Shark Attacks Alex MacCormick, 2025-06-25 More horrifying than Jaws because it's true Since 1990 there have been 283 shark attacks worldwide 40 of which were fatal In the past 15 years reports of shark attacks have substantially increased Over half the attacks occur in water no deeper than five feet Believe it or not shark attacks are still a very real threat to humans These unspeakably bloody encounters happen in shallow water in safe areas to people just like you people who thought it could never happen to them HONG KONG 1995 A forty five year old woman swimming in shallow water with fifty other people has one leg and one arm ripped off by the shark she dies before reaching the hospital CALIFORNIA 1993 A man snorkeling with friends is swallowed headfirst halfway down his body luckily the shark spits him back out with only bite wounds AUSTRALIA 1993 A professional diver and mother of five is literally torn in half in front of her horrified family by a fifteen foot great white shark HAWAII 1991 Two vacationing friends out for a swim suddenly see a shark the size of a car swim by After one of the women begins thrashing in panic the shark attacks and kills her her body is later recovered with several limbs missing Read on for more blood chilling accounts of people who fell prey to SHARK ATTACKS

Sharks in the Arts Vivienne Westbrook, Shaun Collin, Dean Crawford, Mark Nicholls, 2018-05-11 This book is the most thorough exploration to date of the many ways in which a wild creature has been absorbed reimagined and represented across the ages in all of the major art forms The authors consider not only how the identity of sharks in the natural environment became incorporated into a cultural environment but also how sharks came to be considered the most feared creatures in the open oceans as a consequence of this incorporation Yet sharks are especially important in helping to maintain a balance that is essential to the health of the oceans The book begins with a treatment of the three sharks at the top of global shark attack files from scientific economic and environmental perspectives Subsequent chapters engage with cultural representations of sharks in poetry drama art novels screenplay adaptations and films Through an exploration of the ways in which sharks have been represented in human culture through the centuries this book alerts the global community to the importance of sharks as a common cultural heritage It aims to change perceptions of sharks so that they can become more revered than feared The authors of this book argue that an increased understanding of sharks should lead to the development of better strategies for shark and human interactions This book will be of great interest to researchers and students of the Environmental Humanities Cultural History and the Arts It is also excellent supplementary reading for courses in Zoology and Marine Science

Doug Pratt's DVD Douglas Pratt, 2005 Doug Pratt is the leading reviewer of DVDs a contributor to Rolling Stone and editor and publisher of The DVD Laserdisc Newsletter Choice says Pratt's writing is amusing comprehensive and informative Rolling Stone calls this two volume set the gold standard on all things DVD The set is unique in giving space to non feature film DVDs the fastest growing area of the market Not just a reference book it's also good reading

The Mammoth Book of Shark Attacks Alex MacCormick, 2013-11-07 The biggest ever selection of first hand accounts and news reports of shark attacks both recent and historical shows how sharks are masters of the ocean and how we enter their

domain at our own risk Think you re safe in the Med Read about the Great Whites that thrive near holiday beaches Think you re safe in large groups Read about the sinking of the USS Indianapolis in 1945 when hundreds of sailors floated for days in shark infested waters being picked off one by one Think you re safe at home Read about the 69 year old man taking his regular evening swim jumping off his backyard dock straight into the mouth of a bull shark Many more extraordinary and gruesome accounts including the shark boat skipper who slit open the belly of a 360 kg tiger shark only to have a human head pelvis and arm come tumbling out provide horrific and moving tales of shark encounters The courage of survivors and those who have risked their lives to save shark attack victims is truly inspirational Where can you find sharks Features on different shark species with illustrations fact boxes and maps show where they lurk around the world Also included are a selection of full colour photographs and special sections on the life cycle of a shark how to avoid a shark attack and how to survive one

Sharks in the Shallows: Attacks on the Carolina Coast Clay Creswell,Registered Environmental Health Specialist Clay Creswell,2021-06-14 Powerful and mysterious sharks inspire both fascination and fear Worldwide oceans are home to some five hundred species and of those fifty six are known to reside in or pass through the waters off the coast of both North and South Carolina At any given time waders swimmers and surfers enjoying these waters are frequently within just one hundred feet of a shark While it s unnerving to know that sharks often swim just below the surface in the shallows Clay Creswell a shark bite investigator for the Shark Research Institute s Global Shark Attack File explains that attacks on humans are extremely rare In 2019 the International Shark Attack File confirmed sixty four unprovoked attacks on humans including three in North Carolina and one in South Carolina While acknowledging that they pose real dangers to humans Creswell believes the fear of sharks is greatly exaggerated During his sixteen year association with the Shark Research Institute he has investigated more than one hundred shark related incidents and has maintained a database of all shark human encounters along the Carolina coastlines back to 1817 Creswell uses this data to expose the truth and history of this often sensationalized topic Beyond the statistics related to attacks in the Carolina waters **Sharks in the Shallows** offers a history of shark human interactions and an introduction to the world of shark attacks Creswell details the conditions that increase a person s chances of an encounter profiles the three species most often involved in attacks and reveals the months and time of day with the highest probability of an encounter With a better understanding of sharks responses to their environment and what motivates them to attack humans he hopes people will develop a greater appreciation of the invaluable role sharks play in our marine environment

Federal Register ,2013-07 The Use of CITES for Commercially-exploited Fish Species Solène Guggisberg,2015-12-11 This book examines the legality adequacy and

efficacy of using the Convention on International Trade in Endangered Species of Wild Fauna and Flora CITES for commercially exploited fish species and assesses whether the existing institutional cooperation with the Food and Agriculture Organization FAO and regional fisheries management organizations RFMOs is efficient This case study also provides an interesting lens to approaching wider international law issues Indeed finding ways to achieve effective governance of transboundary or global natural resources is central to the peaceful use of oceans and land Furthermore the role of science in advising decision makers is a sensitive issue which deserves scrutiny and is similar in many regimes Finally the complex problem of fragmentation of international law is acute in various fields of environmental law as in all rapidly developing areas of international regulations *Naval Research Reviews* ,1988
