Glinski, 2021-11-16 Thousands of birdwatchers come to Arizona each year seeking rare or intriguing species and for those watching the skies the additional sighting of a bird of prey is a reward in itself The Grand Canyon state boasts the most dramatic assortment of raptors in North America hawks eagles falcons kites and owls plus vultures and condors Here can be found nearly all the raptor species of the continental United States and also established populations of species associated with Mexico such as the Gray Hawk Common Black Hawk Zone-tailed Hawk and Whiskered Screech Owl Arizona's raptors are found in an unrivaled diversity of habitats from saguaro cactus forests where tiny Elf Owls nest to the Vermilion Cliffs where the gigantic California Condor was introduced in 1996 Yet many species live in habitats that are now jeopardized by degradation or development making an understanding and appreciation of raptors crucial to their survival The Raptors of Arizona brings

together the knowledge and insights of 29 raptor and wildlife authorities who provide original information and syntheses on Arizona's 42 raptor species with an emphasis on aspects of their natural history in Arizona. A chapter on each bird includes its description, a range map and information on its distribution, habitat, life history and status. Additional chapters cover conservation, habitats, where and when to watch raptors and the sport of falconry. The book is enhanced by 42 full color illustrations by Richard Sloan, one of the premier wildlife artists in North America whose paintings were commissioned by the Arizona Wildlife Foundation specifically for this project. Co-published with the Arizona Game and Fish Department.

*Pete Dunne's Essential Field Guide Companion* Pete Dunne, 2013-01-08 From the award-winning birder and author of *Birds of Prey*, an authoritative information-packed guide to distinguishing North American birds. In this book, bursting with more information than any field guide could hold, the well-known author and birder Pete Dunne introduces readers to the Cape May School of Birding. It's an approach to identification that gives equal or more weight to a bird's structure and shape and the observer's overall impression, often called GISS for General Impression of Size and Shape, than to specific field marks. After determining the most likely possibilities by considering such factors as habitat and season, the birder uses characteristics such as size, shape, color, behavior, flight pattern and vocalizations to identify a bird. The book provides an arsenal of additional hints and helpful clues to guide a birder when even after a review of a field guide, the identification still hangs in the balance. This supplement to field guides shares the knowledge and skills that expert birders bring to identification challenges. Birding should be an enjoyable pursuit for beginners and experts alike, and Pete Dunne combines a unique playfulness with the work of identification. Readers will delight in his nicknames for birds: from the Grinning Loon and Clearly the Bathtub Duck to Bronx Petrel and Chicken Garnished with a Slice of Mango and a Dollop of Raspberry Sherbet.
