**An Illustrated Pocket Guide to the Sharks of the World** David A. Ebert, Sarah Fowler, Sarah L. Fowler, 2014-06-16 Sharks are probably the most misunderstood animals on the planet We all still have a lot to learn about these fascinating creatures which are sadly more seriously threatened with extinction and in greater need of conservation and management action than any other major group of vertebrates We have produced this guide not just because we and so many other people love sharks It is also because their identification whether of living animals

fishery catches or body parts sold at markets is an essential tool to support shark conservation fisheries management and international trade regulation prevent further depletion of stocks and enable their recovery the first pocket guide to all 501 shark species all species illustrated and described handy compact format with concise text a six page guide to shark teeth identification an eight page guide to the identification of the shark fins most commonly encountered in the fin trade Colour plates are by Marc Dando from the hugely acclaimed Sharks of the World A Fully Illustrated Guide *World Swordfish Fisheries: Latin America, pt. Bonner Bridge, Bridge No.11 Over Oregon Inlet, Dare County* ,2008 *A Preliminary Evaluation of the Status of Shark Species* José Ignacio Castro,Christa M. Woodley,Rebecca L. Brudek,Food and Agriculture Organization of the United Nations,1999 The status of shark species is reviewed based on the available data A review of the history of shark fisheries demonstrates that intensive shark fisheries are not sustainable Numerous problems are encountered in assessing shark populations a general lack of biological and fishery data lack of suitable models and lack of validated age estimates Sharks have an unusual combination of biological characteristics slow growth and delayed maturation long reproductive cycles low fecundity and long life spans These characteristics make them vulnerable to overfishing A preliminary evaluation of the status of shark species is made on the basis of historical data the reproductive potential of each species and the level of exploitation of the species In this document exploited shark species are classified numerically according to their vulnerability The majority of these species are listed as Category 1 indicating that there are not sufficient data to assess the species Available data indicate that sharks are very vulnerable and are threatened by overexploitation in many parts of the world
