Long Waves Of Regional Development:

Long Waves of Regional Development Michael Marshall, 1985 Local and Regional Development Andy Pike, Andrés Rodríguez-Pose, John Tomaney, Andrés Rodríguez-Pose, 2006-11-22

Local and regional development is an increasingly global issue. For localities and regions, the challenge of enhancing prosperity, improving wellbeing, and increasing living standards has become acute. For localities and regions formerly considered discrete parts of the developed and developing worlds, amid concern over the definitions and sustainability of development, a spectre has emerged of deepened unevenness and sharpened inequalities in the development prospects for particular social groups and territories. Local and Regional Development engages and addresses the key questions: what are the principles and values that shape definitions and strategies of local and regional development? What are the conceptual and theoretical frameworks capable of understanding and interpreting local and regional development? What are the main policy interventions and instruments? How do localities and regions attempt to effect development in practice? What kinds of local and regional development should we be pursuing? This book addresses the fundamental issues of what kind of local and regional development and for whom. Frameworks of understanding and instruments and policies. It outlines what a holistic, progressive and sustainable local and regional development might constitute, before reflecting on its limits and political renewal. With the growing international importance of local and regional development, this book is an essential student purchase, illustrated throughout with maps, figures, and case studies from Asia, Europe, and Central and North America.

Long Waves of Growth, Hegemonic Power, and Climate Change in the World Economy Phillip Anthony O'Hara, 2025-10-02

This book investigates eras of major geopolitical and socioeconomic power development, relative demise, and potential renewal for four major political economies. It concentrates on the Dutch Golden Age of the late 1500s and 1600s, British hegemony of the 1800s, Pax Americana of the 1900s, and Chinese potential hegemony of the 2000s, as well as long wave patterns of change over successive centuries to the present and to some degree into the future. Dutch, British, US, and Chinese economies are situated within patterns of long-term successive rise and fall, and fall and rise of economic growth, hegemony, and climate change in the world political economy, including linkages between core, periphery, and semi-periphery. Patterns of multiple crises tend to appear in between hegemonic periods, and climate change often undergoes complex dynamics through time, while currently climate anomalies are emerging during mostly long wave downswings and polycrises in the world economy. Contemporary themes of the book include the ongoing competition for world domination between the US and China, the conflict over Ukraine, Taiwan, that some think may generate world war 3, the climate change crisis that continues to plague the world, and whether the world and its major economies are likely to undergo a Golden Age into the future. Chapter 7 of this book on US hegemony and long waves includes extracts of material that won the Myrdal Prize for Book of the Year Prize from EAEPE, as well as Journal Article of the Year from Curtin Business School. Ideas from parts of Chapter 9 emanate from a volume that won Book of the Year Award.

from CBS A climate change paper that won Journal Article of the Year Awards from EAEPE and CBS informed ideas that are used in several parts of this book The book outlines key stylized facts from the analysis and presents hypotheses for further investigation on the relationship between long term growth hegemony and climate change The book uses the work of Kondratiev Schumpeter and company themes in economic history modern political economy schools and the principles of political economy contingency paradigm to reformulate long wave hegemony and climate change hypotheses and empirics
