Matt Qvortrup

Neuropolitics 1st Edition

Fabrice Jotterand

Neuropolitics 1st Edition:

Death by a Thousand Cuts Matt Qvortrup, 2023-11-20 In this new edition of Matt Qvortrup's acclaimed book the author shows how neuroscience can help us understand why people willingly give up their democratic rights or are unwillingly forced to do so According to Plato democracies die when people get angry Resentment causes them to vote for demagogues Recently democratically elected politicians have used crises as a pretext for dismantling democracy following a pattern we have seen since the dawn of civilization Why do people fall for the lure of dictatorships And what can we learn from the cause and effects of dictatorships to understand why democracies die *Death by a Thousand Cuts* Neuropolitics Thymos and the Slow Demise of Democracy is written in an accessible style with vignettes and new empirical data to provide historical context and neurological evidence on a much discussed topic the threat of democracy This book will help readers who are concerned about the longevity of democracy understand when and why democracy is in danger of collapsing and alert them to the warning signs of its demise AB Bookman's Weekly, 1991 *The World of Biology and Politics* Steven A.

Peterson, Albert Somit, 2013-10-10 This volume describes the present academic and institutional status of Biopolitics and the wide range of research areas that have emerged within the field **Neuropolitik dan Social Decision-Making** Wahyu

NEUROEPISTEMOLOGY YURI ZAMBRANO, 2012-10-01 The Epistemologic study of the mind mind problem Mind brain

ToM and conscious cognition can apply the Theory of Neuronal Epistemology TNE based on backpropagation of specific neural networks For operating in functionalist terms and in a cognitive way the TNE is supported by a connectionist model holding the algorithmic equation that includes probabilistic features spatiotemporal units computational components and fractal geometric tensorial variables The main arguments of the TNE deal with the study of diverse neuronal lineages and their sophisticated specialization Neuronalism and the neurons knowledge A second argument is the Protein Epistem determining this specialization degree and the third is associated with connectionism The essential unit of the TNE formula is the Fractal Coincidental Pattern FCP used for evaluating the multiple vectorial probabilities of this small world during the quantal release of neurotransmitters

Edgework Wendy Brown, 2009-01-10 Edgework brings together seven of Wendy Brown's most provocative recent essays in political and cultural theory They range from explorations of politics post 9/11 to critical reflections on the academic norms governing feminist studies and political theory Edgework is also concerned with the intellectual and political value of critique itself It renders contemporary the ancient jurisprudential meaning of critique as *krisis* in which a tear in the fabric of justice becomes the occasion of a public sifting or thoughtfulness the development of criteria for judgment and the inauguration of political renewal or restoration Each essay probes a contemporary problem the charge of being unpatriotic for dissenting from U.S. foreign policy the erosion of liberal democracy by neoliberal political rationality feminism's loss of a revolutionary horizon and seeks to grasp the intellectual impasse the problem signals as well as the political incitement it may harbor

Enacting the Worlds of Cinema Steffen Hven, 2022 Enacting the Worlds of Cinema offers a substantial reconfiguration of the textual roots of modern film narratology By giving sustained attention to cinema's material affective modes of communicating its stories and embedding its audience in atmospheric kinetic and multisensorial worlds this book maintains that film narratives are less representations than they are enactments brought forth through the interactions of the felt body and the film material The book defends this enactive and media anthropological thesis by reworking a series of established film narratological key concepts including the diegesis mood atmosphere and the distinction between diegetic and non diegetic sound In the process this book draws on a wide range of contemporary theoretical resources such as affective neuroscience media philosophy philosophy of mind atmosphere research multisensory perception theory as well as a broad selection of films including Berlin Symphony of a Great City Ruttmann 1927 The Cranes are Flying Kalatozov 1957 and Happy as Lazzaro Rohrwacher 2018

Stare in the Darkness Lester K. Spence, 2011 Critiquing the true impact of hip hop culture on politics

The Unfit Brain and the Limits of Moral Bioenhancement Fabrice Jotterand, 2022-03-03 In light of the potential novel applications of neurotechnologies in psychiatry and the current debate on moral bioenhancement this book outlines the reasons why more conceptual work is needed to inform the scientific and medical community and society at large about the implications of moral bioenhancement before a possible highly hypothetical at this point broad acceptance and potential implementation in areas such as psychiatry e g treatment of psychopathy or as a measure to prevent crime in society The author does not negate the possibility of altering or manipulating moral behavior through technological means Rather he argues that the scope of interventions is limited because the various options available to enhance morality improve or simply manipulate some elements of moral behavior and not the moral agent per se in the various elements constitutive of moral agency The concept of Identity Integrity is suggested as a potential framework for a responsible use of neurotechnologies in psychiatry to avoid human beings becoming orderers and orderables of technological manipulations
