Moore, 2016-04-01. The musicological study of popular music has developed particularly over the past twenty years into an established aspect of the discipline. The academic community is now well placed to discuss exactly what is going on in any example of popular music and the theoretical foundation for such analytical

work has also been laid although there is as yet no general agreement over all the details of popular music theory. However, this focus on the what of musical detail has left largely untouched the larger question so what. What are the consequences of such theorization and analysis? Scholars from outside musicology have often argued that too close a focus on musicological detail has left untouched what they consider to be more urgent questions related to reception and meaning. Scholars from inside musicology have responded by importing into musicological discussion various aspects of cultural theory. It is in that tradition that this book lies although its focus is slightly different. What is missing from the field at present is a coherent development of the what into the so what of music theory and analysis into questions of interpretation and hermeneutics. It is that fundamental gap that this book seeks to fill. Allan F. Moore presents a study of recorded popular song from the recordings of the 1920s through to the present day. Analysis and interpretation are treated as separable but interdependent approaches to song. Analytical theory is revisited covering conventional domains such as harmony, melody and rhythm but does not privilege these at the expense of domains such as texture, the soundbox, vocal tone and lyrics. These latter areas are highly significant in the experience of many listeners but are frequently ignored or poorly treated in analytical work. Moore continues by developing a range of hermeneutic strategies largely drawn from outside the field, strategies originating in the most part within psychology and philosophy but still deeply rooted in musicology. *ISMIR 2008* Juan Pablo Bello, Elaine Chew, Douglas Turnbull, 2008

[The Acoustic Environment of Care Homes](#) Jingyi Mu, Jian Kang, 2025-02-21 This book examines the indoor acoustic environment of China's care homes. Chapter 1 provides a brief introduction to the current situation in China's care homes. This includes the distribution, size, demand and future development direction of these facilities. The chapter then presents an in-depth introduction and analysis of the indoor environment of these facilities, especially the acoustic environment. In Chapter 2, a case study and site investigation are described and these are used to analyse the current state of the acoustic environment in these facilities, including the sound pressure level (SPL) and reverberation time (RT). Chapter 3 details the perceptions of the elderly regarding the acoustic environment of care homes and the correlation between the sound environment and other physical environments at the facilities. Chapter 4 presents the impact of the acoustic environment on the well-being of elderly residents and an analysis of the effects of different sound sources on the activities of the elderly. The effects of the acoustic environment on physiological indices of the elderly under different sound sources in care homes are analysed in Chapter 5. Finally, in Chapter 6, certain improvement strategies for the indoor acoustic environment of care homes are proposed based on the analysis. This book is a comprehensive exposition of research on the acoustic environment of care homes in China and is useful reading for researchers in acoustics, architecture design, engineering and healthcare facilities. It could also be used as a scientific introduction for readers interested in this field.

[Professor Lundy's Guide to Rock Music Connoisseurship](#) Duane Emerson Lundy, 2023-10-20 This empirical and theoretical book should be of interest to anyone who dares to consider the contentious topic of measuring and justifying

aesthetic value in music as well as the issue of how experts compare to nonexperts in terms of aesthetic fluency aesthetic sensitivity and aesthetic judgment in appraising music The book should be both practical and personal for anyone who has a music collection and loves to see it grow continuously but wisely What makes someone an expert The key issue tackled here is how one develops into such a connoisseur of music Overall the book should spark much healthy debate about rock music quality and aesthetics in general both among scholars of aesthetics and the musically passionate general public Many of the ideas for connoisseur development for music could also be applied to appraisal in other areas of aesthetics beyond music such as films visual art or literature Words of Praise Professor Lundy's Guide to Rock Music Connoisseurship is simply fantastic It is written with elegance eloquence and passion His vast knowledge of rock n roll will enlighten every reader and his enthusiasm for this topic is infectious The book is designed to be comprehensible to any reader but also carefully cited to please the most demanding scholar He successfully aims to teach the reader how to become expert in evaluating the aesthetic quality of music using a precision system to guide us into deeper and defensible judgements on what pieces of music are the best and which are the worst This is a beautiful book that enriches the heart and brightens the mind Rhett Diessner Professor Emeritus of Psychology Lewis Clark State College author of Understanding the Beauty Appreciation Trait Empirical Research on Seeking Beauty in All Things Aesthetic judgments of music are important but poorly understood To the everyday listener they may seem arbitrary or otherwise inexplicable In this book Professor Lundy offers an unashamedly positive view on aesthetic judgments emphasizing their rational nature and showing how various non aesthetic biases that do exist can be minimized The result is a joyful celebration of music science and connoisseurship which is sure to spark further interest and debate on this fascinating topic Professor Patrik N Juslin Music Psychology Group Uppsala University Sweden
