Sharks Jellyfish And Other Deadly Things:

Slippery Slopes & Other Deadly Things Nancy Tesler, 2003 Biofeedback specialist single mom and very amateur sleuth Carrie Carlin is up to her neck in snow sex and strangulation when her pain and stress management conference is abruptly terminated by murder at a ski resort *Mystery Women, Volume Three (Revised)* Colleen Barnett, 2010-12-31 Like other fictional characters female sleuths may live in the past or the future They may represent current times with some level of reality or shape their settings to suit an agenda There are audiences for both realism and escapism in the mystery novel It is interesting however to compare the fictional world of the mystery sleuth with the world in which readers live Of course mystery readers do not share one simplistic world They live in urban suburban and rural areas as do the female heroines in the books they read They may choose a book because it has a familiar background or because it takes them to places they long to visit Readers may be rich or poor young or old conservative or liberal So are the heroines What incredible choices there are today in mystery series This three volume encyclopedia of women characters in the mystery novel is like a gigantic menu Like a menu the descriptions of the items that are provided are subjective Volume 3 of *Mystery Women* as currently updated adds an additional 42 sleuths to the 500 plus who were covered in the initial Volume 3 These are more recently discovered sleuths who were introduced during the period from January 1 1990 to December 31 1999 This more than doubles the number of sleuths introduced in the 1980s 298 of whom were covered in Volume 2 and easily exceeded the 347 series and some outstanding individuals described in Volume 1 which covered a 130 year period from 1860 1979 It also includes updates on those individuals covered in the first edition changes in status short reviews of books published since the first edition through December 31 2008 *Sleuths in Skirts* Frances A. DellaCava, Madeline H. Engel, 2002 This volume is a comprehensive collection of critical essays on *The Taming of the Shrew* and includes extensive discussions of the play's various printed versions and its theatrical productions Aspinall has included only those essays that offer the most influential and controversial arguments surrounding the play The issues discussed include gender authority female autonomy and unruliness courtship and marriage language and speech and performance and theatricality *The Publishers Weekly*, 1999

Shark Trouble Peter Benchley, 2002-06-04 Drawing on more than three decades of experience writing about sharks and other marine animals the bestselling author of Jaws combines high adventure with practical information in a book that is at once a thriller and a valuable guide to being safe in on under and around the sea Shark attacks on human beings generate a tremendous amount of media coverage Benchley writes partly because they occur so rarely but mostly I think because people are and always have been simultaneously intrigued and terrified by sharks Sharks come from a wing of the dark castle where our nightmares live deep water beyond our sight and understanding and so they stimulate our fears and fantasies and imaginations Benchley describes the many types of sharks including the ones that pose a genuine threat to man what is and isn t known about shark behavior the odds against an attack and how to reduce them even further all reinforced with the lessons he has learned the mistakes he has made and the personal perils he has encountered while producing television documentaries bestselling novels and articles about the sea and its inhabitants He tells how to swim safely in the ocean how to read the tides and currents what behavior to avoid and how to survive when danger suddenly strikes He discusses how to tell children about sharks and the sea and how to develop in young and old alike a healthy respect for the ocean As Benchley says The ocean is the only alien and potentially hostile environment on the planet into which we tend to venture without thinking about the animals that live there how they behave how they support themselves and how they perceive us I know of no one who would set off into the jungles of Malaysia armed only with a bathing suit a tube of suntan cream and a book and yet that s precisely how we approach the oceans No longer Not after you ve read Shark Trouble
