north of the San Fernando Valley NorCalMod dispels that notion in a copiously illustrated history showcasing extraordinary examples of its proud contribution to the Bay Area and environs As a style modernist architecture was hotly debated in its day why create modern structures where such distinctive Victorian and Arts and Crafts buildings already existed pulling heavyweights such as Frank Lloyd Wright Lewis Mumford and Walter Gropius into the fray Ultimately that existing Bay Region Style would remain the area s architectural hallmark but not before hundreds of important modernist projects many still standing yet unjustly neglected today had been established The remarkable photos in this book open our eyes to a long lost chapter in the history of California architecture and make NorCalMod a volume to be enjoyed by those interested in

Metroburbia, USA Paul L Knox,2008-06-19 Decades of economic prosperity in the United States have redefined the

American dream Paul Knox explores how extreme versions of this dream have changed the American landscape Increased wealth has led America s metropolitan areas to develop into vast sprawling regions of metroburbia fragmented mixtures of employment and residential settings combining urban and suburban characteristics Upper middle class Americans are moving into larger homes in greater numbers which leads Knox to explore the relationship between built form and material culture in contemporary society He covers changes in home design real estate the work of developers and the changing wishes of consumers Knox shows that contemporary suburban landscapes are a product of consumer demand combined with the logic of real estate development mediated by design and policy professionals and institutions of governance Suburban landscapes not only echo the fortunes of successive generations of inhabitants Knox argues they also reflect the country s changing core values Knox addresses key areas of concern and importance to today s urban planners and suburban residents including McMansions traffic disasters house design homeowner s associations exclusionary politics and big box stores Through the inclusion of examples and photos Metroburbia USA creates an accessible portrait of today s suburbs supported by data anecdotes and social theory It is a broad interpretation of the American metropolitan form that looks carefully at the different influences that contribute to where and how we live today

#### **Feeding Barcelona, 1714-1975**

Montserrat Miller, 2015-01-12 The food markets of Barcelona host thousands of customers daily from tourists eager to sample fresh fruits and grilled seafood to neighborhood cooks in search of high quality ingredients While other countries experienced major shifts away from the public market model in the twentieth century Barcelona s food markets remained fundamental to the city s identity economy and culture Montserrat Miller s Feeding Barcelona 1714 1975 examines the causes behind the extraordinary vibrancy and tenacity of the Barcelonan market system Miller argues that recurrent revolutionary uprisings in Barcelona beginning in the mid eighteenth century forced ongoing collaboration between the public and private sectors to ensure adequate and effective food distribution Municipal support permitted small scale food sellers in Barcelona to survive in a period more commonly characterized by increasing capitalization in food retail while the importance of food markets to Barcelona s social networks enhanced vendors ability to recognize and adapt to changing customer demands In addition a high number of stalls owned by women contributed both to the financial well being of vendor families and to the sociability patterns that placed neighborhood food markets at the center of daily life in the city The shared commitment of vendors shoppers and government officials to a market model of food sales created the lasting and unique market system that persists in Barcelona to this day Drawing from extensive archival research and numerous interviews with individuals at all levels of the market system Feeding Barcelona 1714 1975 is the first detailed history of the historical and social influences that create urban food markets

#### **Compositional Intelligence**

Daniel Koehler, 2025-09-12 With a foreword by Mario Carpo Given the extensive data sources represented by urban environments this book investigates the potential of architecting for cities using large scale models the technological underpinning of Generative AI Koehler examines Large Language Models LLMs in

relation to architectural questions of typology those critical junctures where architecture engages with the city itself Typology becomes the interface between an AI model and its modeled audiences represented languages and scales of operation The investigation reveals how LLMs represent a fundamental shift from comprehending discrete elements to understanding entire languages introducing a stochastic perspective that transforms how we read and shape urban reality At the heart of this framework lies the concept of inductive types threshold interfaces that superpose multiple value regimes and actively reconfigure themselves in response to changing urban conditions By treating architecture as a form of representational materialism rather than a fixed language designers can engage with complex urban systems while maintaining critical agency This approach envisions architecture as an embedding of languages where buildings become processors of information that compute through their spatial arrangements The synthetic knowledge produced by LLMs enables access to plural values and stakeholder perspectives allowing architects to participate in broader material ecologies through computational superposition rather than traditional dialectical methods Providing a robust theoretical framework as well as practical insights into how architects can adapt their notational tools and design processes to embrace AI this will be an essential read for any practicing or researching architect or urban designer interested in the implications of AI on the built environment
