A  
TEXTBOOK OF URBAN PLANNING AND GEOGRAPHY SHARMA, SAMEER,2020-11-01 Generally textbooks on urban geography and urban planning are based on ideas laid out in the west and are unable to explicitly connect those ideas to the way Indians experience their cities This gap is addressed in this book by reconceptualising Indian urban studies The reconceptualisation is done by dissecting western theories concepts paradigms and principles and practices and placing them alongside how Indians experience their urban landscapes Such a comparative analysis allows readers to break from their past understandings of the structure and dynamics of Indian cities as well as enable researchers to make exploratory hypotheses The book will empower students to craft and implement new approaches unconstrained by orthodox theories and biases Primarily intended for the students of Geography and Urban Planning the book covers the evolution of urban structures and dynamics of settlements in India largely after India s Independence There are seven chapters in the book First three chapters describe and explain the evolution of Indian settlements up to the present The next four chapters focus on regions urban planning urban governance and the social landscape of Indian cities Each chapter ends with a set of short and long answer questions

*Gateways to Globalisation*  
François Gipouloux, 2011-01-01

*Gateways to Globalisation* makes a significant contribution to the understanding of the emerging East Asian regional system of financial centres within the broader global context and how they interact within the global circuits of finance In particular it focuses on the emergence of the financial centres of Tokyo Shanghai Hong Kong and Singapore and the attempts by both national governments and the private sector to position them so that they become more competitive in the global and regional context The volume shows much historical sensitivity showing that while the increase in the importance of these financial centres is principally post 1945 their emergence has been aided by the deep historical roots that go back several centuries The book will be of great value in the interpretation of the role of East Asia in what many commentators have called the Asian Century Terry McGee The University of British Columbia Canada

*Gateways to Globalisation* cogently demonstrates that Hong Kong Singapore Beijing Shanghai and Tokyo operate as gateways to Asia and as linchpins for Asia to the global economy The authors theoretical frameworks and original empirical research support provocative findings that challenge conventional thinking Tokyo may decline as a global city As Beijing and Shanghai ride China's rapid growth they face uncertainty about its future openness to the global economy Vibrant Hong Kong and Singapore confront challenges from other rising centers David Meyer Washington University in St Louis US

This book distinguishes itself in its emphasis on historical and cultural links as well as contemporary globalization processes on large East Asian cities Arising from a research program and four seminars the editor has picked scholars who can relate past and present trends Historical links of Japanese cities are explored Leading world cities in the region are analysed in their evolution from entrepôts to modern gateways service integrators transport hubs and financial centres It is a study of the integration and interrelationships of East Asian cities in the global economy Yue man Yeung Chinese University of Hong Kong

Asia's trading and financial hubs have become global cities which frequently have more in common and closer linkages with each other than with their corresponding hinterlands As this book expounds these global cities illustrate to what extent world trends deeply penetrate and permeate the national territorial interiors and processes that were otherwise presumed to be controlled by the State *Gateways to Globalisation* is soundly based on accurate and extensive research including perspectives from historians economists geographers and sociologists from China Japan Singapore and Hong Kong in order to grasp the regional character of trade and finance beyond national borders and traditional academic frameworks The book documents

that today major urban centres such as Tokyo Beijing Singapore Hong Kong and Shanghai situated on the periphery of the maritime corridor of East Asia form a system characterised by the intensity of their economic linkages and integration into the world economy Since the mid 1980s these major Asian cities have become the worldwide oriented centres for production trade finance and research This collective effort offers in addition to its regional framework up to date information that strengthens an original trans disciplinary analysis of a region and its economic characteristics which will be of interest to readers within academia and beyond This well detailed and thorough work will interest academics and post graduate students in economics geography finance history regional studies and Asian studies as well as those who have a general interest in globalisation Celebrate Main Coursebook 8 , The Global Rules of Art Larissa Buchholz,2022-11-22 A trailblazing look at the historical emergence of a global field in contemporary art and the diverse ways artists become valued worldwide Prior to the 1980s the postwar canon of international contemporary art was made up almost exclusively of artists from North America and Western Europe while cultural agents from other parts of the world often found themselves on the margins The Global Rules of Art examines how this discriminatory situation has changed in recent decades Drawing from abundant sources including objective indicators from more than one hundred countries multiple institutional histories and discourses extensive fieldwork and interviews with artists critics curators gallerists and auction house agents Larissa Buchholz examines the emergence of a world spanning art field whose logics have increasingly become defined in global terms Deftly blending comprehensive historical analyses with illuminating case studies The Global Rules of Art breaks new ground in its exploration of valuation and how cultural hierarchies take shape in a global context The book s innovative global field approach will appeal to scholars in the sociology of art cultural and economic sociology interdisciplinary global studies and anyone interested in the dynamics of global art and culture *Designing Emerging Markets* Giaime Botti,2023-05-22 This book offers a unique glance into the process of globalisation of the architectural practice during the last three decades through the lenses of innovative methodologies in architectural history based on quantitative data Focusing on the golden age of globalisation 1990 2019 it investigates the transnational work of more than one thousand architectural firms of different business models from Europe North America and the Asia Pacific in a broad sample of emerging markets Mainland China South East Asia India the Persian Gulf Sub Saharan Africa Russia and Kazakhstan and Latin America In the book different thematic geographies are presented to explore the global scope of the contemporary profession examine significant projects and the structural conditions behind them and reveal the debates that such works generated Understanding the global agency of design firms in emerging markets also becomes a way to study different market conditions modes of production and architectural trends comparatively and to highlight the shifts that occurred in the profession over the last few decades The use of quantitative methodologies produces a novel and updated narrative on contemporary architecture in emerging markets grounded in quantitative data rather than in preassumptions and purely
