Sidky,2008-01-01 Haunted by the Archaic Shaman critically engages the general discourse on shamanism by using ethnographic data gathered among different ethnic groups in the Nepal Himalayas to address several key conceptual issues and problems in the scholarly field of shamanic studies **The Geologic Model of Religion** Andrew Clifford,2012-07-17 Men are haunted by the vastness of eternity The opening line of the film Troy captures the tragic essence of personal mortality ones passing into oblivion and fading from all memory Since the prehistoric dawn of humanity death has shadowed everyone s footsteps Even into the current scientific era religion has long been the only defense The sole comfort against oblivion offering a promise of new life or even immortality The Geologic Model of Religion is a sympathetic study of this defense from its ancient beginnings drawing upon archaeology anthropology and comparative religion to clearly explain one of the most complex subjects known From the study a new model emerges which Decomposes religion into its distinct worldview and afterlife paradigms Categorizes evidence of belief systems held by prehistoric hunter gatherers culminating in the Temples of Rebirth such as Gobekli Tepe Concludes that spirituality began in the Fertile Crescent 11 000 years ago spreading with the Neolithic revolution throughout the world Shows why judgment in afterlife was the keystone in the emerging edifice of civilization and how it enabled hierarchies overcoming Dunbar s number which limited village sizes Overviews the interaction between science and religion and projects the ultimate fate of religion itself There might be 100 000 books written about religion but the Geologic Model of Religion is unlike any other Drawing upon evidence from anthropology archaeology and scripture religion is divided into worldviews and afterlife paradigms This new model evidences several long lost prehistoric religious belief systems and explains the origin of spirituality in settled societies *A Prehistory of the North* John F. Hoffecker,2005 Annotation Early humans did not drift north from Africa as their ability to cope with cooler climates evolved Settlement of Europe and northern Asia occurred in relatively rapid bursts of expansion This study tells the complex story spanning almost two million years of how humans inhabited some of the

coldest places on earth **Visionary** Graham Hancock,2022 Previously published in 2007 as Supernatural by Disinformation **Born in Africa** Martin Meredith,2011-05-10 Africa does not give up its secrets easily Buried there lie answers about the origins of humankind And yet though vital clues still remain hidden scientists have over the last century transformed our understanding about the beginnings of human life In Born in Africa Martin Meredith follows scientists trail of discoveries about human origins recounting their intense rivalry personal feuds and fierce controversies as well as their feats of skill and endurance And he limns their momentous accomplishments Scientists have identified more than twenty species of extinct humans They have firmly established Africa as the birthplace not only of humankind but also of modern humans They have revealed how early technology language ability and artistic endeavour all originated in Africa and they have shown how small groups of Africans spread out from Africa in an exodus sixty thousand years ago to populate the rest of the world *The Paleolithic Prehistory of the Zagros-Taurus* Deborah Olszewski,1993-01-29 Situated between Europe Asia and the Levantine corridor to Africa the Zagros Taurus region has enormous potential for the study of human adaptation and population movement during the Pleistocene While archaeological work was done in this area 40 years ago much of it remains unpublished The political situation restricts research by archaeologists This volume includes new data and major syntheses of the Paleolithic prehistory of the region with reports of key sites and industries By filling a major gap in our understanding of this area it represents an essential reference for Near Eastern and Paleolithic specialists University Museum Symposium Series V **Encyclopedia of Anthropology** H. James Birx,2006 Focuses on physical social and applied anthropology archaeology linguistics and symbolic communication Topics include hominid evolution primate behaviour genetics ancient civilizations cross cultural studies and social theories *Waging War on War* Giorgio Mariani,2015-12-15 The notion that war plays a fundamental role in the United States idea of itself obscures the rich and by no means naive seam of anti war thinking that winds through American culture Non violent resistance far from being a philosophy of passive dreamers instead embodies Ralph Waldo Emerson s belief that peace can never be defended never be executed by cowards Giorgio Mariani rigorously engages with the essential question of what makes a text explicitly anti war Ranging from Emerson and Joel Barlow to Maxine Hong Kingston and Tim O Brien *Waging War on War* explores why sustained attempts at identifying the anti war text s formal and philosophical features seem to always end at an impasse Mariani moves a step beyond to construct a theoretical model that invites new inquiries into America s nonviolent nonconformist tradition even as it challenges the ways we study U S warmaking and the cultural reactions to it In the process he shows how the ideal of nonviolence and a dislike of war have been significant if nonhegemonic features of American culture since the nation s early days Ambitious and nuanced *Waging War on War* at last defines anti war literature while exploring the genre s role in an assertive peacefighting project that offered and still offers alternatives to violence **Phytochemical Resources for Medicine and Agriculture** H.N. Nigg,D. Seigler,2013-06-29 This book was the result of a symposium held at the American

