

Functional grammar of Nunggubuyu

Jeffrey Heath

Functional grammar of Nunggubuyu is a detailed study of the grammar of a Papuan language. The book is written in a functional approach, which is concerned with the way in which language is used in communication. The author, Jeffrey Heath, is a linguist who has spent a significant amount of time working with the Nunggubuyu people. The book is divided into several parts, each dealing with a different aspect of the language. The first part deals with the general features of the language, such as its syntax and morphology. The second part deals with the semantics of the language, including the way in which meaning is conveyed through the use of words and phrases. The third part deals with the pragmatics of the language, which is concerned with the way in which language is used in different social contexts. The book is written in a clear and accessible style, and it is a valuable resource for anyone interested in the study of Papuan languages.
