winzeler,2008 Drawing from ethnographic examples found throughout the world this text covers what anthropologists know or think about religion how they have studied it and how they interpret or explain it A key text for students of upper division courses in the anthropological study of religion **Making Scenes** Iain Davidson, April Nowell,2021-04-13 Dating back to at least 50 000 years ago rock art is one of the oldest forms of human symbolic expression Geographically it spans all the continents on Earth Scenes are common in some rock art and recent work suggests that there are some hints of expression that looks like some of the conventions of western scenic art In this unique volume examining the nature of scenes in rock art researchers examine what defines a scene what are the necessary elements of a scene and what can the evolutionary history tell us about storytelling sequential memory and cognitive evolution among ancient and living cultures **Shamanism** Mariko Namba Walter,Eva Jane Neumann Fridman,2004-12-15 A guide to worldwide shamanism and shamanistic practices emphasizing historical and current cultural adaptations This two volume reference is the first international survey of shamanistic beliefs from prehistory to the present day In nearly 200 detailed readable entries leading ethnographers psychologists archaeologists historians and scholars of religion and folk literature explain the general principles of shamanism as well as the details of widely varied practices What is it like to be a shaman Entries describe region by region the traits such as sicknesses and dreams that mark a person as a shaman as well as the training undertaken by initiates They detail the costumes music rituals artifacts and drugs that shamans use to achieve altered states of consciousness communicate with spirits travel in the spirit world and retrieve souls Unlike most Western books on shamanism which focus narrowly on the individual s experience of healing and trance Shamanism also examines the function of shamanism in society from social political and historical perspectives and identifies the ancient continuous thread that connects shamanistic beliefs and rituals across cultures and millennia **Breaking Convention** Cameron Adams,Anna Waldstein,Ben Sessa,David King,2014 Presents essays and articles exploring the history use and benefits of psychedelics from the international conference of the same name **The Human Eros** Thomas M. Alexander,2013-07-01 The Human Eros explores themes in classical American philosophy primarily the thought of John Dewey but also that of Ralph Waldo Emerson George Santayana and Native American traditions Alexander s primary claim is that human beings have an inherent need to experience meaning and value a Human Eros Our various cultures are symbolic environments or spiritual ecologies within which the Human Eros seeks to thrive This is how we inhabit the earth Encircling and sustaining our cultural

existence is nature yet Western philosophy has not provided adequate conceptual models for thinking ecologically Alexander introduces the idea of eco ontology to explore ways in which this might be done beginning with the primacy of Nature over Being but also including the recognition of possibility and potentiality as inherent aspects of existence He argues for the centrality of Dewey's thought to an effective ecological philosophy Both pragmatism and naturalism he shows need to be contextualized within an emergentist relational nonreductive view of nature and an aesthetic imaginative nonreductive view of intelligence