Chemical Society meeting in Miami Beach Florida September 10 15 1989 The symposium was jointly sponsored by The Society for Economic Botany and the American Chemical Society Food and Natural Product sub division There were five speakers During the social sessions mostly over drinks in a hotel room it became obvious that regardless of the discipline we were all speaking the same language Yet prior to the symposium only a few of the participants knew one another We decided to expand the symposium into a book The book would we hoped accomplish for others what we had discovered in ourselves That is the field of Natural Products is broad but similar in techniques and approach ancient but modern and has been and continues to be extremely valuable to humankind We wanted the book to serve as an introductory text for courses and as a reference work for the future We also determined to include the structure of every chemical in the chapter where it was mentioned so the reader would not have to find the structure somewhere else or to try and deduce the structure from the chemical name Little did we know what an undertaking these goals would be or the time this would take

The Meanings of Things I. Hodder, 2013-11-12 This unique and fascinating book concentrates on the varying roles and functions that material culture may play in almost all aspects of the social fabric of a given culture The contributors from Africa Australia and Papua New Guinea India South America the USA and both Eastern and Western Europe provide a rich variety of views and experience in a worldwide perspective Several of the authors focus on essential points of principle and methodology that must be carefully considered before any particular approach to material culture is adopted One of the many fundamental questions posed in the book is whether or not all material culture is equivalent to documents which can be read and interpreted by the outside observer If it is what is the nature of the messages or meanings conveyed in this way The book also questions the extent to which acceptance and subsequent diffusion of a religious belief or symbol may be qualified by the status of the individuals concerned in transmitting the innovation as well as by the stratification of the society involved Several authors deal with works of art and the most effective means of reaching an understanding of their past significance In some chapters semiotics is seen as the most appropriate technique to apply to the decoding of the assumed rules and grammars of material culture expression

New Developments in the Bioarchaeology of Care Lorna Tilley, Alecia A. Schrenk, 2016-08-22 New Developments in the Bioarchaeology of Care evaluates refines and expands existing concepts and practices in the developing field of bioarchaeological research into health related care provision in the past Evidence in human remains that indicates an

individual survived with or following a serious pathology suggests this person most likely received some form of care from others This observation was first made half a century ago but it is only in the last five years that health related caregiving has been accepted as a topic for bioarchaeology research In this time interest has grown exponentially A focus on care provides a dynamic framework for examining the experiences of disease and disability in the past at the level of the individual receiving care and that of the community providing it When caregiving can be identified in the archaeological record bioarchaeologists may be able to offer unique insights into aspects of past lifeways This volume represents the work of an international diverse cross disciplinary group of contributors each bringing their own particular focus style and expertise to analyzing past health related care Nineteen chapters offer content that ranges from an introduction to the basic bioarchaeology of care approach through original case studies of care provision to new theoretical perspectives in this emerging area of scholarship This book creates a synergy that challenges our thinking about past health related care behaviors and about the implications of these behaviors for understanding the social environment in which they took place **Fire in the Stone** Nicholas

Ruddick,2012-01-01 The genre of prehistoric fiction contains a surprisingly large and diverse group of fictional works by American British and French writers from the late nineteenth century to the present that describe prehistoric humans Nicholas Ruddick explains why prehistoric fiction could not come into being until after the acceptance of Charles Darwin s theories and argues that many early prehistoric fiction works are still worth reading even though the science upon which they are based is now outdated Exploring the history and evolution of the genre Ruddick shows how prehistoric fiction can offer fascinating insights into the possible origins of human nature sexuality racial distinctions language religion and art The book includes discussions of well known prehistoric fiction by H G Wells Jules Verne J H Rosny A n Jack London William Golding Arthur C Clarke and Jean M Auel and reminds us of some unjustly forgotten landmarks of prehistoric fiction It also briefly covers such topics as the recent boom in prehistoric romance notable prehistoric fiction for children and young adults and the most entertaining movies featuring prehistoric humans The book includes illustrations that trace the changing popular images of cave men and women over the past 150 years *Theory and Practice in the Bioarchaeology of Care* Lorna

Tilley,2015-08-28 This book provides the first comprehensive introduction to and explanation of the theory and practice of the bioarchaeology of care an original fully theorised and contextualised case study based approach designed to identify and interpret cases of care provision in prehistory The applied methodology comprises four stages of analysis each building on the content of the preceding one s which provide the framework for this process Theory and Practice in the Bioarchaeology of Care is the primary source of information on this new approach and serves as a manual for its implementation It elaborates the foundations on which the bioarchaeology of care is constructed it leads the reader through the methodology and it provides three detailed examples of prehistoric caregiving which illustrate how bioarchaeology of care analysis has the capacity to reveal aspects of past group and individual identity and lifeways which might otherwise have remained unknown
