Neural Networks For Intelligent Signal Processing:

Neural Networks For Intelligent Signal Processing Anthony Zaknich, 2003-01-23 This book provides a thorough theoretical and practical introduction to the application of neural networks to pattern recognition and intelligent signal processing. It has been tested on students unfamiliar with neural networks who were able to pick up enough details to successfully complete their masters or final year undergraduate projects. The text also presents a comprehensive treatment of a class of neural networks called common bandwidth spherical basis function NNs including the probabilistic NN, the modified probabilistic NN and the general regression NN.

New Advances in Intelligent Signal Processing Antonio Ruano, Annamária R. Várkonyi-Kóczy, 2011-08-31 The current volume New Advances in Intelligent Signal Processing contains extended works based on a careful selection of papers presented originally at the jubilee sixth IEEE International Symposium on Intelligent Signal Processing WISP 2009 held in Budapest Hungary August 26-28 2009 celebrating the 10 years anniversary of the WISP event series. The present book does not intend to be an overall survey on the fields of interest of the area but tries to find topics which represent new hot and challenging problems. The book begins with papers investigating selected problems of Modeling Identification and Clustering such as fuzzy random variables evolutionary multi objective neural network models a structural learning model of neural networks within a Boltzmann machine a robust DNA based clustering techniques and the advances of combining multi criteria analysis of signals and pattern recognition using machine learning principles. In the second part of the book Image Processing is treated. The carefully edited chapters deal with fuzzy relation based image enhancement image contrast control technique based on the application ofukasiewicz algebra operators low complexity situational models of image quality improvement flexible representation of map images to quantum computers and object recognition in images. The last chapter presents an image processing application for elderly care performing real time 3D tracking based on a new evaluative multi modal algorithm.

Advances in Intelligent Signal Processing and Data Mining Petia Georgieva, Lyudmila Mihaylova, Lakhmi C Jain, 2012-07-27 The book presents some of the most efficient statistical and deterministic methods for information processing and applications in order to extract targeted information and find hidden patterns. The techniques presented range from Bayesian approaches and their variations such as sequential Monte Carlo methods Markov Chain Monte Carlo filters Rao Blackwellization to the biologically inspired paradigm of Neural Networks and decomposition techniques such as Empirical Mode Decomposition Independent Component Analysis and Singular Spectrum Analysis. The book is directed to the research students professors researchers and practitioners interested in exploring the advanced techniques in intelligent signal processing and data mining paradigms.
