Cultural Citizenship and Popular Culture Joke Hermes, 2023-09-27 Written in an accessible and engaging style this book uses a series of case studies to show how popular media are important to us as a source of pleasure and entertainment but also in communicating about the world with others Social media platforms have changed how we talk about what we like and dislike in our popular media use Cultural citizenship shows how these discussions speak to belonging to what we feel our rights and responsibilities are in today's polarized world Cultural Citizenship and Popular Culture is based on audience led research and does not privilege textual analysis as a starting point for taking popular media use's measure Instead it offers research tools to listen to others This book offers scholars and students of media and creative industries a means to understand their professional position as one in which they engage with rather than assume to know what users of popular cultural texts and products think and feel N.Y. Observing Theatre Daniel Meyer-Dinkgräfe, 2013-12-01 Daniel Meyer Dinkgräfe and co authors take the exploration of the subjective dimension of theatre its spiritual context its relation to consciousness and natural law further than ever before thanks to the context provided by the thinking of German geobiologist Hans Binder We present relevant aspects of Binder's approach as precisely as possible then take Binder's approach for granted to tease out the implications of that approach to the issues of theatre including nostalgia intercultural theatre theatre criticism dealing with demanding roles the canon theatre and philosophy digital performance practice as research and applied theatre Overall the book proposes an overarching emphasis on the importance of living in the present and the concomitant need to abandon obsolete but still powerful patterns of the past In this context theatre according to Binder has a global responsibility for the new world in which humans are liberated from the scourge of the past Theatre has the power and thus the responsibility to be path breaking for a new fiction to show to people in a playful and creative manner the direction in which the new consciousness can move Daniel Meyer Dinkgräfe is Professor of Drama at the Lincoln School of Performing Arts University of Lincoln He has numerous publications on the topic of Theatre and Consciousness to his credit and is founding editor of the peer reviewed web journal Consciousness Literature and the Arts and the book series of the same title with Rodopi

Music and the Functions of the Brain: Arousal, Emotions, and Pleasure Mark Reybrouck, Tuomas Eerola, Piotr Podlipniak, 2018-04-12 Music impinges upon the body and the brain As such it has significant inductive power which relies both on innate dispositions and acquired mechanisms and competencies The processes are partly autonomous and partly deliberate and interrelations between several levels of processing are becoming clearer with accumulating new evidence For instance recent developments in neuroimaging techniques have broadened the field by encompassing the study of cortical and subcortical processing of the music The domain of musical emotions is a typical example with a major focus on the pleasure that can be derived from listening to music Pleasure however is not the only emotion to be induced and the

mechanisms behind its elicitation are far from understood There are also mechanisms related to arousal and activation that are both less differentiated and at the same time more complex than the assumed mechanisms that trigger basic emotions It is imperative therefore to investigate what pleasurable and mood modifying effects music can have on human beings in real time listening situations This e book is an attempt to answer these questions Revolving around the specificity of music experience in terms of perception emotional reactions and aesthetic assessment it presents new hypotheses theoretical claims as well as new empirical data which contribute to a better understanding of the functions of the brain as related to musical experience

Gender and Environment in Science Fiction Bridgitte Barclay, Christy Tidwell, 2020-07-07 Gender and Environment in Science Fiction focuses on the variety of ways that gender and nature interact in science fiction films and fictions exploring questions of different realities and posing new ones Science fiction asks questions to propose other ways of living it asks what if and that question is the basis for alternative narratives of ourselves and the world we are a part of What if humans could terraform planets What if we could create human nonhuman hybrids What if artificial intelligence gains consciousness What if we could realize kinship with other species through heightened empathy or traumatic experiences What if we imagine a world without oil The texts analyzed in this book ask these questions and others exploring how humans and nonhumans are connected how nonhuman biologies can offer diverse ways to think about human sex gender and sexual orientation and how interpretive strategies can subvert the messages of older films and written texts

Cultural Studies K Sripad Bhat, 2025-04-29 Cultural Studies which has emerged as one of the most seminal and intellectual discourses of our times occupies a strategic location intersecting humanities and social sciences This book covers the various models of cultural studies prevalent across the globe today and serves as a guide for its theory and practice It discusses its trajectory and growth as a discipline since the 1960s and analyses various core concepts like popular culture multiculturalism identity politics race gender ideology and hegemony The subject matter of this book also includes Roland Barthes Myth as Culture Blue cultural studies Agency and structure The Reality behind Reality TV Shows James Bond The Popular Hero Print edition not for sale in South Asia India Sri Lanka Nepal Bangladesh Pakistan and Bhutan

Some Final Thoughts Dave Zorn, 2019-05-01 Some Final Thoughts is an inspirational moving and poignant collection of articles essays personal stories letters and poetry by an award winning broadcast journalist Dave Zorn author of Dinky Dau Love War and the Corps shares these previously unpublished works including an exclusive interview with a former premier of South Vietnam humorous incidents from the author's four decades in radio a minute by minute account of his career ending heart attack and cardiac death and a look at what may or may not have been waiting for him on the other side This body of work provides a glimpse into the man behind the voice of LA Radio

More of Nature, Nurture, and Nostalgia Louis Mihalysi, 1990 This collection of columns from the Black River Journal is every bit as delightful as the first with a new set of characters including Mayflowers Chipmunk Song Sparrow Roll Top Desk and Worm Snake Mr Mihalysi's insights into life and nature make for truly enjoyable

reading North Country artist John Norton once again provides delightful illustrations Ghost Stories for Darwin Banu Subramaniam, 2014-10-15 In a stimulating interchange between feminist studies and biology Banu Subramaniam explores how her dissertation on flower color variation in morning glories launched her on an intellectual odyssey that engaged the feminist studies of sciences in the experimental practices of science by tracing the central and critical idea of variation in biology Subramaniam reveals the histories of eugenics and genetics and their impact on the metaphorical understandings of difference and diversity that permeate common understandings of differences among people exist in contexts that seem distant from the so called objective hard sciences Journeying into interdisciplinary areas that range from the social history of plants to speculative fiction Subramaniam uncovers key relationships between the life sciences women's studies evolutionary and invasive biology and the history of ecology and how ideas of diversity and difference emerged and persist in each field

Evolution's Eye Susan Oyama, 2000-05-03 In recent decades Susan Oyama and her colleagues in the burgeoning field of developmental systems theory have rejected the determinism inherent in the nature nurture debate arguing that behavior cannot be reduced to distinct biological or environmental causes In *Evolution's Eye* Oyama elaborates on her pioneering work on developmental systems by spelling out that work's implications for the fields of evolutionary theory developmental and social psychology feminism and epistemology Her approach profoundly alters our understanding of the biological processes of development and evolution and the interrelationships between them While acknowledging that in an uncertain world it is easy to blame it on the genes Oyama claims that the renewed trend toward genetic determinism colors the way we think about everything from human evolution to sexual orientation and personal responsibility She presents instead a view that focuses on how a wide variety of developmental factors interact in the multileveled developmental systems that give rise to organisms Shifting attention away from genes and the environment as causes for behavior she convincingly shows the benefits that come from thinking about life processes in terms of developmental systems that produce sustain and change living beings over both developmental and evolutionary time Providing a genuine alternative to genetic and environmental determinism as well as to unsuccessful compromises with which others have tried to replace them *Evolution's Eye* will fascinate students and scholars who work in the fields of evolution psychology human biology and philosophy of science Feminists and others who seek a more complex view of human nature will find her work especially congenial
