The Changing Shape of Politics Jonathan Wheatley, 2018-12-17 This book investigates whether politics in Britain in the twenty first century is driven more by issues of culture and identity than by left versus right issues of wealth distribution Drawing from a number of opinion surveys it explores the shifting positions of voters on both economic matters and matters of culture and identity It finds that between 2015 and 2017 support for Britain s main political parties became much more predicated on issues of culture and identity reflecting a radical change in how parties attract voters In the longer term it suggests that issues of culture and identity have become more salient overall possibly because of the oft cited divide between winners and losers of globalisation The book ends by speculating on why politics has become more polarised on these issues rather than on the economic fallout of globalisation and suggests that an explanation is to be found in changing forms of political communication between voters and politicians
