Sharing Care Robert Ziegler,Andrew Bush,2013-05-13 A clinician faces a multitude of considerations when assessing a child patient Foremost among these is that caring for the child entails caring for the family members involved with that child The therapist must balance the competing needs and feelings of the child parents and family as a whole By forming an alliance with all members of the family the therapist is in a position to strengthen and enhance the ties between child parents and family during all phases of assessment and treatment leading to a more effective therapeutic intervention Paving the Way for Children s Success offers a model that will help clinicians achieve this alliance The model presented in this book focuses on ways to integrate child assessment and treatment with that of their parents and families level of function It uses the authors unique concept of the Zones of Care to help clinicians assess this level of function In turn each of the four zones leads to a specific approach to treatment The authors present how these treatment approaches to current internalizing and externalizing disorders in children and adolescents allow clinicians to integrate a wide variety of techniques to address most DSM IV categories Their approach stresses both symptom reduction and the cultivation of coping skills It also integrates fiscal issues of treatment into the development of the alliance with the parents in resolving the presenting problem Dr Ziegler and Dr Bush present the reader with practical workable strategies for laying down strong diagnostic foundations for successful treatment making Paving the Way for Children s Success a valuable resource for any clinician working with

children and adolescents International Bulletin of Bibliography on Education ,1994 **Empowering Play in Primary Education** Aimee Durning,Sara Baker,Paul Ramchandani,2024-07-31 The education system does not always promote or give primacy to play within the curriculum yet research and policy alike acknowledge the importance of play for children and young people Empowering Play in Primary Education addresses this issue contributing innovative ideas about how teachers teaching assistants and children may incorporate play within the classroom while also advocating for its use as a powerful tool for ensuring successful learning outcomes Packed with imaginative ideas and practical suggestions this essential book combines theory with tried and tested practice to encourage and inspire teachers to make use of the pedagogy of play and enhance their children s learning experience Topics explored within the book include but are not limited to Playful enquiry exploring the relationship between academic research and practitioner wisdom Practices of play within different settings Inclusive practice for play in the primary school Designing a high quality low cost model for play in the Early Years Play within the wider school community e g playful leadership and pedagogy as play This is an essential read for any teacher teaching assistant headteacher senior leader or policy maker who wishes to embed more opportunities for play within their curriculum and school Humor and Laughter, Playfulness and Cheerfulness: Upsides and Downsides to a Life of Lightness Willibald Ruch,Tracey Platt,René T. Proyer,Hsueh-Chih Chen,2019-08-12 The emergence of Positive Psychology has highlighted the importance of studying the good life and how to attain it Positive life outcomes such as well being thriving flourishing and happiness were discussed and investigated Among them different orientations to happiness were identified such as a life of pleasure life of meaning and life of engagement Other outcomes such as subjective and objective fulfillment in life or societal recognition have been less studied Among the characteristics that facilitate positive outcomes the VIA classification of strength and virtues distinguishes 24 strengths with humor playfulness being one of them Only a small segment of humor entered the definition of humor as character strengths namely the parts that contain some goodness Humor as a character strength facilitates a lot of positive outcomes such as positive emotions and positive relationships and there is a lightness accompanying humor playfulness The field is broader though and transcends the definition of humor as used in positive psychology in at least two ways First there is actually a family of overlapping but still distinct concepts with different research traditions We include next to humor and types of humor also laughter playfulness and cheerfulness We think that more research is needed on how they do overlap and what makes them distinct Second while positive psychology is interested in the goodness of we do want to stress that there is the need to study the non virtuous parts as well That is laughter may not only be expressing amusement but scorn directed at people humor may be benevolent but there is also sarcasm and playfulness may elicit positive emotions but also risk prone and immature types of behavior Therefore the aim of this Research Topic was to collect current perspectives on humor playfulness laughter and cheerfulness in both adults and children to study their full diversity but also interrelations and overlapping features to introduce new instruments or ways for

their assessment in future studies and to study their causes and consequences in a variety of life domains We encouraged studies on differences due to gender or nationality the embodiment in different groups e g class clowns psychiatric patients or whether or not they can be trained We also welcomed contributions from adjacent disciplines e g education leisure studies or therapy counseling and different regions of the earth The outcome is a set of 33 manuscripts from altogether 101 authors Not all areas are covered and not all aims were met while we made progress there is much left to do In this sense the merging of these topics may be the first milestone but like every milestone it only marks the beginning of a long journey

Kids Can Be Kids Shelly J Lane, Anita C Bundy, 2011-11-11 This groundbreaking text by two noted educators and practitioners with contributions by specialists in their fields presents a comprehensive evidence based approach to pediatric therapy Their work reflects the focus of practice today facilitating the participation of children and their families in everyday activities in the content of the physical and cultural environments in which they live go to school and play The authors describe the occupational roles of children in an ecocultural context and examine the influence of that context on the participation of a child with physical emotional or cognitive limitations

Play development in children with disabilities Serenella Besio, Daniela Bulgarelli, Vaska Stancheva-Popkostadinova, 2016-01-01 This book is the result of the first two year work of Working Group 1 of the network LUDI Play for children with disabilities LUDI is an Action 2014 2018 financed by COST it is a multidisciplinary network of more than 30 countries and almost 100 researchers and practitioners belonging to the humanistic and technological fields to study the topic of play for children with disabilities within the framework of the International Classification of Functioning Disability and Health WHO 2001 The principal objective of this book is to bring the LUDI contribution to the important topic of play in children with disabilities because today an international consensus on the definition of play and disabilities is still lacking The process of ensuring equity in the exercise of the right to play for children with disabilities requests three actions to approach this topic through a common language at least all over Europe to put play at the centre of the multidisciplinary research and intervention regarding the children with disabilities to grant this topic the status of a scientific and social theme of full visibility and recognized authority Children with disabilities face several limitations in play due to several reasons impairments playgrounds toys and other play tools that are not accessible and usable environments and contexts that are not accessible nor inclusive lack of educational awareness and intentionality lack of specific psycho pedagogical and rehabilitative competence lack of effective intervention methodologies Moreover disabled children s lives are dominated by medical and rehabilitative practices in which play is always an activity aiming to reach an objective or to provoke an improvement play for the sake of play is considered a waste of time The concept of play for the sake of play strongly refers to the distinction between play activities and play like activities Play activities are initiated and carried out by the player alone with peers with adults etc for the only purpose of play itself fun and joy interest and challenge love of race and competitionilinx and dizziness etc They have of course consequences on growth and development but these

consequences are not intentionally pursued Play like activities are initiated and conducted by an adult with one or more children in educational clinical social contexts they are playful and pleasant but their main objective is other than play e.g cognitive learning social learning functional rehabilitation child s observation and assessment psychological support psychotherapy etc This book then contributes to a clear distinction between play and play like activities that hopefully will bring to new developments in play studies
