Concept and Design Developments in School Improvement Research Arnoud Oude Groote Beverborg, Tobias Feldhoff, Katharina Maag Merki, Falk Radisch, 2021-06-15. This open access book discusses challenges in school improvement research and different methodological approaches that have the potential to foster school improvement research. Research on school improvement and accountability analysis places high demands on a study's design and method. The potential of combining the depth of case studies with the breadth of quantitative measures and analyses in a mixed methods design seems very promising. Consequently, the focus of the book lies on innovative methodological approaches. The book chapters address design, measurement and analysis developments as well as theoretical and conceptual developments. The relevance of the research presented in the chapters for educational accountability is discussed in the book's discussion chapter. More specifically, authors present one specific innovative methodological approach and clarify that approach with a concrete example in the context of school improvement based on empirical data when possible. In this way, this book helps researchers designing complex, useful studies.

They provide a comprehensive political-economic analysis of the historical origins and 20th-century experience of 19th and 20th-century housing tenure in the UK, France, Germany, the former USSR, Israel, Denmark, Sweden, Hungary, Puerto Rico, and the USA. Discuss landlord-tenant relations and the neglect of particular disadvantaged groups such as the elderly, the single, homeless, and those in low-income groups. Examine the balance between rehabilitation and redevelopment and the rise and fall of the high-rise flat. Cover issues such as rent, rent controls, subsidies, and urban renewal. Look at the implications of selling council houses and evaluate the impact of the growth of home ownership in the UK. Address the practical and political difficulties of devising measures which meet policy objectives.
